WHEREAS, the applicant requested an extension of time which was granted and now requests a further extension.

Resolved, that the board of standards and appeals does hereby modify the foregoing resolution and that the application be and it hereby is granted for a further period of two years from October 23, 1928, on condition that the stipulations set forth in the original resolution be complied with.

1149-24-BZ.

APPLICANT—Croker Natl. Fire Prevention Engineering Co. for Herman W. Bruning, owner.

SUBJECT—Application for reopening—extension of permit—application (re decision of the superintendent of buildings) to permit in a residence district the alteration and conversion of occupancy from a stable to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—63-63½ Schaeffer street, Brooklyn.

APPEARANCES—

For Applicant: Herman E. Horwood.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(1149-24-BZ)

WHEREAS, Walter B. Willis, for Herman W. Bruning, owner, filed, September 19, 1924, an application, under the building zone resolution, to permit in a residence district the alteration and conversion of occupancy of a stable to

a garage for the storage of more than five motor vehicles; premises 63-63½ Schaeffer street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting, April 28, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Schaeffer street is in a residence district and Bushwick avenue and Evergreen avenue are in business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 11, 1924, in acting on Alteration Application No. 2563-24, reads:

"Proposed alteration of the two buildings used at present as stables, to two one-story brick garages to be occupied by three cars each, a use not accessory to the dwelling located on the front of the lot in a residence district, is contrary to Art. 2, Sect. 6, of the Zone Resolution.";

and

WHEREAS, the existing buildings consist of a one-story frame structure and a two-story brick structure used as stables; having a total area of 50 ft. by 18 ft. located at the rear lot line of the plot; it is proposed to alter these two buildings to a one-story non-fireproof garage, 50 ft. by 18 ft. in area, for the storage of more than five motor vehicles; and

WHEREAS, the applicant filed 80 per cent consents of adjoining property owners, and the board deems the proposed alteration would be an improvement over the existing use and occupancy; and

WHEREAS, this application was granted by the board at its meeting, April 28, 1925, for a temporary period, and owner, through his present applicant, Croker National Fire Prevention Engineering Co., requested an extension of permit.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, on the basis of section 7-G, for a temporary period of two (2) years from October 23, 1928, restricting the structure to a depth of 18 ft. and a width of 50 ft. to be located on the rear of the premises, for the storage of six (6) automobiles of the pleasure car type, space for four (4) of which may be rented to persons not residing on the premises; that the rear and gable walls shall be unpierced throughout their entire height and length; there shall be no gasoline equipment installed and no signs of any nature displayed on premises;

Resolved, further, that all permits necessary for the prosecution of the work shall be obtained within six (6) months and the building completed within eighteen (18) months from the date of this action.

APPROVAL OF PLANS

145-28-BZ.

APPLICANT—Daniel Campbell, Jr., for Avery Garage Corp., owner.

SUBJECT—Application—approval of plans—(re decision of the superintendent of buildings) under sections 7b and 21 of the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Northeast corner Blossom and Crommelin avenues, Flushing, Queens.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report; report adopted and plans approved.

(continued on page 1084)

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, November 2, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) *One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or*

(b) *Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or*

(c) *Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.*

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) *OVER 275 GALLONS CAPACITY.* Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored.

horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line cent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with of adjoining property, or the nearest building or adja-

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-ing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{1}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(c) *Relief valves shall be set to discharge at not more than 1½ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] *used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.*

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner a shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x $\frac{1}{8}$ -inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied *exclusively* by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied *exclusively* by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman
WILLIAM I. O'GORMAN, Secretary.

MINUTES

(continued from page 1075)

THE VOTE TO ADOPT REPORT AND APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
 Negative 0
 Absent 0

245-28-BZ.

APPLICANT—Thomas W. Lamb, Inc., for Highbridge Realty Corp., owner.

SUBJECT—Application for approval of plans in accordance with the resolution adopted by the board under date of September 18, 1928.

PREMISES AFFECTED—4140-4156 Broadway, 660-662 West 176th street, 651-661 West 175th street, and 40-54 Wadsworth avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Chairman read engineer's report; report adopted; plans approved.

THE VOTE TO ADOPT REPORT AND APPROVE PLANS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
 Negative 0
 Absent 0

Meeting adjourned 4.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held September 25, 1928, as they appeared in Bulletin No. 40, Vol. XIII, are hereby corrected to read as follows:

(223-28-BZ)

The chairman read a communication from Ed. J. Foy, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business dis-

* Correction—Calendar number changed from 223-26-BZ to 223-28-BZ.

trict the erection and maintenance of a garage for the storage of more than five motor vehicles and, also, a gasoline service station; premises 329-353 Skillman avenue, north side, 11 ft. east of Lowery street, Long Island City, Borough of Queens.

The following area was approved by the board:

Both sides of Skillman avenue from a point 100 ft. east of Harold (39th street) avenue to 42nd street; both sides of 40th (Lowery) street from a point 100 ft. north of Skillman avenue to a point 200 ft. south of Skillman avenue.

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, October 26, 1928, 2 p. m.

Minutes of Regular Meeting, October 30, 1928, 10 a. m.

Minutes of Regular Meeting, October 30, 1928, 2 p. m.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Wednesday, November 7, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 13, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

MINUTES

THE RESOLUTION—

(521-28-A)

WHEREAS, Keiner Williams Stamping Co., owner, filed, June 6, 1928, an appeal from an order of the fire commissioner, affecting premises west side of 121st street (Spruce street), 250 ft. south of Jamaica avenue, Richmond Hill, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 2, 1928 (Order No. 36559-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, basement and one story in height, 247 ft. 7 in. frontage on 121st (Spruce) street and 166 ft. frontage on L. I. R.R. tracks, about 21,100 sq. ft. in area; OCCUPIED for the storage of iron boilers, 2 persons; and

WHEREAS, the appellant claims that there is a fire hydrant directly in front of the premises on 121st street; furthermore, that the occupancy is non-hazardous; and

WHEREAS, the order is predicated on excess area and the structure is but one story in height above grade, used and occupied for the storage of metal tanks, and opens on two street fronts and a railroad right-of-way.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension and that the use and occupancy shall remain substantially unchanged.

633-28-A.

APPELLANT—Croker Nat'l. Fire Prev. Eng. Co., for Daniel Jones, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—62 Orchard street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

Absent 0

THE RESOLUTION—

(633-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Daniel Jones, Inc., owner, filed, July 26, 1928, an appeal from an order of the fire commissioner, affecting premises 62 Orchard street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 28, 1928, reads:

"Order No. 34626-F:

"1. Provide a separate and distinct system of automatic sprinklers throughout the building, having at least one source of water supply, arranged and equipped as provided in the Rules of Fire Extinguishing Appliances adopted by the Board of Standards and Appeals, May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building is non-fireproof, seven stories and basement (75 ft. above grade) in height, 28 ft. by 87 ft. 6 in. in area; OCCUPIED by one concern as a retail furniture showroom and for the storage of furniture, 3 persons in the entire premises; and

WHEREAS, the appellant contends that the premises have been occupied in this manner since 1910; that the building is adequately provided with exits; that there is no unusual hazard in the building, and that appellant proposes to install a thermostatic fire alarm throughout the premises.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

570-28-A.

APPELLANT—Cornell Utilities Co., Inc., for John A. Steinmetz, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2137 Boston road, The Bronx.

APPEARANCES—

For Appellant: William Porter; John A. Steinmetz.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon 5

Negative 0

Absent 0

THE RESOLUTION—

(570-28-A)

WHEREAS, Cornell Utilities Co., Inc., for John A. Steinmetz, filed, June 26, 1928, an appeal from a decision of the fire commissioner, affecting premises 2137 Boston road, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated May 28, 1928 (Plan No. 222-26), reads:

"1. Boiler room ceiling must be of fireproof construction. Rule 20, Fuel Oil Rules."

and

WHEREAS, the building is non-fireproof, one story and basement in height, 30 ft. by 56 ft. 6 in., irregular, in area; OCCUPIED as stores (candy and fruit), 6 persons; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,080-gallon grade B fuel oil storage tank (buried outside the premises), a 55-gallon auxiliary tank, an approved Nokol Oil Burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that the boiler room is separated from the remainder of the basement by fireproof partitions and proposes to protect the ceiling of the boiler room with metal lath and ¾ inch Portland cement plaster, contending that the required fireproof ceiling would require a material change in the construction of the building; and

WHEREAS, the building is but one story in height and the fuel oil burning system is of a domestic type installation.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and that the boiler room ceiling throughout shall be fire retarded in accordance with the rules of the board of standards and appeals, and that the fuel oil burning equipment shall otherwise comply with the fuel oil rules in all respects.

635-28-A.

APPELLANT—Joseph J. Ahearn, for The Barrett Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—Southwest corner of Smith and Sigourney streets, Brooklyn.

APPEARANCES—

For Appellant: Joseph J. Ahearn.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

MINUTES

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(635-28-A)

WHEREAS, Joseph J. Ahearn, for The Barrett Co., owner, filed, July 26, 1928, an appeal from an order of the fire commissioner, affecting premises southwest corner of Smith and Sigourney streets, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 9, 1928 (Order No. 35229-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, three stories (50 ft.) in height, having a frontage of 200 ft. on Smith street, 200 ft. on Sigourney street and 150 ft. on Hallock street; an area of approximately 32,000 sq. ft. on the first story, approximately 22,000 sq. ft. on the second story and 20,000 sq. ft. on the third story; OCCUPIED—building vacant at present; and

WHEREAS, appellant contends that the building, facing on three street fronts, is readily accessible to the fire department in the event of fire; that the premises is equipped with an automatic sprinkler system supplied from a 15,000-gallon gravity tank located on the roof of the building and two 6-inch street connections to the city mains in Smith and Court streets; appellant contends, further, that the pressure in the city main is 45 pounds per square inch; and

WHEREAS, the building at present is unoccupied and without a heating apparatus of any kind.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only as long as the building remains vacant and unoccupied.

639-28-A.

APPELLANT—John J. Gilmartin, for The Colonial Bank, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2000-2010 Broadway and 121-125 West 68th street, northeast corner, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(639-28-A)

WHEREAS, John J. Gilmartin, for The Colonial Bank, owner, filed, July 27, 1928, an appeal from a decision of the fire commissioner, affecting premises 2000-2010 Broadway, northeast corner of 68th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered June 7, 1928 (re Plan No. 1325-1928), reads:

"1. As building exceeds 10,000 sq. ft. in area and approval of fuel oil is subject to the installation of an approved standpipe system (Order No. 41314-LC)

plans must be filed of all floors, sections and if any structures on roof, roof plan (with all necessary notes relative to standpipe system), showing standpipe system and application filled out to agree. Rule No. 1."

and

WHEREAS, the building is fireproof, two stories (32 ft.) in height, having a frontage of 113 ft. on Broadway and a frontage of 97 ft. 6 in. on West 68th street, a total area of approximately 11,800 sq. ft. on the first story and approximately 9,800 sq. ft. on the second story; OCCUPIED: 1st story, stores and bank, 25 persons; 2nd story, offices, 50 persons; and

WHEREAS, appellant contends that the building is low in height; that the excess area of the structure on the first story over the limiting 10,000 sq. ft. is slight; that the building faces on two streets, with entrances so located that, where necessary, the fire department can readily reach the scene of any fire in any portion of the building.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall not be increased in height, area or dimension; that the fuel oil burning equipment shall be installed and maintained in strict compliance with the fuel oil rules, and granted as long as conditions as to occupancy and use remain substantially unchanged.

498-28-A.

APPELLANT—William F. Doyle, for Stephen D. Sink, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—8907-8917 Metropolitan avenue and 8944 Central avenue, Middle Village, Borough of Queens.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5

THE RESOLUTION—

(498-28-A)

WHEREAS, William F. Doyle, for Stephen D. Sink, owner, filed, June 1, 1928, an appeal from a decision of the fire commissioner, affecting premises 8907-8917 Metropolitan avenue and 8944 Central avenue (Cooper avenue), Middle Village, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated May 31, 1928 (1225-28), reads:

"1. The extension of a gasoline station is not permitted in a business zone.

"Appeal may be made to the Board of Standards and Appeals."

and

WHEREAS, the premises consist of a plot of ground 149.46 ft. by 146.07 ft., on which is located a gasoline selling station, two frame dwellings and a one-story concrete block garage; and

WHEREAS, it appears that the plot in question at one time contained an additional strip 25 ft. in width, which was taken over by the city in 1927 for the widening of Central avenue and on this strip was located several pumps and other accessories of the gasoline selling station; it is now proposed to replace these pumps in the existing property and appellant contends that this does not violate the rules of the zoning law; and

WHEREAS, the gasoline service station does exist on these premises as recorded in the fire department; and

WHEREAS, the order is predicated on the proposition of relocating the gasoline storage tanks and the installation of

MINUTES

additional tanks, this condition having been brought about by the widening of the public highway on which the property faces.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the use, conduct and operation of these premises shall be restricted within the property lines, in accordance with permit originally issued by the fire department, and that all other requirements shall be complied with in all respects.

THE RESOLUTION—

(569-28-A)

WHEREAS, Cornell Utilities Co., Inc., for John A. Steinmetz, owner, filed, June 26, 1928, an appeal from a decision of the fire commissioner, affecting premises 1005 East 180th street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated June 8, 1928 (223-26), reads:

"1. Boiler room must be completely cut off from the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta. Fuel Oil Rule 20, new rules, Fuel Oil Rule 33, old rules."

and
WHEREAS, the building is frame, two stories and basement in height, 27 ft. 6 in. by 39 ft. 6 in., irregular, in area; OCCUPIED: 1st story, stores; 2nd story, dentist's office, 2 persons; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,080-gallon grade B fuel oil storage tank (buried outside the premises), a 55-gallon auxiliary tank, an approved Nokol Oil Burner and the necessary valves and piping for a complete equipment; and

WHEREAS, appellant contends that the boiler room is separated from the rest of the basement by fireproof walls and proposes to construct the ceiling of the boiler room with metal lath and 3/4 inch Portland cement plaster, contending that if required to construct a fireproof ceiling, material changes would have to be made in the construction of the building; and

WHEREAS, the building is but two stories in height and of small area and the boiler room being separated from the remainder of the cellar.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; that the entire ceiling of the boiler room shall be fire retarded in accordance with the rules of the board of standards and appeals; that direct egress from the boiler room to the outer air shall be provided and that the fuel oil equipment shall otherwise comply with the fuel oil rules in all respects.

THE RESOLUTION—

(456-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for B. Aronowitz & Co., Inc., owner, filed, May 18, 1928, an appeal from an order of the fire commissioner, affecting premises 247-251 Third avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 11, 1927, reads:

"Order No. 24527-F:

"1. Replace missing and defective shutters with proper iron shutters at all openings in the exterior wall above the 1st story, which are distant in direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings, and which are not more than 50 ft. above a neighboring roof at north and east sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, five stories in height, 63 ft. by 70 ft. in area; OCCUPIED: 1st story, stores and sheet metal shop, 8 persons; 2nd story, carpenter shop, 3 persons; 3rd and 4th stories, vacant at present; 5th story, sheet metal shop, 12 persons; and

WHEREAS, there are nine windows on each story above the first story in the easterly wall of the building within 30 ft. of openings in neighboring buildings to the east or within 50 ft. of the roofs of two and three-story neighboring buildings to the east; and

WHEREAS, the applicant proposes to provide iron shutters at the windows in the north wall of the building and contends that the building at the rear is occupied as an osteopathic clinic; that it is fireproof construction and that the windows in this building, forming the exposures, are wire glass set in metal frames.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the windows in the rear or easterly wall not on the course of fire escapes, exits, stair halls, shaftways or public corridors, *on condition* that the occupancy and use of the premises and the adjoining exposures remain unchanged.

THE RESOLUTION—

(550-28-A)

WHEREAS, John J. Gilmartin, for E. W. Bliss Buildings, Inc., filed, June 21, 1928, an appeal from an order of the fire commissioner, affecting premises 309-311 East 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 24, 1928, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at north and west sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 92 ft. in area; OCCUPIED: 1st story, manufacture of glue, 5 persons; 2nd and 3rd stories, printing, 20 persons per story; 4th story, manufacture of chains, 20 persons; 5th story, printing, 20 persons; 6th story, dyers, 20 persons; and

WHEREAS, there are four windows in the westerly wall on all stories above the first story within 50 ft. of the roof of the one-story extension of a factory building adjoining to the west, and also five windows in the northerly wall on all stories above the first story within 30 ft. of openings in neighboring fireproof factory buildings to the north; and

WHEREAS, appellant contends that the building in question is protected with a sprinkler system; that all the buildings forming the exposures are equipped with sprinkler systems and that most of the windows in the building forming the exposures are equipped with iron shutters or are wire glass windows; and

WHEREAS, the premises are equipped throughout with a sprinkler system and the buildings forming the exposures are either fireproof or equipped with sprinkler systems throughout.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects windows not on the course of fire escapes, exits, shafts, stair halls or public corridors, *on condition* that the conditions as to occupancy and use of the premises under appeal and also the adjoining exposures remain substantially unchanged.

THE RESOLUTION—

(544-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Colonial Real Estate Association, filed, June 19, 1928, an appeal from an order of the fire commissioner, affecting premises 53-57 West 14th street and 54-56 West 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 26, 1928 (Order No. 34490-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs.

per square inch extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is fireproof, six stories (84 ft. 10 in.) in height, 70 ft. 11 in. by 206 ft. 6 in., irregular, in area, approximately 13,000 sq. ft. in area on the basement story and approximately 11,000 sq. ft. in area on the first and upper stories; OCCUPIED: basement, boiler room, shipping and receiving department, 8 persons; 1st and 2nd stories, retail clothing store, 80 persons in both stories; 3rd story, vacant at present; the upper stories being occupied by one concern for the manufacture of neckties, bath robes, etc.; 4th story, 15 persons; 5th story, 25 persons; 6th story, 75 persons; and

WHEREAS, appellant contends that the building has been used practically as at present since 1905; that the building is equipped with a two-source sprinkler system equipped with a 14,000-gallon capacity gravity tank and two 4,000-gallon pressure tanks; that the premises is amply supplied with exits (on both street fronts), and that the area of the building is but slightly in excess of the limiting area requiring the installation of a standpipe system; and

WHEREAS, the building is slightly in excess of the area requirement as to standpipe equipment.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and that the existing two-source wet sprinkler system shall be maintained in accordance with the rules now in force, and granted only as long as conditions as to use and occupancy remain substantially unchanged.

THE RESOLUTION—

(382-28-BZ)

WHEREAS, Emil Guterman, for Abe Schiller, owner, filed, April 23, 1928, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a gasoline service station; premises northeast corner of Northern boulevard (Jackson avenue) and 226th street, Bayside, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Northern boulevard (Jackson avenue) is in a business district; 226th street and 227th street are in a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 22, 1928 (re Plan No. 3506-27), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, it is proposed to erect a non-fireproof brick office, 20 ft. by 20 ft., bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service

station, 100 ft. within a business district extending 100 ft. in an unrestricted district; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal within the purview of section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION—

(362-28-BZ)

WHEREAS, William F. Doyle, for S. & L. Building Corp., owner, filed, April 18, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, an alteration and change of a portion of the basement story from storage to a business occupancy; premises 2665 Grand Concourse, northwest corner of East Kingsbridge road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Grand Concourse is in a residence district, East Kingsbridge road is in a business district and Creston avenue is in a residence district; and

WHEREAS, the decisions of the tenement house commissioner and superintendent of buildings, rendered January 17, 1928, and April 9, 1928, respectively (re Alt. Plan No. 8-1928), read:

Tenement house commissioner's decision:

"1. Proposed alteration is unlawful, stores being within 100 ft. of the Grand Concourse."

and

Superintendent of building's decision:

"1. Alteration of building in residence district for business purposes contrary to Zoning Resolution."

and

WHEREAS, the existing building is of fireproof construction, nine stories in height, with a frontage of 145 ft. and a depth of 156 ft. and 160.6 ft., irregular; occupied as a tenement with stores in the business use area of structure; it is proposed to extend these stores into the residence use area; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under sections 7c and 21 on the grounds of hardship; a similar application having been denied under Cal. No. 829-22-BZ.

Resolved, that the decisions of the tenement house commissioner and the superintendent of buildings be and they hereby are affirmed, and that the application be and it hereby is denied.

THE RESOLUTION—

(438-28-BZ)

WHEREAS, Morris & Morris, for Frances Rosenthal, owner, filed, May 10, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a business building; premises 1984 82nd street and 8202-8212 20th avenue, southwest corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 82nd street, 20th avenue and 83rd street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 20, 1928 (re Applic. No. 5931-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of a building to be used as stores in a residential district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 100 ft. and a depth of 33 ft. 4 in.; to be occupied as a business building (stores); and

WHEREAS, the board deems that applicant does not come within the purview of the rule of exception 7, subdivision c; and

WHEREAS, the board deems that applicant is not entitled to relief under section 21 as there is absolutely no substantial reason for the change of this residence use, as yet otherwise uninvaded, to a business occupancy.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1137-22-BZ.

APPLICANT—Martin James Fielder, for Tillie S. Feldman, owner.

SUBJECT—Application for reopening—extension of temporary permit—re application (order of fire commissioner) to permit in a business district the erection of an oil selling station.

PREMISES AFFECTED—S. S. of Buel ave, 1030 ft. east of Richmond Rd., Richmond.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request for extension of permit. Application reopened and permit extended for one year.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1137-22-BZ)

WHEREAS, Martin James Fielder, for Tillie S. Feldman, owner, filed, September 22, 1922, an application, under the building zone resolution, to permit in a business district the erection and maintenance of an oil storage plant: premises south side of Buel avenue, 1,030 ft. east of Richmond road, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, October 31, 1922, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Buel avenue and Richmond road are in business districts; and

WHEREAS, the decision of the fire commissioner, rendered September 20, 1922, in acting on Alt. App. No. 1151-1922, reads:

"1. Oil storage plant not permitted in a business district under section 4A of the Building Zone Resolution.";

and

WHEREAS, the premises consist of a plot of ground in a business district on which it is proposed to erect a one-story frame oil house, with a frontage of 26 ft. and a depth of 11 ft., and a one-story frame stable for five horses, 25 ft. by 30 ft., and to install underground a 15,000-gallon tank for petroleum storage; and

WHEREAS, appellant contends that the premises were occupied for similar uses previous to the passage of the building zone resolution; and

WHEREAS, this appeal was granted by the board at its meetings, October 31, 1922, September 30, 1924, March 23, 1926, and October 25, 1927, for a temporary period, and applicant requests an extension of time.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the application be and it hereby is *granted*, for a period of one year from the date of this action, October 29, 1928, *on condition* that applicant obtain all necessary permits and that the storage tank shall be installed in accordance with the fuel oil rules of the board of standards and appeals.

557-28-BZ.

APPLICANT—William R. White, for Richard Carroll, Inc., owner.

SUBJECT—Application (re: decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of sixteen (16) one car garages and a gasoline service station.

PREMISES AFFECTED—2717 Reservoir avenue, The Bronx.

APPEARANCES—

For Applicant: William R. White; Richard Carroll.

For Opposition: Carl E. Jampel; S. H. Lifschitz.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon 4
Negative: Commissioner Connell..... 1
Absent 0

THE RESOLUTION—

(557-28-BZ)

WHEREAS, William R. White, for Richard Carroll, Inc., owner, filed, June 22, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of sixteen (16) one-car garages and a gasoline service station; premises 2717 Reservoir avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application

MINUTES

by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kingsbridge road is in a business district, Reservoir avenue is in a residence district and University avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 19, 1928 (re Plan No. 1104-28), reads:

"1. The Proposed sixteen one-car garages and gasoline service station may not be permitted at this location, which is situated in a residence district, Sec. 3, Building Zone Resolution."

and

WHEREAS, the premises consist of a plot of ground 46 ft. by 165 ft., irregular; it is proposed to erect a structure 150 ft. long, 19 ft. 4 in. deep and 15 ft. high, to be divided into sixteen spaces for one car each, located on the westerly side of the plot, and along the front of easterly side to erect an office and install tanks and pumps for a gasoline service station; and

WHEREAS, this application for a gasoline service station and sixteen individual automobile garages has been supported by consents in affidavit form of all contiguous, abutting and adjoining property owners on the same square block, excepting two properties located at 195th street, Reservoir avenue and University avenue; and

WHEREAS, the plot is irregular in shape and bounded by blank masonry walls on the north and south, and the grade of University avenue to the west is substantially above the level of this property; and

WHEREAS, the board deems that under section 21 they are empowered to vary the zoning resolution in this matter.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected throughout the entire premises a building not exceeding one story in height above grade, to be used and occupied as a public garage; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevation on Reservoir avenue shall be finished with light-color face brick with natural stone, architectural terra cotta, or face brick of dark-tone trim; that the parapet wall shall be of substantial height, not less than 5 ft. above roof level, and shall be coped with molded terra cotta of not less than 18-inch girth; that there shall be no signs erected on the roof; that any advertising on the front of the building shall be limited to one projecting electric sign, indicating the name and title of the business conducted on the premises, and that all permits shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

569-27-BZ.

APPLICANT—William F. Doyle, for Delaney and Otten Co., Inc. owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied).

PREMISES AFFECTED—Southeast corner of Fourth avenue and 12th street, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Report of committee adopted; Application granted on condition.

THE VOTE TO ADOPT REPORT AND GRANT ON CONDITION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(569-27-BZ)

WHEREAS, William F. Doyle, for Delaney & Otten Co., Inc., owner, filed, May 20, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises southeast corner of Fourth avenue and 12th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourth avenue is in a business district; 12th street, east of a point 100 ft. east of Fourth avenue, is in a residence district, and 12th street, west of a point 100 ft. west of Fourth avenue, is in an unrestricted district; and

WHEREAS, the decision of the fire commissioner, rendered May 19, 1927 (re Plan No. 1300-27), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 50 ft. on Fourth avenue and 97 ft. 10½ in. on 12th street, upon which it is proposed to erect a small accessory store and the necessary tanks and pumps for a gasoline service station; and

WHEREAS, a committee of the board personally inspected the premises under appeal and submitted a report recommending the favorable consideration of this variation; and

WHEREAS, the premises are now occupied by a prohibitive non-conforming use; and

WHEREAS, the applicant has filed with the board a preponderance of consents in excess of 60 per cent of affected owners of property on both street fronts and of all adjoining property owners as well as those opposite in all directions, the board deems that a denial of this application would constitute a hardship under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected along the southerly and easterly property lines a wall of approved masonry, battered or curved back from the building line at a rake not less than 45 degrees to the street front of the abutting buildings on both streets, said wall to be faced on the interior with light-colored enamel face brick panelled with dark-colored enameled brick; that the proposed structure shall not exceed a ground area of 20 ft. square or a height of one story above grade, finished on the exterior with light-colored enamel brick and dark-colored brick trim at all openings; that the parapet shall be coped with natural stone; that there shall be erected on the building line on both street fronts a concrete curbing not less than 12 in. in height above grade; that there shall be erected at the intersection of Fourth avenue and 12th street a concrete platform not less than 12 in. above grade in height and not less than 10 ft. in depth in both directions from the intersection of Fourth avenue and 12th street; that the gasoline pumps installed shall be located not less than 10 ft. from the building line formed by the intersection of 12th street and Fourth avenue; that the use, conduct and operation of the business shall be confined to and restricted within the property lines of the premises; that any advertising display shall be restricted to the frieze on the building erected thereon and the glass globes of the gasoline pumps; that all permits required shall be obtained within nine months and all work involved completed within one year from the date of this action.

976-27-BZ.

APPLICANT—Philip J. Sinnott, for McMahon Brothers, owners.

SUBJECT—Application for reopening—ext. of time in which to procure permits—re application (de-

MINUTES

cession of the superintendent of buildings) under section 21 of the building zone resolution to permit partly in a business district and partly in a residence district the extension in area and height of an existing garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—S. W. cor of Queens blvd. and Devon pl., Forest Hills, Queens.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: None.

ACTION OF BOARD—Application reopened and extension of time granted to obtain permits and complete work.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(976-27-BZ)

WHEREAS, Philip J. Sinnott, for McMahon Brothers, owners, filed, September 6, 1927, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the extension in area and height of an existing garage for the storage of more than five motor vehicles; premises southwest corner of Queens boulevard and Devon place, Forest Hills, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens boulevard is in a business district; Devon place, south of a point 100 ft. south of Queens boulevard, is in a residence district, and Devon place, from Queens boulevard to a point 100 ft. south of Queens boulevard, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 5, 1927 (re Alt. No. 3609-27), reads:

"The erection or extension of a building in a business and residence district for use as a public garage is contrary to Art. 2, Section 4 Zone Law.";

and

WHEREAS, the northerly property (100 ft. by 100 ft. in area) of the building is in the business district and the southerly portion (100 ft. by 50 ft. in area) is in the residence district; the existing garage is non-fireproof, one story in height, having a frontage of 89 ft. 7 in. on Queens boulevard and 150 ft. on Devon place and sets back 10 ft. from the building line on Devon place; it is proposed to extend the first story out to the building line of Devon place for a 100 ft. portion of this frontage and to erect a second story over the entire structure as extended; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant is entitled to relief under section 21 of the building zone resolution; and

WHEREAS, applicant has filed 79 per cent consents of an area deemed affected by the board, being practically in accordance with section 7g of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, April 24, 1928, on certain conditions, and applicant requested an extension of the time limit.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only as far as it affects the extension of the building on the Devon place frontage westward 10 ft. or to the building line of Devon place for a depth of 100 ft. and the addition of a story over the whole area, on condition that the facade of building shall be erected in keeping with the existing building, and that the structure shall comply with the requirements

of the building code in all respects; all permits required shall be obtained within three months and all work completed within six months from the date of this action—October 30, 1928.

AREAS FIXED.

(149-28-BZ)

The chairman presented and read a communication from Emil Guterman, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a gasoline service station; premises 261 Potter avenue, north side, 51 ft. east of Second avenue, Astoria, Borough of Queens.

The following area was approved by the board:

Both sides of Potter avenue from a point 100 ft. east of Fourth avenue to a point 400 ft. west of premises in question; both sides of Second avenue; also both sides of Roland avenue from Potter avenue to a point 100 ft. south of Potter avenue; also the east side of Second avenue from Potter avenue to a point 150 ft. north of Potter avenue.

(767-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 279-285 East 233rd street, Borough of The Bronx.

The following area was approved by the board:

Both sides of East 233rd street from East 234th street to a point 100 ft. east of Katonah avenue; the west side of Katonah avenue from East 233rd street to East 234th street; the south side of East 234th street from Katonah avenue to a point 210 ft. west of Katonah avenue.

(650-28-BZ)

The chairman presented and read a communication from William Holt, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 144-08 to 144-18 91st avenue, Jamaica, Borough of Queens.

The following area was approved by the board:

Both sides of 91st avenue (Carll street) from a point 100 ft. east of 144th place (Vanderbilt avenue) to a point 400 ft. west of premises in question; both sides of 144th place (Vanderbilt avenue) from a point 150 ft. north of 91st avenue (Carll street) to a point 150 ft. south of 91st avenue (Carll street).

(461-28-BZ)

The chairman presented and read a communication from Edward L. Kelly, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 533-543 Glenmore avenue and 241-245 Van Sicklen avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Glenmore avenue from Miller avenue to a point 400 ft. east of premises in question; also both sides of Van Sicklen avenue from Pitkin avenue to a point 100 ft. north of Glenmore avenue.

(231-28-BZ)

The chairman presented and read a communication from Daniel Campbell, Jr., requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 97-44 Sutphin boulevard, north side of Liberty avenue from 146th street to Sutphin boulevard, Jamaica, Borough of Queens.

The following area was approved by the board:

Both sides of Liberty avenue and also 101st avenue from a point 100 ft. east of Sutphin boulevard to a

MINUTES

point 400 ft. west of premises in question, not including the unrestricted district; both sides of Sutphin boulevard from Liberty avenue to a point 400 ft. south of Liberty avenue; also the west side of 146th street from 101st avenue to a point 100 ft. north of 101st avenue.

(531-28-BZ)

The chairman presented and read a communication from Michael E. Pellegrino, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a gasoline service station and also a garage for the storage of more than five motor vehicles; premises 2898-2908 Ocean avenue, southwest corner of Avenue Y, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Ocean avenue from a point 200 ft. north of the northerly line of Avenue Y to a point 400 ft. south of the premises in question; both sides of Avenue Y from Kenmore place to a point 100 ft. west of the westerly side of East 19th street; also the property on the easterly side of East 19th street within 50 ft. of the lot lines of the premises in question.

(714-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a residence district, extending from a business district, the erection and maintenance of a business build-

ing; premises north side of Union Turnpike, 110.16 ft. west of Queens boulevard, Kew Gardens, Borough of Queens.

The following area was approved by the board:

Both sides of Union Turnpike from a point 100 ft. west of Queens boulevard to a point 400 ft. west of the premises in question; the easterly side of Kew Forest lane from Union Turnpike to a point 180 ft. north of Union Turnpike; also all premises located in a residence district and within 50 ft. of the rear lot lines of the premises in question.

(749-28-BZ)

The chairman presented and read a communication from James M. Vincent, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a shop building for the purchasing and weighing of junk, and also nine garages for the storage of nine motor vehicles; premises 366-370 Menahan street, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Menahan street from a point 100 ft. east of St. Nicholas avenue to a point 400 ft. west of premises in question; also the properties at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

Adjourned 2.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION—

(319-28-S)

WHEREAS, Julian Roth, for 45th Street and Third Avenue Corp., filed, April 6, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 235-247 East 45th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 15, 1928 (N. B. Applic. No. 1-1928), and amended March 20, 1928, reads:

"This amendment is disapproved with the following objection:

"9. Fireproof windows with panes over 720 square inches are unlawful. Sec. 264 Labor Law.";

and

WHEREAS, the building, in course of construction, is fireproof, sixteen stories in height, 150 ft. by 100 ft. 4¼ in. in area; OCCUPIED: showrooms and manufacturing, 110 persons on each story; EQUIPPED with a sprinkler system

and a fire alarm signal system; EXITS: a fire tower; an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use ¼-inch plate glass in the front street windows, the maximum size of glass at first story 9 ft. 2 in. by 16 ft. 2 in., at mezzanine floor 2 ft. 6 in. by 5 ft. 8 in. and at second story 7 ft. 6 in. by 7 ft. 8 in.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the front of the building, first story, on condition that the openings be equipped with approved metal frames and sash, glazed with ¼-inch polished plate glass, and that the requirements of the labor law be complied with in all other respects.

391-28-S.

PETITIONER—L. E. Driver, for New York Dock Company, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—Warehouse No. 57, foot of Montague street, Brooklyn.

APPEARANCES—

For Petitioner: G. A. Eweler.

For Administration: Inspector Maher of fire department.

THE RESOLUTION—

(391-28-S)

WHEREAS, L. E. Driver, chief engineer, for the New York Dock Co., owner, filed, April 24, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Warehouse No. 57, foot of Montague street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 22, 1928, reads:

"Order No. 34289-LD:

"1. Extend the interior stairway, located at the southeast end of building from the 2nd to 1st story and from the third story to roof as per Sec. 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories in height, 51 ft. by 101 ft. 8 in. in area; OCCUPIED: 1st story, storage, 2 persons; 2nd story, repairing bags, 5 persons; 3rd story, repairing bags, 18 persons; EXITS: two interior wooden stairways, the front stairway extending from the first story to roof, the rear (southeast) stairway extending from second to third stories, enclosed in stud partitions covered with ½-inch plaster boards and plastered on both sides, with fireproof doors at openings; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from the third story to roof of one-story garage adjoining at rear, with EGRESS from the termination of the fire escape by means of interior stairway of the adjoining garage; ROOFS of adjoining buildings: 17 ft. lower at east; same level at north and south; and

WHEREAS, the petitioner claims that there are two remote means of exit maintained on the upper stories and three large exit doorways are provided on first story to wharf; furthermore, that the major portion of employees are located on the upper story.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(549-28-S)

WHEREAS, Morganite Brush Co., Inc., for A. H. Mills, owner, filed, June 20, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 3302-3320 Anable avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 30, 1928 (Order No. 25282-LF), reads:

"Relative to Order No. 25282-LF, re fire drill, you are advised that I am in receipt of a report which shows that the building is protected with an automatic sprinkler system but same does not extend to the northwest stairway at 1st, 2nd and 3rd stories but is only extended to the 4th story of the stairway. At the northeast stairway sprinkler protects the 1st and 4th stories and the 2nd and 3rd stories are unprotected.

"In view of the fact that the stairways are not protected with the sprinkler system and in accordance with Sec. 279, subdiv. 3 of the Labor Law, a fire drill is required.";

and

WHEREAS, the building is fireproof, four stories (56 ft.) in height, 60 ft. 2 in. by 200 ft. in area; OCCUPIED as a brush factory: 1st story, 17 persons; 2nd story, 31 persons; 3rd story, 42 persons; 4th story, 33 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, the northwesterly stairway extending from the basement to the fourth story and the northeasterly stairway extending from the basement to the roof, both enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that to provide the required sprinkler heads within the stairways would necessitate cutting holes in reinforced concrete walls and a larger size of piping back of the heads, and that they are the sole occupants of the building; and

WHEREAS, the premises is substantially in its entirety equipped with two approved interior stairways and standpipe system other than alternate hallways on alternate stairs, the hallways being approved factory exits enclosed in fireproof construction.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the number of occupants be limited to the capacity of the interior stairways; that the use and occupancy otherwise shall remain substantially unchanged, and that the requirements of the labor law shall be complied with in all other respects.

457-28-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for B. Aronowitz & Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—247-251 Third avenue, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Deputy Chief Martin..... 5

Negative 0

Absent 0

THE RESOLUTION—

(457-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for B. Aronowitz Co., Inc., owner, filed, May 18, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 247-251 Third avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 11, 1927 (Order No. 24528-LD), reads:

"1. Extend the interior stairway at the north side of the building to the roof, as per Sec. 271 of the Labor Law.

"2. Arrange fire escape on front of building serving as a required means of egress so that same will conform to Sec. 274 of the Labor Law and the rules of the Board of Standards and Appeals, adopted Feb. 23, 1927.

"Defects noted as follows:

"1. Windows on top story not fireproof.

"3. Connecting stairs not 60 degrees.";

and

WHEREAS, the building is non-fireproof, five stories (56 ft. 6 in.) in height, 63 ft. by 70 ft. in area; OCCUPIED: 1st story, store, office and sheet metal shop, 8 persons; 2nd story, carpenter shop, 3 persons; 3rd and 4th stories, vacant at present; 5th story, sheet metal shop, 12 persons; EXITS: an interior steel risers and treads stairway, extending from the first story to top story (with iron ladder to scuttle in roof), enclosed in wood studs with metal lath and 3/4 inch Portland cement mortar on both sides, with fireproof doors at openings; a fire escape on the front of the building having fireproof openings along the course thereof (excepting on the top story), extending from the top story to the second story balcony, with EGRESS from the termination of the fire escape by means of counter-balanced stair to street; the connecting stairs of the fire escape being set at 68 degrees instead of the required 60 degree angle, there being also a substandard fire escape on the rear of the building; ROOFS of adjoining buildings: south side, same level; north side, two stories lower; and

WHEREAS, petitioner contends that a similar order, No. 79660-LD, issued in 1918 by the fire department, was dismissed due to the fact that a modification of a similar order had previously been granted by the labor department; and

WHEREAS, the building is provided with all required interior exits and one additional exterior approved fire escape on the front of the building.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects subdivisions 1 and 3, item 2, of Order No. 24528-LD, on condition that the use and occupancy remain substantially unchanged; that the occupancy shall not exceed the legal capacity of the approved interior exits, and that the building be not increased in height or area, and denied as to item 1.

1303-27-S.

PETITIONER—James W. Byrnes, for Metal Hose and Tube Co., Inc., owner.

SUBJECT—Application for reopening—reconsideration, previously denied—re variation of labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—253-263 Tillary street and 27-32 Park avenue, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

MINUTES

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and granted on condition.

THE VOTE TO REOPEN AND GRANT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin..... 5
Negative 0
Absent 0

THE RESOLUTION—

(1303-27-S)

WHEREAS, James W. Byrnes, for Metal Hose and Tube Co., Inc., owner, filed, December 16, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 253-263 Tillary street and 27-32 Park avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 29, 1927, reads:

"1. Provide two legal means of exit, in 4 story building No. 27 Park Avenue, said exit to be remote from each other as prescribed by section 270 of the Labor Law.

"2. Provide an interior stairway enclosed in partitions of fireproof material, remote from existing stairway as per Section 270 of the Labor Law in 3 story building known as 27-32 Park Avenue.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 122 ft. 10 in. on Park avenue, 203 ft. 2 in. on Ashland place, 128 ft. 3 in. on Tillary street and a depth of 200 ft. 7 in. across the rear, upon which is located the plant of the Metal Hose and Tubing Co. consisting of a group of one, two, three and four-story interconnected, non-fireproof buildings; the two buildings affected by the order being: a four-story (50 ft. 6 in. high) building (at the northwest corner of the plot) 90 ft. 7 in. by 23 ft. in area: OCCUPIED: 1st story, storage, no persons; 2nd story, foundry core room, 12 persons; 3rd story, drafting room and machine shop, 17 persons; 4th story, private quarters (porter), 1 person; EXITS: a fire escape on the south and easterly (rear) wall of the building with fireproof windows along the course thereof, extending from the roof to the open yard at the center of the plot, with EGRESS from yard through a covered driveway leading to Park avenue; there being, also, protected horizontal exits in the east wall leading to adjoining premises to the east; a three-story (39 ft. 6 in. high) building (at the northeast portion of the premises), having a frontage of 99 ft. 10 in. on Park avenue, 102 ft. 10 in. on Ashland place and an average depth of approximately 25 ft.; OCCUPIED: 1st story, mill room, vulcanizing tubing, 14 persons; 2nd story, hose room, 2 persons; 3rd story, loom room and carpenter shop, 20 persons; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape at the southwest corner of the easterly wing extending from the main roof to an iron bridge on the roof of the second story building (to the west) and thence to the open yard at the center of the plot, with EGRESS from yard through a covered driveway to Park avenue; there being, also, horizontal exits, protected by fireproof doors leading to adjoining buildings on same plot; and

WHEREAS, petitioner contends that the premises is protected by a sprinkler system with central office connection; that there are siamese connections on each street front; that there is a fire alarm box on the premises; that there is no inflammable oil or-liquid used in the premises; that the articles manufactured are not of a hazardous nature; that the openings between the various buildings are protected by fireproof doors and requests the acceptance of the existing means of egress; and

WHEREAS, this petition was denied by the board at its meeting, May 1, 1928, and the owner, through his present representative, the Croker National Fire Prevention Engineering Co., requested a reopening of the case and proposed to provide a fire escape on the front of the building.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a party wall 45-degree labor law fire escape be installed on the west end of the Park avenue front, and that the building be not increased in height or area and so long as conditions as to occupancy and use remain substantially unchanged.

APPLIANCES SUBMITTED FOR APPROVAL

427-28-SA.

PETITIONER—American Radiator Company.

SUBJECT—Approval of Arco Metal Pipe.

APPEARANCES—

For Petitioner: M. K. Douglas.

ACTION OF BOARD—Laid over to November 7, 1928, at 2 p. m., on request of petitioner's representative.

443-28-SA.

PETITIONER—William F. Regan, for Kres-Kno Oil Burner Corp., owner.

SUBJECT—Kres-Kno Oil Burner, approval of.

APPEARANCES—

For Petitioner: Francis J. Carneli.

ACTION OF BOARD—Petition placed on reserve calendar, subject to inspection by and report of committee.

515-28-SA.

PETITIONER—Jenkins Bros., owners.

SUBJECT—Jenkins 4-inch swing check valve, approval of.

APPEARANCES—

For Petitioner: Frederick G. Jolly.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition placed on reserve calendar, subject to test and report of fire department.

516-28-SA.

PETITIONER—Jenkins Bros., owners.

SUBJECT—Jenkins 6-inch swing check valve, approval of.

(continued on page 1116)

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, November 23, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) *OVER 275 GALLONS CAPACITY.* Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

[(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored. horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line cent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with of adjoining property, or the nearest building or adja-

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{3}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(c) *Relief valves shall be set to discharge at not more than $1\frac{1}{2}$ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ($1\frac{1}{4}$) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] *used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.*

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner at shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test wall or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, *except as otherwise stated in these rules.*

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) *Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.*

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, *other than domestic installations,* shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied *exclusively* by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied *exclusively* by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman
WILLIAM J. O'GORMAN, Secretary.

Minutes of Regular Meeting, November 7, 1928, 2 p. m.

Corrections.

Rules for the Testing of Wood.

Appliances Approved.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 13, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 20, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(303-28-A)

WHEREAS, Celto Realty Corp., owner, filed, April 3, 1928, an appeal from an order of the fire commissioner, affecting premises 58-72 Wallabout street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 5, 1927 (Order No. 24162-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs, placed within main stairway enclosure.");

and

WHEREAS, the building is non-fireproof, two stories in height, 228 ft. by 100 ft., about 22,000 sq. ft. in area; OCCUPIED as a planing and sawing mill, 3 persons on each story; and

WHEREAS, the appellant claims that the building is easily accessible from two streets; that it would require an unreasonable amount of piping to comply with the order; that there are no water mains in the street in front of the premises; furthermore, the appellant contends that the fire commissioner's order, No. 23162-F, is unenforceable.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the premises shall be equipped throughout with an approved sprinkler system; that the buildings shall be not increased in height or area, and that the occupancy and use shall remain substantially unchanged.

328-28-A.

APPELLANT—James P. Whiskeman, for Vincent Astor, owner.

SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—560-562 Broadway, Manhattan.

APPEARANCES—

For Appellant: James P. Whiskeman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(328-28-A)

WHEREAS, James P. Whiskeman, for Vincent Astor, owner, filed, April 9, 1928, an appeal from an order of

the fire commissioner, affecting premises 560-562 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 2, 1926 (Order No. 4882-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, six stories (88 ft. 6 in.) in height, 39 ft. 8 in. fronting on Broadway, extending 200 ft. through the block, with 54 ft. 9 in. fronting on Crosby street, about 9,400 sq. ft. in area; OCCUPIED: 1st story, store; 2nd and 3rd stories, sale of straw goods; 4th story, blouse cutting; 5th story, shirt mail orders; 6th story, shirt cutting; 10 persons on each story; and

WHEREAS, the appellant claims that the building is only 87 ft. in height at the Broadway end; that the building is equipped with a modern sprinkler system; that there are two openings, 5 ft. in width, protected with fire doors on each side, at each story, except the third story, leading to adjoining building at north; furthermore, the appellant contends that the occupancy is non-hazardous and the exits are adequate; and

WHEREAS, these and the adjoining premises immediately to the north are in the same and single ownership and connected on all but the second and third stories with two horizontal openings on each floor properly protected, the northerly building is equipped with a standpipe system, and the building in question is equipped with a sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension, and that the existing sprinkler, the occupancy and use shall remain substantially unchanged.

228-28-A.

APPELLANT—Daniel J. McParland, for 805 St. Marks Garden Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.
PREMISES AFFECTED—805-821 St. Marks avenue, Brooklyn.

APPEARANCES—

For Appellant: Charles H. Young.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(228-28-A)

WHEREAS, Daniel J. McParland, for 805 St. Marks Avenue Corp., owner, filed, March 14, 1928, an appeal from an order of the fire commissioner, affecting premises 805-821 St. Marks avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 23, 1926 (Order No. 5446-LC), reads:

"5. Install a 4" standpipe line in accordance with the requirements of Sec. 581, Building Code and F. D. Plan 1808-25. Plans and specifications to be filed with and approved by the Fire Department before work of installing standpipe is commenced.";

and

WHEREAS, the building is non-fireproof, six stories (64 ft. 6 in.) in height, 169 ft. by 103 ft., about 12,000 sq. ft. floor area; OCCUPIED as a tenement house; a fuel oil burning system having been installed consisting of a 5,000-gallon tank, buried outside, and connected by piping to oil burners located in the boiler room at cellar story; and

MINUTES

WHEREAS, the appellant claims that the bureau of buildings does not require the installation of standpipes in tenement houses; that the building is subdivided by fire walls into floor areas less than 10,000 sq. ft.; that the building is equipped with fire appliances required by the fire department; furthermore, the appellant contends that the exits are adequate; and

WHEREAS, the structure was erected under approval of plans by the tenement house commissioner and superintendent of buildings and occupied under certificate of occupancy in force by the tenement house commissioner, the order is predicated on the substitution of fuel oil installation; and

WHEREAS, the building exceeds by a slight area the requirements as to standpipe regulations.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the fuel oil burning equipment shall be installed, operated and maintained in strict compliance with the fuel oil rules of the board of standards and appeals, and that the building shall be not increased in height or area.

1217-27-A.

APPELLANT—Reliance Fireproof Door Company, owner.

SUBJECT—Application for reopening—amendment of resolution—re appeal from order of fire commissioner.

PREMISES AFFECTED—19-37 Norman avenue, 65-71 Dobbin street and 173-179 Banker street, Brooklyn.

APPEARANCES—

For Appellant: Jacob C. Rapperport.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle...	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(1217-27-A)

WHEREAS, Reliance Fireproof Door Co., for Jassmir Corp., owner, filed, November 17, 1927, an appeal from an order of the fire commissioner, affecting premises 19-37 Norman avenue, 65-71 Dobbin street and 173-179 Banker street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 1, 1927 (Order No. 28096-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, one story in height, with a frontage of 99 ft. 8 in. on Dobbin street, 125 ft. 5 in. on Banker street and 200 ft. on Norman avenue; OCCUPIED for the manufacture of steel doors; EQUIPPED with an approved sprinkler system; and

WHEREAS, the appellant contends that the building faces on three streets, sets back 10 ft. on the easterly side and 65 ft. on the westerly side from adjoining buildings and that there is no cellar except the 13 ft. by 15 ft. fireproof boiler room with access from the street only and that there is no wood used in the manufacture and that fire buckets are evenly distributed; and

WHEREAS, the structure on this plot known as 19-37 Norman avenue is but one story in height, equipped with a street connection sprinkler system and the industrial operation is limited to the manufacture and assembling of steel doors and steel door frames; and

WHEREAS, this appeal was granted by the board at its

meeting, April 17, 1928, on a certain description of the building, and appellant requests a reopening of the case and a correction of this description, the building having a frontage of 125 ft. 5 in. on Banker street instead of 104 ft. 8 in., which correction was permitted by vote of the board.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension and shall be equipped throughout with an approved one-source wet sprinkler system with street main connection, and granted only as long as conditions as to operation and use remain unchanged.

BUILDING ZONE CASES.

THE RESOLUTION—

(441-28-BZ)

WHEREAS, Corn-Kelly Corp., owner, filed, May 12, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a gasoline service station; premises 501-529 Avenue P, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Avenue P, Ocean Parkway and East 5th street are in a residence use district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 25, 1928 (re App. No. 6029-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3. The erection of a rest room building and the installation of a gasoline service station in a residential district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 250 ft. on Avenue P, 11 ft. 8 in. on East 5th street and 83 ft. 11 in. on Ocean Parkway, upon which it is proposed to erect a small one-story office and rest room and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

460-28-BZ.

APPLICANT — James W. Byrnes, for Reuben Schwartzberg, owner.

SUBJECT—Application (re decision of the supt. of bldgs.) under section 21 of the building zone resolution, to permit in a business district the change of occupancy of an existing garage for the storage of five (5) motor vehicles to a motor vehicle repair shop.

MINUTES

THE RESOLUTION—

(460-28-BZ)

WHEREAS, James W. Byrnes, for Reuben Schwartzberg, owner, filed, May 18, 1928, an application, under the building zone resolution, to permit in a business district the change of occupancy of an existing garage for the storage of five (5) motor vehicles to a motor vehicle repair shop; premises 1073 Willoughby avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Willoughby avenue, Starr street, Central avenue and Wilson avenue are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 3, 1928, reads:

"Proposition as to change in occupancy of a five car garage in a business district to an automobile repair shop not permitted under Building Zone Resolution, Art. 2, Section 4, Par. 29, and in conjunction with Sec. 6a. Therefore application denied for proposed change to a prohibited use in a business district."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 21 ft. 4 in. and a depth of 50 ft.; to be occupied as a motor vehicle repair shop; and

WHEREAS, the premises are now occupied by a five-car garage under permit now in force; and

WHEREAS, the applicant proposes only such minor repair work incidental to the conduct and operation of a garage.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the repair work conducted on these premises shall be restricted to that of manual operation; that there shall be no open forges, furnaces or machinery, other than a one-half horse power electric drill, and that all permits shall be obtained within three months and any work involved thereby shall be completed within six months from the date of this action.

435-28-BZ.

APPLICANT—Edward P. Doyle, James P. Walsh, owner and for Pancliff Holding Corp., lessee. (63 year lease).

SUBJECT—Application (re decision of the supt. of bldgs.) under sections 21 and 7c of the building zone resolution, to permit in a residence district extending from a business district the alteration and conversion of a dwelling into a store and dwelling.

PREMISES AFFECTED—141 West 69th street, Manhattan.

APPEARANCES—

For Applicant: Edward P. Doyle.

For Opposition: Joseph L. Morse.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle...	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(435-28-BZ)

WHEREAS, Edward P. Doyle, for James P. Walsh, owner, filed, May 9, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the alteration and conversion of a dwelling into a store and a dwelling; premises 141 West 69th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district; West 69th street, from a point 100 ft. east of Broadway to a point 100 ft. west of Columbus avenue, is in a residence district, and Columbus avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 27, 1928 (re App. No. 2034-1927), reads:

"No. 12. Business in a residence district unlawful.

Art. 2, Sec. 3, Building Zone Resolution. Reconsideration denied."

and

WHEREAS, the building is of non-fireproof construction, five stories in height, with a frontage of 17 ft. and a depth of 100 ft. 5 in.; to be occupied as a store with dwellings above; approximately three-fourths of the rear portion of the building is in the residence district and the remaining front portion is in the business district; it is proposed to maintain the store (restaurant) on the first story of the building and to use the upper stories as non-housekeeping apartments; and

WHEREAS, the board is empowered under the provisions of section 7, subdivision c, to grant a variation under these circumstances; and

WHEREAS, the board deems that it would be a hardship under section 21 of the building zone resolution to deny the application.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only as far as it affects the first story, street grade, for the use and conduct of any retail business, *on condition* that there shall be no manufacturing of any nature or description conducted on the premises and that the entire premises above the first story shall be restricted to conforming dwelling occupancy; that there shall be no advertising signs hung or displayed, other than flat wall signs or fixed lettering on the show windows, which shall be limited to the first story; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

231-28-BZ.

APPLICANT—Daniel Campbell, Jr., for James Macbeth, owner.

SUBJECT—Application (re decision of the supt of bldgs.) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

MINUTES

premises 97-44 Sutphin boulevard, north side of Liberty avenue, from 146th street to Sutphin boulevard, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 7, 1928, after dues notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sutphin boulevard, Liberty avenue and 146th street are in business and unrestricted districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 25, 1928 (re N. B. 558-28), reads:

"The erection of a gasoline station within a BUSINESS DISTRICT is prohibited by the Zone Law.";

and
WHEREAS, it is proposed to erect a frame office, 16 ft. by 20 ft., bury eleven 550-gallon tanks, erect eleven pumps and two safety lifts for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the application has been made under the principle of section 7, subdivision g; and

WHEREAS, the property embraces a triangular plot lying in the center of three public highways; and

WHEREAS, the application is supported by more than 96 per cent of the property owners deemed affected within the area fixed by the board.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use, operation and conduct of the premises as a gasoline service station shall be restricted to and confined within the property lines; that there shall be a concrete curbing not less than 12 inches in height above grade installed on the building line on all street fronts; that the vehicular entrances, not more than two of which shall be placed on Sutphin boulevard, not more than two on 146th street and not more than two on Liberty avenue, shall be restricted to a width not exceeding 10 ft.; that there shall be incorporated at the triangle formed by the intersection of 146th street and Sutphin boulevard a concrete platform not less than 12 inches in height for a distance not less than 25 ft. southeasterly from the intersection; that the proposed building for the accommodation and service of operators and patrons shall not exceed a height of one story and shall be finished with white enameled brick with dark brick trim, Spanish type tile or variegated slate roof; that any advertising displayed shall be restricted to the illuminated glass globes on the gasoline pump and flat wall signs on proposed building, and that all permits shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

APPLICANT—William F. Doyle, for Hyman Chipkin and Myer Chipkin, owners.

SUBJECT—Application for reopening—modification of resolution—re application (decision of the superintendent of buildings) under sections 6, 7, a, b, e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of an extension to a motor vehicle repair shop, also the change of occupancy from a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED — 796-804 Park avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative:— Chairman Walsh, Commissioners Connell, Holland and Guilfoyle... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(159-28-BZ)

WHEREAS, William F. Doyle, for Hyman Chipkin and Meyer Chipkin, owners, filed, February 24, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of an extension to a motor vehicle repair shop, also the change of occupancy from a stable for more than five horses to a garage for the storage of more than five motor vehicles; premises 796-804 Park avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 25, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in a business district; Throop avenue is in a business district, and Floyd street is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered February 24, 1928 (re Plan No. 327-1928), reads:

"1. Garage for more than five cars and repair shop may not be extended being situated in a business district. Sec. 6, Building Zone Resolution.";

and

WHEREAS, the decision of the superintendent of buildings, rendered October 29, 1928 (App. No. 18049-28), reads:

"The following objections have been filed by the examiners:

"Public garage for more than five cars in a business district is contrary to the Building Zone Resolution, Art. II, 4 (15) and is hereby denied.";

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 25 ft. and a depth of 100 ft.; to be occupied as an auto repair shop for the purpose of conducting a garage business within a business district; and

WHEREAS, the board is authorized, under section 7, subdivision e, of the rules of exception of the building zone resolution, and the application is supported by documentary proof that the appeal comes within the purview of this rule of exception; and

WHEREAS, this application was originally based on decision of the fire commissioner; and

WHEREAS, the applicant has since filed the objection of the bureau of buildings, which objection is incorporated herein.

Resolved, that the board of standards and appeals does hereby *affirm* its action of October 25, 1928, so far as use and occupancy are concerned, and does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the height of the building shall not exceed a mean average height of 26 ft. above grade, without rear yard; that the rear and gable walls shall be unpierced throughout their entire height and length; that any ramp installed shall set back from the building line not less than 10 ft.; that the front elevation shall be finished with light-colored face brick, architectural terra cotta or natural stone trim; that any gasoline storage equipment shall be installed approximately in the center of the building at the street front; that there shall be no portable gasoline pumps maintained or operated on the premises; the vehicular openings shall be limited to a width not exceeding 9 ft. in the clear; that there shall be but one sign permitted, a projecting electric sign, indicating the name and title of the business conducted on the premises; there shall be no other advertising signs or display permitted; that any skylights installed shall be glazed with plain glass, having wire guards

MINUTES

above and below; that the building shall be erected in strict accordance with the requirements of the building code in all respects; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

1126-27-BZ.

APPLICANT—Edward Hoffman, for Pauline Brickman, owner.

SUBJECT—Application for reopening—ext. of time to produce permits—re application (decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—1781 Hilder avenue, The Bronx.

APPEARANCES—

For Applicant: Murray E. Baron.

For Opposition: None.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1126-27-BZ)

WHEREAS, Edward Hoffman, for Pauline Brickman, owner, filed, October 20, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1781 Hilder avenue, north side of Hilder avenue, intersection of Pelham Parkway, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 24, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hilder avenue is in a business district, Pelham Parkway North is in a business district, Pelham Parkway, north side, to west of plot in question, is in an unrestricted district, and Pelham Parkway, south side, is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 9, 1928, reads:

"1. Erection and maintenance of gasoline selling station in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 24.76 ft. on Hilder avenue and 125.08 ft. on Pelham Parkway, upon which it is proposed to erect a one-story office building, 12 ft. by 20 ft. in area, and to install four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the plot involved in this appeal is of triangular formation, backing up to a designated unrestricted use district and directly opposite, on the highway, an unrestricted district; and

WHEREAS, the applicant has filed owners' consents of 33 parcels of property out of 42 parcels affected by this application on the same street front; and

WHEREAS, the board feels this is a justifiable adjustment, supported by a majority of consents of property owners of interest, materially affected; and

WHEREAS, this application was granted by the board at its meeting, April 24, 1928, on certain conditions, and applicant requested a modification of the time limit.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be a brick wall, not less than 12 ft. in height,

erected on the northerly and easterly boundary lines of the property, faced on the interior of the premises with light-color enamel face brick, the walls coped with natural stone or architectural terra cotta; that no gasoline pump shall be erected within 10 ft. of the building line on the Pelham Parkway frontage; that there shall be but two vehicular entrances, one at the extreme easterly end of the property line of the highway frontage and one at the extreme westerly end of the property on the highway frontage; that these driveway entrances shall not exceed a width of 10 ft.; that a concrete curbing not less than 18 in. in height above grade and 12 in. in depth shall be erected on the building line, fronting the entire property; that there shall be no automobile crumple or greasing racks, pits or frames erected, maintained or operated on the premises; that any signs or advertising display on the premises shall be restricted to the advertising on the illuminated glass globes of the gasoline pumps; that there shall be not more than one building erected on the premises, not exceeding an area of 12 ft. by 20 ft., the exterior of which shall be finished with light-color enamel brick; that the roof shall be a hip roof covered with variegated slate or roof tile of Spanish type; that the use and conduct of this building shall be restricted to the accommodation and the shelter of the patrons and operators using the premises; that there shall be no signs displayed on this building other than the lettering restricted to the plate glass windows of this front, and that any permits required shall be obtained within three months and any work involved thereby shall be completed within six months from the date of this action—November 7, 1928.

AREAS FIXED.

(814-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 2-8 Bushwick avenue and 796-802 Metropolitan avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Metropolitan avenue from a point 200 ft. east of Bushwick avenue to a point 400 ft. west of premises in question; both sides of Bushwick avenue from Conselyea street to a point 400 ft. south of premises in question; both sides of Maspeth avenue from Humboldt street to a point 100 ft. east of Bushwick avenue; the west side of Humboldt street from Metropolitan avenue to a point 100 ft. north of Metropolitan avenue, also the east side of Humboldt street from Metropolitan avenue to a point 115 ft. south of Metropolitan avenue.

(826-28-BZ)

The chairman presented and read a communication from James S. Minogue, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises 256-264 Willow Brook road and 1-9 Home place, northwest corner, Borough of Richmond.

The following area was approved by the board:

Both sides of Willow Brook road from a point 200 ft. south of Tysen (Waters) avenue to a point 400 ft. north of premises in question; also both sides of Home place and Tysen (Waters) avenue from a point 200 ft. east of Willow Brook road to Tuttle street.

(827-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of a business building; premises 9420-9428 Kings Highway 1079-1085 Lenox road and 338-344 East 95th street, Borough of Brooklyn.

MINUTES

The following area was approved by the board:

Both sides of Kings Highway and also Lenox road from a point 200 ft. east of East 95th street to a point 400 ft. west of premises in question; both sides of East 95th street from a point 200 ft. south of Lenox road to a point 400 ft. north of premises in question; also the west side of East 94th street from a point 100 ft. south of Kings Highway to a point 100 ft. north of Kings Highway.

(830-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of a

business building; premises 9002-9008 Kings Highway and 975-981 Newport street, northeast corner, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Kings Highway from a point 100 ft. south of Linden avenue to a point 400 ft. north of premises in question; both sides of Remsen avenue from a point 200 ft. west of Kings Highway to a point 200 ft. east of Kings Highway; both sides of Linden boulevard from East 58th street to a point 200 ft. east of Newport street; both sides of Newport street from Kings Highway to a point 400 ft. northeast of premises in question.

THE RESOLUTION—

(1073-27-S)

WHEREAS, Charles P. Cannella, for Giuseppe Guletta, owner, filed, October 4, 1927, a petition for a variation from the requirements of the labor law, as cited in memorandum of inspection by department of health, affecting premises 211 Himrod street, Borough of Brooklyn; and

WHEREAS, this case was denied by the board at the meeting held on March 16, 1928, and reopened by the vote of the board on October 16, 1928; and

WHEREAS, the memorandum by health department, dated August 9, 1927, reads:

"At a meeting of the Board of Health of the Department of Health of The City of New York, held August 9, 1927, your application for a Sanitary Certificate for a cellar bakery, at 211 Himrod Street, in the Borough of Brooklyn, was denied."

and

WHEREAS, the building is frame, three stories and cellar in height, 25 ft. by 50 ft. in area; OCCUPIED: cellar, bakery, 3 persons; 1st story, store and dwelling; upper stories, dwellings; and

WHEREAS, the height of the cellar is 7 ft. 4 in., the ceiling being at curb level and the means of ventilation of the cellar being one window 3 ft. by 6 ft. 6 in. in area, opening on the rear areaway, and two windows, each 2 ft. 6 in. by 4 ft. in area at the front of the building and below the show window; and

WHEREAS, the petitioner contends that the walls of the bakery are covered with one-inch plaster, the ceiling is covered with ½-inch plaster boards and the floor is constructed of concrete; that the building was erected in 1892 and has been occupied as a cellar bakery since that time; and that the present owner purchased the building in 1927 on the grounds that a bakery shop was in existence, and that hardship would result if not permitted to use the premises as a cellar bakery; and

WHEREAS, petitioner filed letter from the tenement house department stating that their records show there was a cellar bakery in the premises in 1903 and has filed a certificate of occupancy from the superintendent of buildings dated May 25, 1928, indicating that a cellar bakery was permitted; and

WHEREAS, the petitioner has submitted a certificate for occupancy and use as a bakery by the tenement house department as of 1903, at the time of the erection of the premises; and

WHEREAS, the superintendent of buildings subsequently confirms the use and occupancy by securing of certificate of occupancy.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the certificate of exemption as required by the labor law, *on condition* that all rules and regulations of the sanitary code and requirements of the health department be complied with in all other respects, and all permits and requirements be complied with within sixty days.

551-28-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Goodwin & Goodwin, Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—880-890 Columbus avenue, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(551-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Chemical National Bank, trustee, owner, filed, June 21, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 880-890 Columbus avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 27, 1927 (Order No. 30506-LD), reads:

"1. Provide an additional means of egress from each floor of the building remote from the interior stairway, as per Sec. 271 of the Labor Law.

"2. Enclose the interior stairway serving as a required means of egress in partitions of fire resisting material extending from floor to ceiling at 1st story, as per rules of the Board of Standards and Appeals, adopted Feb. 23, 1927."

and

WHEREAS, the building, divided into two sections by a fore and aft brick wall, with openings therein on the second story, is non-fireproof, three stories and basement in height, 151 ft. 10 in. by 109 ft., irregular, in area; OCCUPIED: basement, bowling alley and storage, 5 persons; 1st story, stores, 30 persons; 2nd story, offices, furniture show room, sign painter and manufacture of artificial flowers, 19 persons; 3rd story, photographic studio, 2 persons; EXITS: an interior wooden stairway, extending from the first to third story, enclosed on the first story in lath and plaster partitions and in wood board partitions above, with wood and also fireproof doors at openings; there being, also, at the rear of the southerly section of the premises an accommodation stairway leading from the second to first story; a fire escape on the northerly front of the building, having fireproof openings along the course thereof, extending from the roof of the second story to a balcony at the second story level with counterbalanced stair to street; ROOFS of adjoining buildings: to south, one story lower; to west, three stories higher; and

WHEREAS, petitioner states that item No. 1 refers to the second and third stories and contends that there are adequate exits from these stories, and as to item No. 2 contends that this order was based on the fact that the entire premises was considered one building and that there is a restaurant on the first story; petitioner contends that the restaurant is on the opposite side (from the stairs) of the fire wall and requests the acceptance of the existing means of egress; and

WHEREAS, item No. 1 of the order relates exclusively to the third story structure of minor dimensions in comparison with the main structure; the third story opens on the roof of the second story.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that there be provided in the northerly gable wall of the third story a doorway in lieu of any existing window opening out to the roof of the second story, with egress therefrom by means of standard labor law fire escape on the 104th street front, and *granted*, as to item No. 2, in that the section of the premises referred to in the order is separated from the remainder of the structure by an unpierced wall of approved masonry on the first story, so long as conditions as to occupancy and use remain substantially unchanged and the building be not increased as to height or area.

563-28-S.

PETITIONER—Curtis W. Shields, for E. Kronman, Inc., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—211 West 19th street, Manhattan.

APPEARANCES—

For Petitioner: Curtis W. Shields.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(563-28-S)

WHEREAS, Curtis W. Shields, vice-president of E. Kronman, Inc., lessee, filed, June 22, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 211 West 19th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 17, 1928, reads:

"Order No. 35619-LD:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the Rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following:
"No fireproof passageway from termination to street.
"No stairway to roof.";

and
WHEREAS, the building is non-fireproof, five stories (75 ft.) in height, 56 ft. by 96 ft. in area; OCCUPIED: 1st story, store, 9 persons; 2nd story, manufacture of sheet metal goods, 3 persons; 3rd story, manufacturing sheet metal goods, 10 persons; 4th story, dyers, 6 persons; 5th story, manufacture of leather goods, 10 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in hollow tile partitions with kalamein doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the fifth story balcony (with gooseneck ladder to roof) to an iron platform leading to and at the yard level of the premises on the rear, with EGRESS from the termination of the fire escape by means of ladder leading to fire escape on building on the rear and, also, through passageway (at first story level) in building at rear, leading to West 20th street; ROOFS of adjoining buildings: to east, seven stories higher; to west, two stories lower; and

WHEREAS, petitioner contends, as to item "C," that there is no egress from the roof of the building in question and requests the acceptance of the gooseneck ladder in lieu of the required stairway to roof, and as to item "B," requests the acceptance of the existing means of egress from the termination of the fire escape; and

WHEREAS, there is no safe egress from the roof.
Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear fire escape and stairway to the roof, on condition that there shall be maintained at the termination of the rear fire escape an iron balcony with connecting iron platform therefrom to the yard of the premises directly to the rear of 19th street, with egress from the yard of the said premises to the rear, through open passageway directly to the street;

the extension fire escape at the termination or yard level to be not less than 2 ft. in width, opening 2 ft. wide to be maintained free and clear without a door or other encumbrance, and further granted on condition that a gooseneck ladder be provided from the top story balcony fire escape to the roof, so long as conditions as to occupancy and use remain unchanged and the building be not increased in height or area.

81-27-S.

PETITIONER—William F. Doyle, substituted for Thomas B. Leahy, for Birdco Realty Corp., owner.

SUBJECT—Application for reopening—reconsideration—re variation of labor law as cited in a decision of the superintendent of buildings.

PREMISES AFFECTED—48-56 West 48th street, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(81-27-S)

WHEREAS, Thomas B. Leahy, for Birdco Realty Corp., owner, filed, January 25, 1927, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 48-56 West 48th street, Borough of Manhattan; and
WHEREAS, the decision of the superintendent of buildings, rendered January 24, 1927, reads:

"1. Building is designed for 60 lbs. floor loads. 120 lbs. floor load required for factory use.
"2. Egress from interior stairways must be through a fireproof passageway direct to street.
"3. Area of glass in exterior windows must not exceed 720 sq. in. and said windows must be provided with self-closing devices.";

and
WHEREAS, the building is sixteen stories and mezzanine in height, 95 ft. by 100 ft. 5 in. in area; OCCUPIED as certified in Certificate of Occupancy No. 10866-1926: cellar, storage, 39 persons; 1st story, stores; 75 persons; mezzanine, offices, 48 persons; 2nd to 16th stories, offices, 75 persons per story; it is proposed to maintain on the 12th, 13th and 16th stories several persons mending and cleaning watches in conjunction with jewelry trade occupying building; the means of EGRESS consisting of two interior fireproof stairways, one stairway extending from the roof to the mezzanine floor with fireproof passageway along the mezzanine to street, the other stairway extending from the roof to the first story with egress from the termination through 12 ft. 6 in. wide corridor in the first story to street, there being plate glass windows opening into this corridor approximately 594 sq. in. in area with panels of leaded colored glass above; windows on the rear and side of the building are glazed with wire glass 806 sq. in. in area; there are show windows in the first story 6 ft. by 5 ft. 6 in.; the upper windows in the front are 7 sq. ft. in area; and

WHEREAS, since the erection of these premises the building has been occupied principally by the jewelry trade, employing one or two craftsmen in the conduct of work incidental to the sale and exchange of gems and the adjustment of watch works to watch cases; and

WHEREAS, under date of November 7, 1928, the board granted permission to incorporate into this petition the order of the fire commissioner, dated June 26, 1927 (Order No. 23728-LD), which reads:

MINUTES

"1. Discontinue the use of the above premises for factory purposes. * * *

"Among the defects noted are the following:

"(a) Doors to both stairways are only 40" wide.

"(b) Interior stairway at first to cellar stories not enclosed in fireproof material.

"(c) Doors to corridors, all stories, open inwardly.

"(d) Combustible partitions on all stories.";

and

WHEREAS, this order of the fire commissioner antedates the action of the board of October 2, 1928.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, reaffirming its action of October 2, 1928, and that the petition be and it hereby is granted, for a temporary period pending the expiration of the existing leases conducting such business, not to extend beyond 1931, on condition that the alleged manufacturing work extending throughout these premises, in small numbers, on either floor shall be restricted exclusively to the craftsmanship of the jewelry trade, such as setting and resetting of jewels and adjustment of watch works to watch cases; that the floors shall be posted not exceeding the present load, namely 60 pounds, and granted so long as the requirements of the certificate of occupancy as issued by the superintendent of buildings at the time of its completion shall be maintained.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, October 23, 1928, as they appeared in Bulletin No. 44, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(417-28-A)

WHEREAS, Buchman & Kahn, for Courtlef Realty Corp., owner, filed, May 2, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 263-281 Seventh avenue, 165-173 West 25th street and 158-162 West 26th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 4, 1928 (N. B. 540-1927), reads:

"20. Omission of elevator partition is unlawful. Sec. 373, subdivision 13.";

and

* Correction—Words "decision of superintendent of buildings" substituted for words "order of fire commissioner" in line 25.

WHEREAS, the building is fireproof, twenty-six stories and pent house in height, 197 ft. 6 in. by 111 ft. 4 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, show-rooms and 25 per cent manufacturing, 280 persons on each story; and

WHEREAS, appellant proposes to eliminate the partitions between elevators No. 10 and 11 (as shown upon filed plans) on all floors, thus placing three elevators in one shaft; and

WHEREAS, appellant requests the acceptance of the proposed conditions, contending that if required to place Elevator No. 10 in a separate shaft, great hardship would result should this elevator become disabled while carrying passengers.

Resolved, that the decision of the superintendent of buildings be and it hereby is modified, and that the appeal be and it hereby is granted, only so far as it affects one shaftway, the southeasterly shaft, on condition that not more than three cars shall be installed in this shaft and that the remaining four shafts shall be restricted to not more than two cars each, and that the elevator equipment shall be installed in accordance with the rules in all other respects.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

MINUTES

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday afternoon, October 16, 1928, as they appeared in Bulletin No. 43, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(512-28-S)

WHEREAS, Samuel Rosenblum, for Imperial Metal Manufacturing Corp., owner, filed, June 5, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 3801-3809 Queens boulevard, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 8, 1928 (Order No. 33727-LD), reads:

"1. Provide an additional means of exit remote from present exit, as per Section 270 of the Labor Law.

"2. Extend stairway enclosure 3' above the roof, as per Section 270 of the Labor Law.";

and
WHEREAS, the building is non-fireproof, one story and mezzanine in height, 100 ft. by 200 ft. in area; OCCUPIED

* Correction—Word "fireproof" changed to "non-fireproof" in line 15 of resolution.

for the manufacture of metal bottle caps on the first story, 75 persons; office on the mezzanine floor, 4 persons; the means of EGRESS consisting of an interior stairway, extending from the mezzanine story to the street, enclosed in 4-inch terra cotta partitions with fireproof self-closing doors to the openings; premises being equipped with automatic sprinkler system and standpipe system; and

WHEREAS, petitioner contends that the mezzanine floor is used for office purposes only; that the building was erected and plans approved by the superintendent of buildings, Plan No. 20511, approved December 17, 1926, and that the building was completed in 1927, and that the exits were accepted by the bureau of buildings under this approved plan; that the building is protected by an automatic sprinkler.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition, as to Items 1 and 2 of Order No. 33727-LD, be and it hereby is *granted*, only so far as it affects the mezzanine floor, *on condition* that the mezzanine floor shall be used for offices by the company occupying the entire premises and so long as the building be not increased in height or area and that the requirements of the labor law be complied with in all other respects, and so long as present conditions remain substantially unchanged.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be

laid side by side across the top of a gas crucible furnace with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

BOARD OF STANDARDS AND APPEALS.

Administrative Applications.

- 1029-27-A—39 Fifth avenue, Manhattan.
- 1030-27-A—13-16 Central Park West, Manhattan.
- 1031-27-A—20-28 West 72nd street, Manhattan.
- 1032-27-A—242-248 West 76th street, Manhattan.

Appliances Submitted for Approval.

- 610-22-SA—Crocker Gas Valve, approval of.
- 799-22-SA—Kennell Gas Cut-Off Valve, approval of.
- 1173-22-SA—Anti-Syphon Valve, approval of.
- 1230-22-SA—Thermostats for Automatic Fire Alarm Systems, approval of.
- 1249-22-SA—Coen Oil Burner, approval of.
- 1391-22-SA—Dempsey High & Low Pressure Fuel Oil Burner, approval of.
- 57-23-SA—Collin Patent Automatic Gas Cut-Off Valve, approval of.
- 124-23-SA—Master Gas Shut-Off Valve, approval of.
- 125-23-SA—Packless Gas Shut-Off Valve, approval of.
- 127-23-SA—S. & K. Gas Shut-Off Valve, approval of.
- 232-23-SA—Manual and Thermal Gas Cut-Off Valve, approval of.
- 275-23-SA—Wm. E. Toelle Manual & Automatic Gas Shut-Off Valve, approval of.
- 279-23-SA—Heil Standard 200 Gal. Truck Tank, approval of.
- 297-23-SA—"Automatic" Deluge Valve, approval of.
- 443-23-SA—Automatic Gas Shut-Off, approval of.
- 525-23-SA—Tilman-White Gas Cut-Off Valve, approval of.
- 952-23-SA—Automatic Gas Cut-Off, approval of (Brooklyn Co.)
- 959-23-SA—Hydro Carbon Oil Burner, approval of.
- 1246-23-SA—Ludlow Gas Cut-Off Valve, approval of.
- 1346-23-SA—Heatiator Oil Burner, approval of.
- 1550-23-SA—Apex Gas Cut-Off Valve, approval of.
- 492-24-SA—Holtzer-Cabot Type "C" Fire Alarm Box, approval of.
- 755-24-SA—Wills Automatic Gas Shut-Off Valve, approval of.
- 907-24-SA—Dempsey Domestic Burner and Fuel Oil Pump, approval of.
- 1016-24-SA—Milnes Oil Burner, approval of.
- 1142-24-SA—Decker Oxohydrogen Oil Burner, approval of.
- 1146-24-SA—Salvo Fire Extinguisher, approval of.
- 1359-24-SA—Oliver Oil Gas Burner No. 30-A, approval of.
- 1500-24-SA—Smolensky Check Valve, approval of.
- 558-25-SA—Globe Dry Pipe Valve Accelerator, approval of.
- 985-25-SA—Amdyco Foam Fire Extinguisher, approval of.
- 1263-25-SA—Phister Carbon Tetrachloride Fire Extinguisher, approval of.
- 1264-25-SA—Koerting Gear Pump, approval of.
- 1346-25-SA—Palmer Gravity Lock, approval of.
- 167-26-SA—Johnson Automatic Oil Burner, approval of.
- 353-26-SA—Signal Weatherproof Bells, approval of.
- 364-26-SA—Kork-n-Seal, approval of.
- 397-26-SA—Worthington Triplex Vertical Power Pump, approval of.

- 484-26-SA—Protectoseal Cover, approval of.
 - 542-26-SA—Lassen Quintuple Fuel Oil Burner, approval of.
 - 569-26-SA—Trowbridge & Schellens Oil Burner, approval of.
 - 751-26-SA—Jones Oil Burner, approval of.
 - 781-26-SA—Solenoid Type Single Stroke Bells, approval of.
 - 890-26-SA—Pyrolithic Floor and Ceiling Construction, approval of.
 - 52-27-SA—M-D Rotary Fuel Oil Pump, approval of.
 - 110-27-SA—Wilbur Extinguisher, approval of.
 - 115-27-SA—Even-Heat Oil Burner, approval of.
 - 128-27-SA—"GRD" Billow Fuel Oil Atomizer, approval of.
 - 129-27-SA—Stroud-In-The-Door Oil Burner, approval of.
 - 187-27-SA—Keenan Gas Shut-Off Valve, approval of.
 - 458-27-SA—Deming Double Acting Oscillating Force Pump, approval of.
 - 527-27-SA—Gas-O-Matic Oil Burner Unit, approval of.
 - 537-27-SA—Leader Gas Shut-Off Valve, approval of.
 - 618-27-SA—Stuhler Oil Burner, approval of.
 - 630-27-SA—Faraday Pre-Signal Fire Alarm Control Panel with 110 Volt Trouble Bell, approval of.
 - 810-27-SA—Bowser Fig. No. 718 Fuel Oil Pump, approval of.
 - 814-27-SA—Elkhart Flush Type Siamese, approval of.
 - 955-27-SA—Cook's Automatic Oil Burner, approval of.
 - 977-27-SA—Romec Rotary Pump, approval of.
 - 1034-27-SA—The Improved Lawrence May Oil Burner, approval of.
 - 1071-27-SA—New Process Oil Burner, approval of.
 - 1162-27-SA—Allen's Recessed Fire Department Standpipe Siamese Connection, approval of.
 - 1176-27-SA—Ballard Junior Oil Burner, Type C, approval of.
 - 1259-27-SA—Pioneer Automatic Oil Burner, approval of.
 - 1307-27-SA—A B C Angle Hose Valve, approval of.
 - 187-28-SA—Faraday Model Single Stroke Solenoid 110 Volt D.C. Fire Alarm Gong, approval of.
 - 188-28-SA—Faraday Waterflo Alarm Panel, approval of.
 - 213-28-SA—Ford Automatic Pressure Regulating Valve, approval of.
 - 304-28-SA—Croker 2½-Inch Angle Hose Valve, approval of.
 - 404-28-SA—Signal Engineering Sprinkler Alarm Panel, approval of.
 - 443-28-SA—Kres-Kno Oil Burner, approval of.
 - 511-28-SA—Genuine Detroit, Type "S," Anti-Syphon Valve, approval of.
 - 515-28-SA—Jenkins 4 in. Swing Check Valve, approval of.
 - 516-28-SA—Jenkins 6 in. Swing Check Valve, approval of.
 - 517-28-SA—Jenkins 8 in. Swing Check Valve, approval of.
 - 584-28-SA—Noiseless Nokol Rotary Type Burner, approval of.
 - 697-28-SA—Acme Fire Alarm Signal System, approval of.
- Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary.

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, November 13, 1928, 10 a. m.

Minutes of Regular Meeting, November 13, 1928, 2 p. m.

Fuel Oil Pumps Approved.

Fire Retarding Rules.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 20, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 27, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR TUESDAY, NOVEMBER 20, 1928, 2 P. M.

Building Zone Cases.

203-28-BZ.

APPLICANT—William Koppe, for Tremune Realty Corp., owner.

PREMISES—1801 University avenue, northwest corner of Tremont avenue, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the alteration and conversion of occupancy of portion of an apartment building from dwelling to business use (stores).

485-28-BZ.

APPLICANT—Hamill, Weinberg & Munro, substituted for Cohen & Siegel, for Leon Naham, owner.

PREMISES—3561-3567 White Plains road and 670 East 213th street, southwest corner, The Bronx.

APPLICATION, under sections 7e and 21 of the building zone resolution,

TO PERMIT, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

567-28-BZ.

APPLICANT—James W. Byrnes, for John D'Antuono, owner.

PREMISES—969-971 Fourth avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the alteration, extension and change of occupancy of a building from a garage for five (5) motor vehicles to a garage for the storage of more than five (5) motor vehicles.

574-28-BZ.

APPLICANT—John J. Dunnigan, for Edward A. Schill, owner.

PREMISES—1339-1343 Jerome avenue, west side, 470 ft. south of West 170th street, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district, extending from an unrestricted district, the change of occupancy from a garage to a garage, showroom, service station and a motor vehicle repair shop.

589-28-BZ.

APPLICANT—William F. Doyle, for Rita Goldberg, owner.

PREMISES—1014-1024 Brooklyn avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

595-28-BZ.

APPLICANT—William F. Doyle, for Hyrose Building Corp., owner.

THE RESOLUTION—

(475-28-A)

WHEREAS, Van Rensselaer Estates, Inc., owner, filed, May 21, 1928, an appeal from an order of the fire commissioner, affecting premises 212 West 91st street and 2448-2458 Broadway, southeast corner of 91st street and Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 6, 1928 (Order No. 31067-F), reads:

"1. Install an adequate interior electric fire alarm system in accordance with the attached approved layout. Sec. 21, Ch. 12, Code of Ordinances.";

and

WHEREAS, the building is fireproof, fourteen stories in height, 162 ft. 6 in. by 100 ft. 8½ in. in area; OCCUPIED as a hotel: cellar, kitchen, 12 persons; 1st story, dining room and lobby, 35 persons; 38 rooms on each story above; and

WHEREAS, the appellant claims that the building is equipped with a system, installed at the time of the completion of the building in 1923, consisting of the punching of a clock by watchman at 29 station distributed throughout the premises.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

535-28-A.

APPELLANT—John J. Gilmartin, for Brillo Manufacturing Company, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—186-200 Plymouth street and 199-213 Water street, Brooklyn.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(535-28-A)

WHEREAS, John J. Gilmartin, for Brillo Manufacturing Co., Inc., owner, filed, June 12, 1928, an appeal from an order of the fire commissioner, affecting premises 186-200 Plymouth street and 199-213 Water street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 18, 1928, reads:

"Order No. 37442-F:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is fireproof, two stories and mezzanine in height, 116 ft. by 199 ft. (22,000 sq. ft.) in area on the first story and 66 ft. by 199 ft. (12,000 sq. ft.) on second story; OCCUPIED: 1st story, machine room, 50 persons; 2nd story, machine room, 50 persons; mezzanine, offices and machine room, 50 persons; means of EGRESS

consisting of two enclosed fireproof stairways, from the second story to street, one on Water street side and one on Plymouth street side of building; EQUIPPED with a two-source sprinkler system and portable fire extinguishing apparatus; and

WHEREAS, the appellant contends that the stock is of non-inflammable material—metal used in the manufacturing of brillo; and

WHEREAS, the structure is two stories, of mezzanine balcony design, used exclusively for the manufacture of metal product, and the ground floor is subdivided in unequal divisions.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building shall be not increased in height or area; that the manufacturing use remain unchanged, and that the premises shall be equipped throughout with an approved sprinkler system.

518-28-A.

APPELLANT—J. L. Hernon, for Cooper Holding Corporation, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—256-258 West 34th street, Manhattan.

APPEARANCES—

For Appellant: J. L. Hernon.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION—

(518-28-A)

WHEREAS, J. L. Hernon, for Cooper Holding Corp., owner, filed, June 6, 1928, an appeal from an order of the fire commissioner, affecting premises 256-258 West 34th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 26, 1928 (Order No. 36213-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at rear of building or other approved protection as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. 6 in. by 98 ft. 9 in. in area at first story and 25 ft. 6 in. by 87 ft. in area at second story and 25 ft. 6 in. by 50 ft. in area above; OCCUPIED: 1st story, stores, 8 persons; 2nd story, stores, 2 persons; 3rd story, embroidery, 6 persons; 4th story, pocket books and hand embroidery, 8 persons; and

WHEREAS, the appellant claims that there are four windows on each of the third and fourth stories at south side of the building affected by the fire department order; that the windows in the adjoining building at west causing the exposure are fireproof; furthermore, the appellant proposes to erect a fire curtain between roof of the rear extension and the windows in question; and

WHEREAS, the exposure on which the order is predicated is on the gable wall of the adjoining premises to the west, which openings are provided with fireproof equipment.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is

MINUTES

granted, so long as conditions as to the existing exposures remain unchanged, and these premises be not increased in height, area or dimension, and that the occupancy and use remain unchanged.

431-28-A.

APPELLANT—Dodge & Morrison, for Office Realty Corp., owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—5-7 East 42nd street, Manhattan.

APPEARANCES—

For Appellant: Robert B. Morrison, Joseph L. Hernon and Mr. Martin.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(431-28-A)

WHEREAS, Dodge & Morrison, for Office Realty Corp., owners, filed, May 9, 1928, an appeal from an order and decision of the superintendent of buildings, affecting premises 5 and 7 East 42nd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings rendered April 25, 1928 (Alt. App. No. 825-28), reads:

"1. All windows provided for in Violation 1252-1928 must be made fireproof.";

and

WHEREAS, the order of the superintendent of buildings, dated March 21, 1928 (Violation Order No. 1252), reads:

"In that of not providing iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said opening and which are not more than 50' above a neighboring roof at east and west sides of building or other approved protection. Also not providing self-closing fire doors or automatic fire windows at exits to horizontal bridge at the north side of building leading to No. 10 E. 43d Street.

"You are hereby directed to immediately provide such iron shutters and fireproof doors as required by law.";

and

WHEREAS, the building is fireproof, ten stories and pent house in height, 60 ft. by 94 ft. 5 in. in area; OCCUPIED for office purposes; and

WHEREAS, the appellant claims that there are ten windows on each story above the first story at the west side of the building and four windows in the pent house affected by the order of the superintendent of buildings and for which this appeal is made; that all openings at the east and north sides of the building will be made to comply with the order; furthermore, the appellant contends that the building is used solely for offices, having no hazardous occupancy, and is also equipped with a fire alarm system in main hall.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the openings in the westerly court of these premises and the windows on the rear of the premises, other than openings on the course of elevators, stair halls, public corridors or passageways, so long as conditions as to occupancy and use remain unchanged.

433-28-A.

APPELLANT—A. Stanley Miller, Inc., for Claremont National Bank, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—1762-1764 Boston road, southeast corner of East 174th street, The Bronx.

APPEARANCES—

For Appellant: L. P. Halperin.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(433-28-A)

WHEREAS, A. Stanley Miller, Inc., for Claremont National Bank, owner, filed, May 9, 1928, an appeal from an order of the fire commissioner, affecting premises 1762-1764 Boston road, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated April 12, 1928, reads:

"2. Cut off the room or rooms in which the heating apparatus and oil burning device is installed from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than 8 inches for brick, not less than six inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum and not less than 4 inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air, as per Rule 20-C of the Fuel Oil Rules.";

and

WHEREAS, the building is of fireproof construction, one story and mezzanine in height; OCCUPIED as a bank; a fuel oil burning system having been installed consisting of a 1,080-gallon tank, buried under cellar floor, connected by piping to a burner located in the boiler room using grade "B" fuel oil; and

WHEREAS, the appellant claims that it is impossible to cut the boiler roof off from the rest of the building without great inconvenience; furthermore, the appellant proposes to provide two self-closing fireproof doors at furthest point of the corridor, near the ash hoist and exit to street; and

WHEREAS, the fuel oil burning system has been substituted for the coal fuel.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that a fireproof passageway shall be constructed from the boiler room to an areaway at the front of the building with fixed double-rung iron ladder in the areaway, equipped with a counterbalanced sidewalk cover; that the passageway shall be provided with one opening to the stair corridor hall of the premises leading to the first floor, the opening to be equipped with a self-closing fireproof door, and that the fuel oil burning equipment shall be installed in accordance with the rules in all other respects.

THE RESOLUTION—

(217-28-BZ)

WHEREAS, Henry J. Nurick, for Abraham J. and Jacob Bernstein, owners, filed, March 10, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1006-1010 Broadway, northwest corner of Willoughby avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district, Willoughby avenue is in a business and residence district and Ditmars street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 5, 1928 (re Applic. No. 2610-28), reads:

"Proposition for the establishment of a gasoline station in a business district not permitted under the Zone Resolution. Art. 2, Section 4, par. 46.

"Therefore application is denied for a prohibited use in a business district.";

and

WHEREAS, it is proposed to erect a one-story office, 15 ft. by 20 ft., bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal brought under sections 7e and 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

461-28-BZ.

APPLICANT—Edward L. Kelly, for Lewol Realty Corp., owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—533-543 Glenmore avenue and 241-245 Van Sicklen avenue, northeast corner, Brooklyn.

THE RESOLUTION—

(461-28-BZ)

WHEREAS, Edward L. Kelly, for Lewol Realty Corp., owner, filed, May 18, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 533-543 Glenmore avenue and 241-245 Van Sicklen avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Van Sicklen avenue, north of a point 100 ft. north of Glenmore avenue, is in an unrestricted district; Van Sicklen avenue, south of a point 100 ft. north of Glenmore avenue, is in a business district, and Glenmore avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered May 5, 1928 (re Plan No. 1252-28), reads:

"1. The erection of a gasoline service station at this location is contrary to section 4, Building Zone Resolution, as the premises are situated in a business zone.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 50 ft. on Van Sicklen avenue and 100 ft. on Glenmore avenue, upon which it is proposed to erect a small one-story office and accessory store and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(279-28-BZ)

WHEREAS, Egan & Ittelson, for Stephen-Thouret Holding Co., Inc., owner, filed, March 29, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 206-210 West 77th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 77th street, west of a point 100 ft. east of Amsterdam avenue, is in a business district; West 77th street, east of a point 100 ft. east of Amsterdam avenue, is in a residence district; Amsterdam avenue is in a business district, and Broadway is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 19, 1928 (re Applic. No. 64-1928), reads:

"2. Proposed erection of garage for more than 5 motor vehicles located in a business district is contrary to Article 2, Section 4 of the Zoning Resolution.";

and

MINUTES

WHEREAS, the proposed building is to be of fireproof construction, six stories in height, with a frontage of 75 ft. and a depth of 102 ft. 2 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deems that applicant has established his basis of appeal under section 7e, supported by documentary proof of the existence of non-conforming uses and that it would be a hardship within the meaning of section 21 of the building zone resolution to deny the application.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected fireproof throughout; that the front elevation shall be finished with face brick or natural stone with trimming of architectural terra cotta or natural stone; that there shall be but one electric projecting sign permitted, indicating the name and title of the business conducted on the premises; that there shall be no portable gasoline tanks operated outside the premises; that the structure shall be erected otherwise strictly in conformity with the zoning requirements; that the design of the facade shall be submitted to this board for approval before submitting same to the bureau of buildings; that all necessary permits shall be obtained within nine months and the work involved completed within eighteen months from the date of this action.

643-28-BZ.

APPLICANT—John J. Curtin, for Reylex Corporation, lessee ((67-year lease).

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a 1½ times height district and partly in a two times height district the erection and maintenance of the street walls in excess of the height permitted under the building zone resolution.

PREMISES AFFECTED—399-413 Lexington avenue, 139-143 East 42nd street and 130-140 East 43rd street, Manhattan.

THE RESOLUTION—

(643-28-BZ)

WHEREAS, John J. Curtin, for Reylex Corp., owner, filed, July 28, 1928, an application, under the building zone resolution, to permit, partly in a one and one-half times height district and partly in a two times height district, the erection and maintenance of the street walls in excess of the height permitted under the zone resolution; premises 399-413 Lexington avenue, 139-143 East 42nd street and 130-140 East 43rd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that area on the west side of a north and south line, located 100 ft. east of Lexington avenue, is in a two times height district, and area on the east side of above area is in a one and one-half times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 10, 1928 (re N. B. 92-1928), reads:

"Building is of unlawful height on all street fronts. Art. III, Building Zone Resolution.";

and
WHEREAS, the proposed building is to be of fireproof construction, sixty-six stories in height, with a frontage of 200 ft. 10 in. on Lexington avenue, 167 ft. 2½ in. on East 42nd street, 205 ft. on East 43rd street; to be occupied as stores and offices; and

WHEREAS, there exists on the same avenue front directly opposite a building 94 ft. in excess of the allowable height regulations for which additional height is permitted under the zoning regulations in conjunction with other properties involved; and

WHEREAS, it is proposed, for the purpose of architectural adaptation, to design and erect the proposed building in excess of the strict application of the height regulations up to and including the first setback only, the height of the 42nd street corner before the first setback being 181 ft. 7 in. against an allowable 200 ft. height to the first setback; and

WHEREAS, the proposed structure in its entirety foregoes in volume approximately 86,000 cubic feet; and

WHEREAS, the board deems that denial of the application under these conditions would constitute hardship within the meaning of section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure above the height of the first setback, namely 181 ft. 7 in., shall be constructed strictly in accordance with the design and plans filed in this appeal and shall comply with the zoning resolution in all other respects; that the architect shall make a return of the drawings in accordance with this resolution to this board for approval before submitting same to the superintendent of buildings; that all required permits shall be obtained within nine months and the work prosecuted to completion without suspension or unnecessary delay.

361-28-BZ.

APPLICANT—1325 Madison Avenue Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to a business use.

PREMISES AFFECTED—341 Lexington avenue, Manhattan.

APPEARANCES—

For Applicant: Louis Israelson and Alfred J. Talley.

THE RESOLUTION—

(361-28-BZ)

WHEREAS, 1325 Madison Avenue Corp., owner, filed, April 18, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to a business use; premises 341 Lexington avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

MINUTES

November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Lexington avenue is in a residence and business district, East 40th street is in a residence district and East 39th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 9, 1928 (re Alt. Applic. No. 2343-27), reads:

"9. Proposed occupancy for business in a residential district is prohibited by Zoning Resolution, Art. II.";

and
WHEREAS, the existing building is of non-fireproof construction, four stories in height, with a frontage of 20 ft. and a depth of 42 ft. 1/2 in.; to be occupied for business purposes on the first and second stories and for dwellings above; and

WHEREAS, there exists on this same street front between the same intersecting streets several non-conforming uses; and

WHEREAS, the board deems that applicant has substantiated his basis of appeal under section 21 in view of the abutting and surrounding conditions.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations, and that the application be and it hereby is *granted*, only so far as it affects the first and second stories of these premises, *on condition* that the business use shall be restricted to retail mercantile stores or business, the conduct of which is permitted on all days, other than Sundays and legal holidays, with the exception of an apothecary or drug shop; that there shall be no manufacturing use or occupancy permitted on any part of the premises; that any advertising sign or display shall be restricted on the first story to the glass windows of the store front or flat wall panel signs, affixed to the building; that there shall be no sign or advertising display of any nature or description above the first story; that the design of the front elevation shall be restricted to the elevation drawing of record filed in this appeal, and that all permits required shall be obtained within six months and any work involved thereby shall be completed within one year from the date of this action.

THE RESOLUTION—

(369-28-BZ)

WHEREAS, Charles Kreymborg & Son, for Lojo Realty Co., Inc., owner, filed, April 19, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of an apartment house with stores on the first story; premises 110-118 East 157th street and 745-759 Gerard avenue, southwest corner, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

November 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 157th street is in an unrestricted and business district, Gerard avenue is in an unrestricted and residence district and River avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 3, 1928 (re N. B. 218-28), reads:

"1. The proposed extension of store into the residence district is contrary to the provisions of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, six stories in height, with a frontage of 168 ft. and a depth of 105 ft.; to be occupied as an apartment house with stores on the first story, the stores being 100 ft. in the business district and 3 ft. into the residence district; and

WHEREAS, the board deems that applicant has substantiated his basis of appeal brought under sections 7b and 7c of the building zone resolution in that this development embraces the erection of an apartment house with stores on the first story, 100 ft. of which is to be in a business district and 3 ft. to extend into a residence use district; and

WHEREAS, the board is empowered under the rules of exception, sections 7b and 7c, to grant a variation of the building zone resolution under these circumstances.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, only so far as it affects the first story of these premises, restricted to within 103 ft. of 157th street on the westerly side of Gerard avenue, for the use of retail mercantile shops or stores, *on condition* that the southerly gable wall on the first story of the store use of these premises shall be unpierced; that there shall be no entrance from the interior of the stores to the apartment house; that any advertising displayed within the business use area shall be restricted to the plate glass show windows of the store front; that no projecting signs shall be permitted to be hung within the residence use area of the premises; that all permits required shall be obtained within nine months and all work involved thereby completed within eighteen months from the date of this action.

THE RESOLUTION—

(1258-22-BZ)

WHEREAS, Adam Held and Hermina Held, owners, filed, October 25, 1922, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises southeast corner of Astoria avenue and 83rd street, Woodside, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, July 17,

MINUTES

1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Astoria avenue is a business district and 83rd street is a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 4, 1922, in acting on N. B. App. No. 13706-22, reads:

"Public garage for more than five motor vehicles in a business district is prohibited by the Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 90 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 94 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting, July 17, 1923, and applicant requested an extension of time to complete the work which had been suspended and not completed within the time stipulated.

Resolved, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, in view of the consents, *on condition* that all permits necessary for the prosecution of the work be obtained within six months and the structure completed within twelve months from the date of this action—November 13, 1928; that the front elevations of the building on Astoria avenue and 83rd street be finished with face brick and architectural terra cotta or stone trimmings; that no doorway on 83rd street, other than an emergency exit not exceeding three feet eight inches in width, is installed; that the occupancy of the garage be limited to twelve motor vehicles, and that the rear and gable walls be unpierced throughout their entire height and length.

THE RESOLUTION—

(1100-23-BZ)

WHEREAS, J. Edmund Byrne, for General Baking Co., owner, filed, September 19, 1923, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an extension to an existing bakery, part of which extension is to be used as a garage for the storage of more than five motor vehicles; premises 3240-3256 Bronx boulevard, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals at its special meeting, February 29,

1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bronx boulevard and Rosewood street are in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 8, 1923, in acting on Alt. App. No. 431-23, reads:

"1. Garage unlawful, contrary to Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, two stories and basement in height, with a frontage of 194.16 ft. and a depth of 97.9 ft.; it is proposed to erect a two-story non-fireproof extension, 115 ft. by 145 ft. 2 in. in area; to be occupied: 1st story, garage for more than five motor vehicles and wagon storage; 2nd story, bakery and flour storage; and

WHEREAS, the board granted a variation on these premises; and

WHEREAS, the structure was not entirely completed within the time stipulated in the resolution.

Resolved, that the board of appeals does hereby *reaffirm* its variation in the application of the use district regulations of February 29, 1924, of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed addition to existing building shall be erected fireproof, not to exceed one story in height above grade on Barker avenue; that the garage use and occupancy shall be restricted to basement or lower story; that there shall be no openings of any kind on Barker avenue other than windows, the sills of which shall not be less than 5 ft. above grade; that there shall be no vehicular entrance on Rosewood street; all windows shall be equipped with fixed sash, glazed with translucent glass, with not more than one ventilator to each opening; that the front walls on Barker avenue and Rosewood street shall be finished in front brick and architectural terra cotta or stone trimmings; that there shall be no flour storage allowed or maintained in this proposed extension, plans for which are on file in this case.

Resolved, further, that all permits necessary for the prosecution of the work shall be obtained and the building completed within one year from the date of this action.

the board of standards and appeals, at its special meeting, November 18, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East New York avenue, Lefferts avenue and Troy avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 25, 1927 (App. No. 7336-1927), reads:

"Proposition contrary to the Zone Resolution, Art. II, Section 4a, 15.

"The erection of a garage for more than five motor vehicles in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 180 ft. and a depth of 90 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7e and 21 of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, November 18, 1927, on certain conditions, and applicant requested a modification of these conditions as to ventilators.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall be limited in height to a two-story building above grade and shall be constructed fireproof throughout; that the gable walls and rear wall, first story, shall be un-

pierced throughout their entire height and length; that a rear yard shall be provided at the level of the second tier of beams of not less than 10 ft. in depth for the entire width of the property; that the offset in the rear shall be equipped throughout with flat skylights, glazed with wire glass; that wall ventilators rigidly fixed to the rear wall of the second story shall be not less than 8 ft. in length, not more than 10 ft. apart, for the full width of the property; that any windows on the second story rear shall be glazed with translucent wire glass and each sash shall be equipped with not less than one ventilator; that the front elevation shall be finished substantially in accordance with the design filed in this appeal, of suggested gothic design and the material of the front shall be of light glazed architectural terra cotta, other than the plate glass show windows and the window openings of the front, which shall be subdivided substantially in accordance with the design submitted on this appeal; that there shall be no roof sign erected, and any advertising display on the front of the building shall be restricted to flat wall lettering and there shall be no sign on the front of the building other than one fixed electric projecting sign; that any gasoline storage equipment installed shall be located at the front of the building and not less than 40 ft. from the westerly line of the property; that all necessary permits shall be obtained within nine months and the work involved completed within one year from the date of this action.

Adjourned 4.15 p. m.

THE RESOLUTION—

(445-28-S)

WHEREAS, Frank W. Fitzpatrick, for Progressive Cleaners and Dyers, Inc., owner, filed, May 15, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1489 Park avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 10, 1928 (Order No. 2937-LD), reads:

"A recent inspection of violation 2937-LD indicates that item 3—reading:

"Provide a second means of exit from the 2nd story of the two-story portion of building remote from interior stairway as per Section 271 of the Labor Law." has not been complied with."

and

WHEREAS, the building is non-fireproof, four stories in height, 19 ft. by 74 ft. in area on first and second stories and 19 ft. by 50 ft. in area above; OCCUPIED: cellar, dye and boiler room, 1 person; 1st story, store, tumbler room, benzine washroom, 4 persons; 2nd story, tumbler and pressing rooms, 8 persons; 3rd story, assorting, packing rooms, 8 persons; 4th story, pressing room, 5 persons; the means of EGRESS consist of an interior fireproof stairway, extending from the first story to the roof, enclosed in brick partitions with fireproof doors at the openings; a fire escape on the Park avenue front of the four-story section with counterbalanced stairs to street, and fireproof openings along the course of the fire escape, and a fire escape on the two-story section with proposed drop ladder to street; and

WHEREAS, the petitioner contends that the portion of the premises referred to is only two stories in height, occupied by three persons, with a horizontal exit leading into the adjoining portion of the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(592-28-S)

WHEREAS, Samuel Rosenblum, for Skania Realty Co., Inc., owner, filed, July 5, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 238 East 47th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered June 29, 1928, reads:

"Before a certificate of occupancy can be issued on the above premises, the following objections must be removed:

"1. Provide a second means of egress in accordance with Section 273, Labor Law.

"2. Interior stairs must be extended to roof.";

and

WHEREAS, the building is non-fireproof, four stories in height, 23 ft. by 100 ft. 5 in. in area at first story and 23 ft. by 90 ft. 5 in. in area at second story and 23 ft. by 52 ft. in area above; OCCUPIED: 1st story, manufacture of furniture, 20 persons; 2nd story, show rooms, 4 persons; 3rd story, show rooms, 1 person; 4th story, dwelling; EXITS: an interior wooden stairway, extending from the first story to top story, and iron ladder leading to roof scuttle, enclosed in fire-retarding partitions with fireproof doors at openings; rear party wall balconies at third and fourth stories connecting with the building adjoining at west; ROOFS of adjoining buildings: same level at west; 10 ft. higher at east; and

WHEREAS, the petitioner claims that no manufacturing is done above the first story; that there is egress from first story to street through a hallway enclosed in fireproof material; furthermore, the petitioner proposes to provide an exit door in the west wall of first story at rear leading to adjoining yard at west, thence through hall of tenement house direct to the street.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(543-28-S)

WHEREAS, Philip Rhineland, for William V. B. Kip, owner, filed, June 18, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 48-50 West 21st street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, Nos. 36098-LD, 36101-LD, 36096-LD, 36092-LD, 36091-LD and 36102-LD, read:

MINUTES

"Arrange iron bars on windows on south side of building so as to be readily movable from both sides in such manner as to afford the free and unobstructed use of such windows for purposes of egress as per Section 272 of the Labor Law."

and

WHEREAS, the building is fireproof, twelve stories in height, 50 ft. by 100 ft. in area on the first story and 50 ft. by 82 ft. in area above; OCCUPIED: cellar, office furniture; 1st story, woolen and cotton goods, 11 persons; 2nd story, manufacture of rayon yarns, 14 persons; 3rd story, knitted goods manufacturing, 9 persons; 4th story, salesroom for leather novelties, 8 persons; 5th story, manufacture of leather goods, 15 persons; 6th story, lithographing, 14 persons; 7th story, vacant; 8th story, manufacture of lamp shades, 19 persons; 9th story, manufacture of childrens' dresses, 22 persons; 10th story, manufacture of yarns, 12 persons; 11th story, vacant; 12th story, manufacture of ladies' dresses and embroideries, 31 persons; means of EGRESS consisting of an interior fireproof stairway, extending from the first story to the roof, enclosed in fireproof partitions, fireproof doors at openings; an exterior iron stairway on the rear of the building with fireproof doors to the openings thereof, with gooseneck ladder to the roof; there is one window on each story adjoining the exit to the exterior iron stairs which is protected by iron bars; and

WHEREAS, the petitioner contends that the barred window does not open upon any part of the fire escape and that the bars are placed there for protection against robbery.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed, and that the petition be and it hereby is denied.

THE RESOLUTION—

(606-28-S)

WHEREAS, Schwartz & Gross, for Louis Security Corp., owner, filed, July 12, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 576-582 Eighth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered June 27, 1928 (N. B. No. 29-1928), reads:

"3. Plate glass lights in excess of 720 sq. inches in area are unlawful. Sec. 264, subdivision 7c, Labor Law. Construction of windows must comply with the requirements of Rule 503 of the Industrial Code."

and

WHEREAS, the building is fireproof, twenty stories in height, 52 ft. 3¼ in. by 63 ft. 11¼ in. in area; OCCUPIED: cellar, boiler room and storage, 55 persons; 1st story, stores and mezzanine, 55 persons; 2nd to 20th stories, show rooms and manufacturing, 30 persons per story; means of EGRESS consist of one interior fireproof stairway and one fire tower; the building is EQUIPPED with a sprinkler system; there are windows on the first, second and third stories in which the area of glass exceeds 720 sq. in.; and

WHEREAS, the petitioner proposes to arrange the windows so that they will be stationary and part pivot sash and to construct the frames of fireproof material, glazed with ¼-inch clear plate glass; the maximum openings to be 7 ft. by 8 ft. on the first story and 4 ft. by 6 ft. on the second and third stories, and contends, further, that the building in all other respects will conform to the requirements of the labor law.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the three lower stories of the street front, on condition that the openings on the northerly side of the first three stories be equipped with approved metal frames and sash, glazed with ¼-inch polished plate glass, and that no light of glass on the second or third story shall exceed a width of 4 ft., and that the requirements of the labor law be complied with in all other respects.

494-28-S.

PETITIONER—Samuel Rosenblum, for Orvista Realty Co., Inc., owner.

SUBJECT—Application for reopening—re modification of resolution—variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—115 West 54th street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

ACTION OF BOARD—Petition reopened and granted on condition.

THE RESOLUTION—

(494-28-S)

WHEREAS, Samuel Rosenblum, for Orvista Realty Co., Inc., filed, May 31, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 115 West 54th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered May 25, 1928, reads:

"With reference to your application for Certificate of Occupancy we beg to advise you that the following objections must be removed before the Certificate can be issued:

"1. Interior stairs of building must be extended to roof, Section 271, Labor Law.

"2. A second means of exit must be provided from every floor, Section 271 Labor Law."

and

WHEREAS, the building is non-fireproof, three stories (36 ft.) in height, 25 ft. by 95 ft. in area at first story and 25 ft. by 40 ft. in area above; OCCUPIED for the manufacture of picture frames: 1st story, 3 persons; 2nd story, 7 persons; 3rd story, 5 persons; EXITS: an interior wooden stairway, extending from the first story to top story (with iron ladder to scuttle in roof), enclosed in fire-retarding partitions on the first story and in wood board above, with wood doors at openings; a fire escape on the rear of the building, having unprotected openings along the course thereof, extending from the third story to the roof of the first story extension; EGRESS from the termination of the fire escape by means of an iron stair leading to the balcony of the four-story building to the east, and, also, by means of a ladder at the rear of the extension roof leading to the rear yard, then by means of door in the fence opening to yard of premises to rear; ROOFS of adjoining buildings: to east, two stories higher; to west, same level; and

MINUTES

WHEREAS, this petition was denied by the board at its meeting, October 9, 1928, and petitioner requested a re-opening of the case and proposed to provide a fire escape on the front of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a 60-degree fire escape at window sill level be provided on the front at west end with drop ladder in guides from the second floor balcony to the street, all openings to be fireproofed with a casement door and steps to sills on each story, and that a double-rung ladder be provided to a 2 ft. by 3 ft. scuttle in roof within the stairway enclosure, and that the occupancy shall not exceed twelve persons above the first story.

THE RESOLUTION—

(591-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Friedman & Friedman, owner, filed, July 5, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 1368-1370 DeKalb avenue, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated January 20, 1928, read:

"Order No. 31710-LD:

"1. Extend the interior stairway from 2nd to 3rd story and from 4th story to the roof as per Sec. 271 of the Labor Law.";

and

"Order No. 31711-LD:

"1. Arrange bars on windows on 1st story, east, west, north and south sides, so as to be readily movable or removable from both sides in such manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Sec. 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, four stories in height, 40 ft. by 95 ft. in area; OCCUPIED: cellar, stock room; 1st story, packing and pressing, 12 persons; 2nd and 3rd stories, manufacture of underwear, 45 persons on each story; 4th story, cutting, 8 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an open interior wooden stairway, extending from the cellar to second story and from third story to fourth story; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the sidewalk to top story; two exterior iron stairways on the north side of building, having fireproof openings along the course thereof, extending from the ground to top story; the westerly stairway has gooseneck ladder to roof; the easterly stairway is enclosed with corrugated iron; ROOFS of adjoining buildings: same level at south; vacant lot at north; and

WHEREAS, the petitioner claims that the present tenant

occupied the upper portion since 1913 and the entire building since 1918; also that the exits are adequate; as to Order No. 31711-LD, that there are five windows on the west side, ten windows on the north side, six windows on the east side and two windows on the south side affected by the order; that the barred windows are 7 ft. 3 in. to 13 ft. above the ground level and therefore would not be used as an exit; furthermore, there is a double door opening about 40 ft. in width at first story leading directly to the street.

Resolved, that the orders of the fire commissioner be and they hereby are *affirmed*, and that the petition be and it hereby is *denied*.

602-28-S.

PETITIONER—Croker Natl. Fire Prev. Eng. Co., for Jerome Bed Co., owner.

THE RESOLUTION—

(602-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Jerome Bed Co., owner, filed, July 9, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 288-290 Logan street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated March 13, 1928, read:

"Order No. 33840-LD:

"1. Enclose the interior stairway on the south side east end of building 288 Logan Street with partitions of fire resisting material. Said enclosure to extend from 1st story to the underside of the roof beams constructed as per Section 271 of the Labor Law and Rule 6, Board of Standards and Appeals adopted February 23, 1927.";

and

"Order No. 33842-LD:

"2. Provide safe egress from termination of fire escape on west side, as per Rule 13, Board of Standards and Appeals, adopted February 23, 1927.

"3. Arrange wire screens on windows 1st story, east side so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purpose of egress, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is of frame, non-fireproof construction, four stories in height, 49 ft. by 100 ft. in area on the first story and 49 ft. by 60 ft. above; OCCUPIED: cellar, boiler room and storage of iron piping and angles; 2nd story, assembling beds, 10 persons; 3rd story, tailors, men's clothing, 23 persons; 4th story, vacant at present only; the means of EGRESS consist of an interior stairway, extending from the basement to the roof, enclosed in brick partitions with fireproof doors at openings; the interior stairway extending from the first story to second story, enclosed in board partitions; a fire escape on the rear of the building running to the roof of the second story extension with proposed drop ladder in guides to open passageway on the southerly side leading to street; and

WHEREAS, petitioner contends that the premises is divided into two sections with openings in the fire wall protected

MINUTES

by self-closing fireproof doors and that the stairway referred to is an accommodation stairway running from the first story to second story and is not one of the required means of exit; that there are three means of egress from the first story; that the petitioner proposes to provide a sliding drop ladder in guides from the easterly side of extension roof; that the wire screenings referred to are on the first story of both sections; that they are chicken wire screening only, held in place by a few staples nailed to the window frames and are placed there to prevent breakage by children of the neighborhood; that there is a doorway leading directly to the street and two other means of egress from this floor.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1 of Order No. 33840 and Item 2 of Order No. 33842, only so long as the first and second stories of the premises remain in single operation and tenancy, and *on condition* that the existing stairs be maintained in accordance with the existing rules of the board of standards and appeals, and *on condition* that a standard labor law fire escape be provided on the front of the building of section 288; *denied*, as to Item 3 of Order No. 38342, and *granted* so long as conditions as to occupancy and use remain unchanged and the building be not increased in height or area.

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ($1/200$) part of the span.

Rule 2: Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations

(a) Seven-eighths ($7/8$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($1/4$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($1/2$) inch plaster boards, or three-eighths ($3/8$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($1/4$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, one-half ($1/2$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, two thicknesses of one-quarter ($1/4$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, November 23, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125° F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) **OVER 275 GALLONS CAPACITY.** Where tank cannot be buried as required in subdivision c of this rule,

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 13 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored. horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-ing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{3}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{3}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(e) *Relief valves shall be set to discharge at not more than $1\frac{1}{2}$ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ($1\frac{1}{4}$) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner a shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test wall or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied exclusively by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied exclusively by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman
WILLIAM J. O'GORMAN, Secretary.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessces in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary.

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, November 20, 1928, 10 a. m.

Minutes of Regular Meeting, November 20, 1928, 2 p. m.

Reserve Calendar.

Fire Retarding Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 27, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 4, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman,

THE VOTE TO GRANT—

Affirmative 0
Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon 4
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(474-28-A)

WHEREAS, David Kaufman, for Velbard Realty Co., Inc., lessee, filed, May 21, 1928, an appeal from an order of the fire commissioner, affecting premises 533-545 Fulton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 21, 1928 (Order No. 16198-LC), reads:

"1. Install a 4" standpipe, in accordance with Section 580, Chapter 5, Code of Ordinances, Plans and Specifications to be filed with and approved by this Department before work is commenced."

and

WHEREAS, the building is non-fireproof, three stories (38 ft. 2 in.) in height, 195 ft. by 115 ft. 6 in. and 200 ft. 6 in., irregular, in depth, about 22,400 sq. ft. in area; OCCUPIED: 1st story, stores; 2nd story, business; 3rd story, school; 400 persons on each story; a fuel oil burning system having been installed consisting of a 3,600-gallon tank located under the sidewalk connected by piping to a Ballard burner located in the cellar, using Grade A oil; and

WHEREAS, the appellant claims that the building is divided into two floor areas of 5,800 sq. ft. and 16,600 sq. ft.; that the occupancy is non-hazardous; that a complete approved sprinkler system has been installed; furthermore, the appellant contends that it would be an undue hardship and expense upon the owner if compelled to install a standpipe system.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

583-28-A.

APPELLANT—Cornell Utilities Co., Inc., for Brooklyn Cornell Utilities, Inc., lessee.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—152 Lawrence street, Brooklyn.

APPEARANCES—

For Appellant: William Porter.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition. THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(583-28-A)

WHEREAS, Cornell Utilities Co., Inc., for Brooklyn Cornell Utilities, Inc., lessee, filed, June 29, 1928, an appeal from a decision of the fire commissioner, affecting premises 152 Lawrence street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered June 5, 1928 (No. 1500-28), reads:

"4. Boiler room must be completely cut off from the rest of the building by fireproof partitions, ceiling and floor constructed of not less than 8" for brick or 6" for concrete or terra cotta. Rule 20.

"5. Boiler room must have entrance from street, yard or court only. Rule 20."

and

WHEREAS, the building is non-fireproof, four stories in height, 60 ft. by 110 ft. in area; OCCUPIED: 1st story, stores, 25 persons; upper stories, offices, 12 persons on each story; a fuel oil burning system having been installed, consisting of a storage tank buried under cellar floor, connected by piping to an Aetna burner located in boiler room in the cellar, all work done in accordance with the requirements of law; and

WHEREAS, the appellant has installed a fuel oil burning system in the store on first story for demonstration purposes only, consisting of a 275-gallon tank located in the open cellar, connected by piping to an Aetna burner, also to a Nokol burner, set up with boilers located in the store on first story; and

WHEREAS, the appellant contends that a qualified operator is near at all times; that there is direct exit to the street from the showroom where the burners are installed.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted, as to Order No. 1500-28, Items 4 and 5, on condition that this installation shall be used for demonstration purposes only; that the fuel oil rules shall be complied with in all other respects, and that the building shall be not increased in height or area.

577-28-A.

APPELLANT—Samuel Rosenblum, for 806 Broadway Corp., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—806-808 Broadway and 104 Fourth avenue, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon 4
Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(577-28-A)

WHEREAS, Samuel Rosenblum, for 806 Broadway Corp., filed, June 28, 1928, an appeal from an order of the fire commissioner, affecting premises 806-808 Broadway and 104 Fourth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 21, 1927 (Order No. 22948-F), reads:

"1. Replace the missing and defective shutters with proper iron shutters at all openings in the exterior wall

MINUTES

above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at north and south side of building or other approved protection as per Section 375, Article 18, Chapter 5, of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, six stories in height, 51 ft. 4 in. fronting on Broadway, extending through the block 230 ft. with a frontage of 50 ft. on Fourth avenue; OCCUPIED: 1st story, stores; 2nd and 3rd stories, clothing jobbers, 23 persons on the two stories; 4th story, cutting, 20 persons; 5th and 6th stories, manufacture of suits, 33 persons on the two stories; and

WHEREAS, the appellant claims that the building is equipped with an automatic sprinkler system; that the three windows on each of the second to sixth stories, inclusive, at the north side of the building, which are not provided with iron shutters, overlook a one-story iron shed and a one-story extension, also the openings causing the exposure at northeast are fireproof windows; that the eleven windows on each of the second to sixth stories, inclusive, at the south side of the building, which are not provided with shutters, overlook open yards; furthermore, the appellant contends that the exits are adequate and the occupancy is non-hazardous.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the windows on the south and north walls of the building, other than the two adjoining windows on each floor on the south wall directly west of the four-story building on Fourth avenue and the two windows on each floor directly west of the brick building on Fourth avenue on the north side adjoining this building, *on condition* that the building shall be not increased in height or area.

THE RESOLUTION—

(546-28-BZ)

WHEREAS, John J. Dunnigan, for Harris Lubolsky, owner, filed, June 19, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 2810 Westchester avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meet-

MINUTES

ing, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Westchester avenue is in a business district, Mulford avenue is in a business district and Middletown road is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 5, 1928 (re N. B. 1200-28), reads:

"1. Erection of proposed gasoline selling station in business district is contrary to provisions of Building Zone Resolution."

and
WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 88.92 ft. on Westchester avenue and a depth of 44.35 ft., upon which it is proposed to erect a small one-story office and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

548-28-BZ.

APPLICANT—John J. Dunnigan, for Samuel Thau, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the change of occupancy of an existing building to a motor vehicle repair shop.

PREMISES AFFECTED—2548 White Plains avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: Max D. Koenig.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative: 4
Absent: Chairman Walsh..... 0

THE RESOLUTION—

(548-28-BZ)

WHEREAS, John J. Dunnigan, for Samuel Thau, owner, filed, June 19, 1928, an application, under the building zone resolution, to permit in a business district the change of occupancy of an existing building to a motor vehicle repair shop; premises 2548 White Plains avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that White Plains avenue is in a business district; Allerton avenue is in a business district, and Cruger avenue, south of a point 100 ft. south of Allerton avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 8, 1928, reads:

"Your request for a certificate of occupancy for the existing building at No. 2548 White Plains Avenue as a repair shop for motor vehicles is hereby denied as the premises are located in a business district and the proposed change of occupancy is contrary to the provisions of the Building Zone Resolution."

and
WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 60 ft.; occupied as a garage and gasoline

selling station; to be occupied as a garage, gasoline selling station and motor vehicle repair shop; and

WHEREAS, the board deems that applicant is entitled to relief under section 21 of the building zone resolution and that the denial of this variation would be a hardship.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the repair work shall be restricted to manual operation, with the exception of one one-half horse power electric drill, and that all work shall be confined to the present building.

523-28-BZ.

APPLICANT—Emil Guterman, for Herman Schlossman, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—16806-16808 Union turnpike, south side, 40.22 feet east of 168th street (Ackroyd avenue), Hillcrest, Jamaica, Borough of Queens.

APPEARANCES—

For Applicant: Charles M. Spindler.

For Opposition: Lawrence H. King.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Absent: Chairman Walsh..... 4

THE RESOLUTION—

(523-28-BZ)

WHEREAS, Emil Guterman, for Herman Schlossman, owner, filed, June 7, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 16806-16808 Union Turnpike, south side, 40.22 ft. east of 168th street (Ackroyd avenue), Hillcrest, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Union Turnpike is in a business district, 168th street (Ackroyd avenue) is in a residence district and 169th street (Inglee avenue) is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered May 14, 1928 (re Plan No. 1366-28), reads:

"1. A gasoline service station at the above location which is a business district, may not be permitted. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, it is proposed to erect a non-fireproof office, 20 ft. by 20 ft., bury two 550-gallon tanks and erect three pumps upon a lot 40.22 ft. by 97.49 ft. for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the fire commissioner be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(422-28-BZ)

WHEREAS, A. L. M. Development Corp., owner, filed,

May 4, 1928, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a theatre building; premises 1817-1819 Avenue M, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Avenue M is in a business district, East 18th street is in a residence district and East 19th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 30, 1928 (re App. No. 4585-28), reads:

"Business building in residential district contrary to Zoning Resolution, Art. II, par. 3, and is hereby denied.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 30 ft. on Avenue M, 76 ft. on East 19th street and 85 ft. on East 18th street; to be occupied as a theatre building; the building extending 46 ft. into the residence district; and

WHEREAS, the board deemed that it was empowered to act under section 7, subdivision c, and that applicant also substantiated his basis of appeal under section 21.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for an extension of 35 ft. on East 18th street and 46 ft. on East 19th street into the residence district, *on condition* that there shall be no exit or entrance other than is required for an emergency exit by law on either street fronts in the residence district; that there shall be no advertising signs displayed on either street front within the residence district; that there shall be no roof signs erected within the residence portion of the structure, and that the building code regulations shall be complied with in all respects.

253-28-BZ.

APPLICANT—William F. Doyle, for Ryan Bros., owners.

SUBJECT—Application for reopening—amendment—re application (decision of fire commissioner) under sections 21, 7-a, 7-b and 7-g of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—7817-7825 Third avenue and 301-313 79th street, northeast corner, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

Negative 0
Absent: Chairman Walsh..... 1

THE RESOLUTION—

(253-28-BZ)

WHEREAS, William F. Doyle, for Ryan Brothers, owner, filed, March 23, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 7817-7825 Third avenue and 301-313 79th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

MINUTES

October 2, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Third avenue is in a business district, 78th street is in a residence district and 79th street is in a residence district; and

WHEREAS, this application was granted by the board at its meeting, October 2, 1928, and applicant requested a reopening of the case and the inclusion of the decision of the superintendent of buildings, rendered November 10, 1928, which reads:

"Proposed gas station and garage in a business and partly residential district is contrary to sec. 3 & 4 of Art. II of Building Zone Resolution.";

and
WHEREAS, the decision of the fire commissioner, rendered March 22, 1928 (re Alt. No. 698-1928), reads:

"1. This garage may not be permitted at this location which is situated in a business and residence zone. Sec. 3-4 B. Z. Appeal may be taken to the Board of Standards and Appeals.";

and
WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 80 ft. on Third avenue, 120 ft. on 79th street and a depth of 92 ft. 10½ in., irregular; to be occupied as a garage for more than five motor vehicles and a gasoline selling station; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7, subdivision g, and was therefore entitled to a variation.

Resolved, that the board of standards and appeals does hereby *reaffirm* its action of October 2, 1928, and does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not be erected in excess of two stories above grade; that there shall be no vehicular entrance of any nature or description within the residence use area of the premises; that the northerly and easterly walls shall be unpierced throughout their entire height and length; that the area of gasoline service station on 79th street shall not exceed a depth of 60 ft. easterly from Third avenue; that there shall be erected at the building line of the gasoline service station area a reinforced concrete curbing not less than 12 inches in height with vehicular driveways not exceeding 10 ft. in width; that the operation of the gasoline service station on these premises shall be confined exclusively and restricted to within the property lines of the premises; that there shall be no portable gasoline tanks or pumps permitted on any portion of the premises; that the exterior of the building on street front shall be finished with light-color face brick with architectural terra cotta or natural stone trimmings; that no advertising signs shall be erected or displayed, other than on electrically illuminated lamps of the gasoline pumps on any portion of the 79th street front; that there shall be no roof sign erected on any portion of the premises, and that all permits required shall be obtained within nine months and any work involved shall be completed within one year from the date of this action.

AREAS FIXED.

(392-28-BZ)

The acting chairman presented and read a communication from James Kearney, requesting the board to fix an area

deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of Cross Island boulevard and Hollis avenue, Borough of Queens.

The following area was approved by the board:

Both sides of Hollis avenue from 205th place to a point 400 ft. east of premises in question; both sides of Cross Island boulevard from 109th avenue to a point 200 ft. south of Hollis avenue; also the west side of 207th street from Hollis avenue to a point 150 ft. north of Hollis avenue.

(659-28-BZ)

The acting chairman presented and read a communication from Philip J. Sinnott, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of an apartment house with stores on the first story; premises 470 Convent avenue and 444 West 151st street, Borough of Manhattan.

The following area was approved by the board:

Both sides of West 151st street from Amsterdam avenue to St. Nicholas avenue (not including the business district); both sides of Convent avenue from a point 200 ft. north of West 151st street to a point 400 ft. south of premises in question; also the north side of West 150th street from Convent avenue to a point 75 ft. west of Convent avenue.

(632-28-BZ)

The acting chairman presented and read a communication from John J. Dunnigan, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 140 Westchester avenue, southeast corner of Seabury avenue, Borough of The Bronx.

The following area was approved by the board:

Both sides of Westchester avenue from a point 200 ft. west of Seabury avenue to a point 400 ft. east of the premises in question; both sides of Seabury avenue from Westchester avenue to a point 200 ft. south of the southerly line of Westchester avenue; both sides of Overing street and, also, Lane avenue, from Westchester avenue to a point 200 ft. north of the northerly line of Westchester avenue and the premises at the rear within 50 ft. of the lot lines of the premises in question.

(654-28-BZ)

The acting chairman presented and read a communication from Robert A. Dillon, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2334-2360 Jerome avenue, Borough of The Bronx.

The following area was approved by the board:

Both sides of Jerome avenue from a point 100 ft. north of 184th street to a point 400 ft. south of premises in question; both sides of North street from Davidson avenue to Jerome avenue; the south side of East 184th street from Jerome avenue to Walton avenue; the west side of Walton avenue from East 184th street to a point 425 ft. south of East 184th street.

APPELLANT—Buchman & Kahn, for 530 Seventh Avenue Corp., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—528-536 Seventh avenue and 200-212 West 39th street, Manhattan.

APPEARANCES—

For Appellant: John M. Montfort and J. L. Murphy.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(806-28-A)

WHEREAS, Buchman & Kahn, for 530 Seventh Avenue Corp., owner, filed, October 23, 1928, an appeal from a decision of the fire commissioner, affecting premises 528-536 Seventh avenue, 200-212 West 39th street, southwest corner, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated October 18, 1928 (Application No. 3746-28), reads:

"1. Siamese must be cross-connected so that each siamese may be used to supply water for the entire sprinkler system throughout the building.";

and

WHEREAS, the building, in course of construction, is fire-proof, thirty stories (359 ft. 10 in.) in height, 146 ft. by 107 ft. 6 in. in area; OCCUPANCY: 1st story, stores, 130 persons; upper stories, offices, showrooms and 25 per cent of the floor area used for manufacturing, 140 persons on each story; and

WHEREAS, the appellant proposes to provide the sprinkler protection required under the labor law for factory buildings by installing two separate and distinct sprinkler systems with independent siamese connections for each system on each street front without cross connections; the lower system to control all stories up to and including the 15th story; the upper system to control all stories above the 15th story; the lower system to be fed by a 25,000-gallon divided gravity tank and a 9,000-gallon pressure tank; the upper system to be fed by a 15,000-gallon divided gravity tank and a 7,500-gallon pressure tank; and

WHEREAS, the appellant claims that the two proposed sprinkler systems will comply in all respects with the requirements of the building code and the sprinkler rules with one exception; the two systems will not be cross-connected as required under the rules; furthermore, the appellant contends that in this particular case the water pressure would exceed the allowable load on the approved valves, fittings and sprinkler heads at lower levels when the siamese are in use, if installed in strict compliance with the sprinkler rules.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the riser connected to the lower sprinkler unit shall be connected to a siamese passing through the street wall not less than 2 ft. above the sidewalk level; that the riser to the upper sprinkler unit shall be connected to a siamese passing through the street wall not less than 3 ft. above the sidewalk level; the two siamese to be enclosed in a brass plaque with 1 inch raised letters indicating the upper siamese: "Sprinkler siamese to unit above the 15th floor," and with raised letters indicating the lower siamese "Connecting to the unit for 15th floor and below"; that all pipe lines subject to more than 150 pounds working pressure be provided with extra heavy piping, valves and pipe fittings; and that the sprinkler rules shall be complied with in all other respects.

BUILDING ZONE CASES.

160-28-BZ.

APPLICANT—Edward J. Bausch, for Feinborough Homes, Inc., owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

MINUTES

PREMISES AFFECTED—Northwest corner of Margaret place (Trotting Course lane) and 82nd avenue (Olivia place), Glendale, Borough of Queens.

APPEARANCES—

For Applicant: Jacob E. Bausch.

For Opposition: None.

ACTION OF BOARD—Laid over to December 7, 1928, at 2 p. m., to check consents submitted by applicant.

45-28-BZ.

APPLICANT—John J. Dunnigan, for Marles Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2871 Bailey avenue, west side, 337.08 feet south of West 230th street, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: None.

ACTION OF BOARD—Laid over to December 18, 1928, at 10 a. m., on request of applicant. To revise plans allowing extra entrance near north building line.

451-28-BZ.

APPLICANT—William F. Doyle, for Alexander Ginsburg, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1969-1979 Cropsey avenue and 8796-8818 20th avenue, northwest corner, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Murray M. Cowen and Michael Neiman.

ACTION OF BOARD—Laid over to December 7, 1928, at 2 p. m., on request of applicant; final action.

394-28-BZ.

APPLICANT—Harry B. Kalter, for Max Epstein, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station and a motor vehicle repair shop.

PREMISES AFFECTED—16221 Willets Point boulevard and 1502 Utopia parkway, southwest corner, Whitestone, Borough of Queens.

APPEARANCES—

For Applicant: Samuel Dickstein.

For Opposition: C. Miller.

ACTION OF BOARD—Laid over to December 11, 1928, at 2 p. m., on request of applicant's representative.

540-28-BZ.

APPLICANT—J. G. Shea, for Martin Linsky and Arthur T. Doyle, owners.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit the erection of a garage for more than five (5) motor vehicles in a residence district.

PREMISES AFFECTED—7001 36th avenue and 3541 Kittay street (Sprague street), northeast corner, Woodside, Borough of Queens.

APPEARANCES—

For Applicant: Edward F. Fox.

For Opposition: Charles K. Finch and Jennie Perry.

ACTION OF BOARD—Laid over to December 11, 1928, at 2 p. m., for inspection and report by a committee of board.

406-28-BZ.

APPLICANT—Edward L. Kelly, for Anna Stanaitis, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—301-305 Grandview avenue, 5316 to 5320 Metropolitan avenue, northeast corner, Ridgewood, Borough of Queens.

APPEARANCES—

For Applicant: Edward L. Kelly.

For Opposition: John J. Durand.

ACTION OF BOARD—Laid over to December 11, 1928, at 2 p. m., to permit filing of objections and to permit applicant to amend plans. Impractical layout for gas station.

267-28-BZ.

APPLICANT—Joseph D. Nunan, Jr., for I. & D. Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in an "E" area and residence district the erection and maintenance of attached private residences, omitting the side yard required under the building zone resolution.

PREMISES AFFECTED—Southeast corner of Reeds lane and Coles lane, and southeast corner and southwest corner of Central place and Coles lane, Far Rockaway, Queens.

APPEARANCES—

For Applicant: Joseph D. Nunan, Jr.

For Opposition: Charles P. Stewart.

THE RESOLUTION—

(395-28-BZ)

WHEREAS, William F. Doyle, for Weis Buck Garage Co., Inc., owner, filed, April 25, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1139 Prospect avenue and 153 Terrace place, northeast corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Prospect avenue is in a business district, Terrace place is in a residence district and Eleventh avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered April 24, 1928 (re Plan No. 1049-28), reads:

"1. A gasoline station may not be permitted at this location as it is situated in a business zone. Sec. 4, Building Zone Resolution. Appeal may be taken to the Board of Standards and Appeals."

and

WHEREAS, the decision of the superintendent of buildings, rendered November 14, 1928 (App. No. 19270-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4-a, subdivision 46.

"The installation of a gasoline service station in a business district."

and

WHEREAS, it is proposed to bury three 550-gallon tanks, erect three pumps and enclose the premises by a brick wall on all sides, and with arched driveway entrances on the street fronts for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deems applicant is entitled to relief under section 21 of the building zone resolution and that denial of the variation would devolve a hardship upon him.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the alteration of the front of the present garage on Prospect avenue so as to permit the conduct and operation of a gasoline service station, *on condition* that any openings, exits or entrances to the proposed gasoline selling station shall be not less than 25 ft. north of the northerly building line of Terrace place; that a 12-inch concrete curb shall be erected along the building line on Prospect avenue for full length of space to be occupied by gas station with two openings to the gasoline service portion of the premises; that no portable tanks shall be operated outside the building line of premises; that no grease racks shall be installed or maintained or any crankcase service allowed on the gasoline

service portion of these premises; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

108-28-BZ.

APPLICANT—John J. Dunnigan, for 4510 Broadway Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1550 Jerome avenue, east side, 241.79 feet south of Mount Eden avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: George Berkwitz.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin..... 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(108-28-BZ)

WHEREAS, John J. Dunnigan, for 4510 Broadway Corp., owner, filed, February 2, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1550 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; Mt. Eden avenue, east of a point 100 ft. west of Jerome avenue, is in a business district; Mt. Eden avenue, west of a point 100 ft. west of Jerome avenue, is in an unrestricted district; Goble place, west of a point 100 ft. west of Jerome avenue, is in an unrestricted district, and that Townsend avenue is in a residence use and "B" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 1, 1928 (re N. B. 177-1928), reads:

"1. Erection of garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.

"2. Rear yard must be provided behind second story to comply with requirements of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 102 ft. 5½ in. and a depth of 105 ft.; irregular; to be occupied as a garage for the storage of more than five motor vehicles; the building to occupy the entire area of the lot on first and second stories; and

WHEREAS, applicant has filed with the board documentary evidence in support of section 7e to the effect that a permit has been in force for the conduct of a stable on the existing premises; and

WHEREAS, the surrounding neighborhood is almost entirely occupied by non-conforming uses permitted since the passage of the building zone resolution, and the board deems that it would be a hardship under section 21 of the building zone resolution to deny the application.

Resolved, that the board of standards and appeals does

MINUTES

hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, as to Item No. 1, *on condition* that the building shall be constructed fireproof throughout; that the front elevation shall be of face brick and architectural terra cotta with stone trimming; that the rear and gable walls shall be unpierced throughout their entire height and length; that no portable gasoline tanks shall be maintained or operated outside the building line; that the foot of the ramp leading to the second story shall be set back 10 ft. from the building line; that all permits required shall be obtained within nine months and all work completed within eighteen months from the date of this action, and *granted*, as to Item No. 2, regarding the rear yard, *on condition* that the building shall be not more than two stories in height above grade.

211-28-BZ.

APPLICANT—William A. Schroeder, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—North side of Braddock street (Rocky Hill road), 155 feet east of 244th street, Queens Village, Queens.

APPEARANCES—

For Applicant: William A. Schroeder.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Deputy Chief Martin.....	4
Negative	0
Absent: Chairman Walsh.....	1

THE RESOLUTION—

(211-28-BZ)

WHEREAS, William A. Schroeder, owner, filed, March 8, 1928, an application, under the building zone resolution, to permit in a business district and partly in a residence district the erection and maintenance of a gasoline service station; premises north side of Rocky Hill (Braddock street) road, 155 ft. east of 244th street, Queens Village, Borough of Queens; and

WHEREAS, a public hearing was held on this application

by the board of standards and appeals, at its regular meeting, November 20, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Rocky Hill (Braddock street) road is in a business district, 245th street is in a residence district and that 244th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 27, 1928 (re N. B. Plan No. 655-1928), reads:

"The erection or creation of a gasoline station in a residence district and extending into a business district is contrary to the Zone Law.";

and

WHEREAS, it is proposed to erect a non-fireproof office, bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station about 100 ft. in a business district and 100 ft. within a residence district; and

WHEREAS, this application is supported by a preponderance of consents of affected property owners, with the exception of property owners conducting gasoline service stations at present, the board deems that a denial of this variation would be a hardship upon the applicant under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected along the building line a concrete curbing not less than 12 inches in height with two openings each not more than 10 ft. wide; that there shall be erected along the easterly, westerly and northerly building line a masonry wall not less than 10 ft. in height, coped with terra cotta or natural stone coping; that there shall be no advertising displayed other than that on the illuminating lamps of the gasoline pumps; that there shall be no grease racks or crankcase service allowed or permitted on the premises; that no portable gasoline tanks shall be allowed outside the building line; that the masonry wall required on the westerly side of the property shall set back 10 ft. from the concrete curb which is to be erected along the building line on the street front until it reaches the height of the top of the wall; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ($1/200$) part of the span.

Rule 2. Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ($7/8$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($1/4$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($1/2$) inch plaster boards, or three-eighths ($3/8$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($1/4$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($3/4$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, one-half ($1/2$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($7/8$) inch wood sheathing, two thicknesses of one-quarter ($1/4$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one inch lapped seams.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary.

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, November 23, 1928, 2 p. m.

Minutes of Regular Meeting, November 27, 1928, 10 a. m.

Minutes of Regular Meeting, November 27, 1928, 2 p. m.

Factory Exit Rules.

Reserve Calendar.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 4, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 11, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman,

THE RESOLUTION—

(588-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for L. Wertheimer, Inc., owner, filed, June 30, 1928, an appeal from an order of the fire commissioner, affecting premises 617-629 West 181st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 17, 1927 (Order No. 7173-F), reads:

"1. Provide a non-automatic sprinkler system in cellar, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919, and in the rules and regulations of the Fire Department, and in connection therewith provide an automatic fire alarm complete with Central Office connec-

tion. All work shall be done in a manner satisfactory to the Fire Commissioner and in accordance with established practice and trade custom, as per Sec. 20, Ch. 12, Code of Ordinances.”;

and

WHEREAS, the building is non-fireproof, cellar and two stories (28 ft. 11 in.) in height, 125 ft. by 94 ft. and 96 ft., irregular, about 12,350 sq. ft. in area; OCCUPIED as a department store: cellar, household goods and shipping room, 20 persons; 1st story, hats, pocketbooks, etc., 49 persons; 2nd story, shoes, clothes and club room, 70 persons; and

WHEREAS, the appellant claims that the building faces on two streets; that the exits are adequate; that fire buckets and fire extinguishers are distributed throughout the premises; that the cellar is separated into two areas, the larger area being less than 10,000 sq. ft.; furthermore, the appellant proposes to provide underwriters' fire doors on each side of openings in the dividing wall.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION—

(649-28-A)

WHEREAS, Samuel Rosenblum, for the Guaranty Trust Company of New York, as trustee under the will of Frederick S. Myers, filed, August 1, 1928, an appeal from an order of the fire commissioner, affecting premises 520-522 West 24th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 19, 1928, reads:

“1. Replace the missing and defective shutters with proper iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with the said openings and which are not more than 50' above a neighboring roof at rear and east and west sides of building, as per Section 375, Art. 18, Ch. 5 of the Code of Ordinances (or other approved protection).”;

and

WHEREAS, the building is non-fireproof, four stories in height, 50 ft. by 98 ft. 9 in. in area at first story and 50 ft. by 92 ft. in area above; OCCUPIED: 1st story, store and non-storage garage; the upper stories being vacant at present; and

WHEREAS, there are six windows on the fourth story in the easterly wall of the building within 10 ft. of the roof of an adjoining three-story factory building to the east; three windows on the third story and five windows on the fourth story on the westerly wall within 20 ft. of the roofs of a three-story (and two-story extension) building to the west and eight windows on each story above the first story in the rear wall within 30 ft. of openings in or within 50 ft. of the roofs of neighboring buildings to the south; and

WHEREAS, appellant requests the acceptance of existing conditions, as to the windows in question, as long as the upper stories of the building remain vacant.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

THE RESOLUTION—

(613-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for J. L. Thornton, owner, filed, July 14, 1928, an appeal from an order of the fire commissioner, affecting premises 270 West 126th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 18, 1928 (Order No. 35640-F), reads:

“1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24th, 1917, as amended May 2nd, 1918, and January 21, 1919, effective February 17th, 1919.”;

and

WHEREAS, the building is non-fireproof, four stories (49 ft. 1 in.) in height, 25 ft. by 99 ft. 11 in. on the first and second stories and 25 ft. by 50 ft. in area above; OCCUPIED for the storage of lumber, sheet rock, doors and mouldings, 4 persons in entire premises; and

WHEREAS, appellant contends that there is no manufacturing or cutting of lumber done in the premises and that all lumber is tightly stacked; that, excepting for a stove in the office, there is no heat in the building; that there is no gas in the building, the lighting being done by electricity, and that there are fifteen fire pails on each story.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the premises shall be equipped with a sprinkler system supplied from a 4-inch tap to city main, in accordance with the sprinkler rules of the board of standards and appeals; that the building shall be not increased in height or area, and that the occupancy and use shall remain substantially unchanged.

THE RESOLUTION—

(285-28-A)

WHEREAS, Bennett & Koepfel, for Williams & Goldstein, owners, filed, March 30, 1928, an appeal from an order of the fire commissioner, affecting premises 415-423 Ovington avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 4, 1926 (4068-LC), reads:

"8. Install a standpipe system in accordance with the requirements of Sec. 581 Chap. 5 C. of O. and as stipulated on F.D. Plan 2101-25 Plans and specifications to be filed with and approved by the Fire Department before work of installing standpipe is commenced.";

and

WHEREAS, the building is non-fireproof, four stories (45 ft.) in height, 143 ft. by 101 ft. (approximately 11,300 sq. ft.) in area; OCCUPIED as an apartment house; equipped with a fuel oil burner; sixteen families per story; and

WHEREAS, appellant contends that the area of the building is but slightly in excess of the limiting area requiring the installation of a standpipe system and contends, further, that the building is divided into sub-areas by means of 8-inch brick walls, with fireproof doors at openings therein, and that no sub-area exceeds 2,500 sq. ft. in area; and

WHEREAS, the building has been erected under the approval of plans of the bureau of buildings and certificate of occupancy now in force by the tenement house department, and the order is based on the substitution of oil for a coal fuel.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the fuel oil burning equipment shall be installed, operated and maintained in strict compliance with the fuel oil rules of the board of standards and appeals.

THE RESOLUTION—

(607-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Johanna Johnson, owner, filed, July 12, 1928, an appeal from an order of the fire commissioner, affecting premises southwest corner of Queens boulevard and Van Pelt avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated April 23, 1928 (Order No. 35947-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch with necessary check valves and 2½ inch regulation Fire Department outlets.";

and

WHEREAS, the building is non-fireproof, one and two stories (on part of Queens boulevard front) in height, 140 ft. by 100 ft., irregular, approximately 11,300 sq. ft. gross area on first story and 31 ft. by 40 ft. in area on the second story; OCCUPIED: 1st story, repair shop, sales room and garage, 7 persons; 2nd story, office, 3 persons; and

WHEREAS, appellant contends that the premises face on two street fronts; that the building is low in height and

but slightly in excess of the limiting area requiring the installation of a standpipe system.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that there shall be installed two 2½-inch outlets on the Van Pelt avenue front, inside the structure at the north and south entrances of the garage area and one at the extreme westerly entrance on Queens boulevard, supplied from a 2-inch tap to the city main; that each outlet shall be equipped with not less than 100 ft. of hose, and that the building shall be not increased in height or area.

THE RESOLUTION—

(470-27-A)

WHEREAS, Robert Teichman, for The Farmers' Loan and Trust Co., trustee for the Estate of Alex. J. Roux, owner, filed, April 29, 1927, an appeal from an order of the fire commissioner, affecting premises 47-49 Mercer street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 15, 1926, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basement, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, six stories (90 ft. 6 in.) in height, 50 ft. 2 in. by 97 ft. at the first story and 50 ft. 2 in. by 87 ft. in area above; OCCUPIED for the storage and baling of wool stock: 1st story, 6 persons; 2nd story, 1 person; 3rd story, 1 person; 4th story, 1 person; 5th story, 1 person; 6th story, 6 persons; and

WHEREAS, appellant contends that the height of the building is but a few feet in excess of the height (85 ft.) requiring the installation of a standpipe system and proposes to install auxiliary fire extinguishing apparatus, fire pails, etc.; and

WHEREAS, this appeal was granted by the board at its meeting, September 27, 1927, and owner, through his agent, Croker National Fire Prevention Engineering Co., requested a rescindment of the resolution.

Resolved, that the resolution adopted September 27, 1927, and reading:

"Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped throughout with an approved sprinkler system."

THE RESOLUTION—

(897-24-A)

WHEREAS, Petroleum Heat and Power Co., for Kenmore Trading Corp., owner, filed, July 8, 1924, an appeal with the board of appeals, from a decision of the fire commissioner, affecting premises 441-445 Ocean avenue and 2002-2028 Caton avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered April 30, 1924, in acting on N. B. Application No. 1835-23, reads:

"1. As the area of building exceeds 10,000 square feet, a standpipe equipment is required.";

and

WHEREAS, the building is non-fireproof, six stories in height, 223.37 ft. by 171.25 ft. and 98.12 ft. (about 16,000 sq. ft.), irregular, in area; OCCUPIED as an apartment house; and

WHEREAS, appellant contends that the floor area is subdivided into seven distinct areas (the maximum being 2,842 sq. ft.) by 4-inch terra cotta fireproof partitions, and that the means of exit are adequate; and

WHEREAS, the original appeal was denied by the board December 23, 1924, reopened September 20, 1927, for a rehearing; and

WHEREAS, the building was erected and completed in accordance with the tenement house law and the bureau of buildings, and certificates of occupancy were issued by both departments in 1923; and

WHEREAS, the order is brought about by the installation of a fuel oil equipment in substitution of coal; and

WHEREAS, the building is subdivided by walls of approved masonry, no single unit of which exceeds 3,000 sq. ft. in area; and

WHEREAS, this appeal was granted by the board at its meeting, October 28, 1927, on certain conditions, and appellant requested a modification as to opening from interior of premises to boiler room.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the fuel oil burning system shall comply with the fuel oil rules in all respects, and *granted*, only so long as the building as to occupancy and use remains unchanged and that it shall not be increased in height or area.

THE RESOLUTION—

(456-22-A)

WHEREAS, John De Hart, for The Lamport Manufacturing Supply Co., Inc., lessee, filed, March 28, 1922, an appeal with the board of appeals, from an order of the fire commissioner, affecting premises 47-49 Mercer street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2nd, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 100 ft. in area on the first story and 50 ft. by 90 ft. in area above; OCCUPIED for the storage of cotton goods and mill ends; and

WHEREAS, appellant contends that the goods are in bales or boxes, that are never opened, that no sorting or repairing is done on the premises, no clippings are stored on the premises and that there is no combustible fibre within the meaning of Chapter 12 of Section 24 of the Code of Ordinances, and that a similar order was rescinded on recommendation of chief of the bureau of fire prevention on August 6, 1918; and

WHEREAS, the board granted a variation under Cal. No. 470-27-A with respect to the installation of a standpipe system, and granted a modification of this order May 31, 1922, on certain conditions; and

WHEREAS, the board on this date has reopened and rescinded the resolution, under Cal. No. 470-27-A, restoring the fire commissioner's order as to the installation of a standpipe system at the request of owner's agent, the Croker National Fire Prevention Engineering Co.; and

WHEREAS, conditions have changed, the quantity of material stored in bales on the premises having been reduced, now not exceeding 100 tons, and a minor amount of loose clippings, sorted on the top story.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, sustaining the recommendations of the chief of the fire prevention bureau, *on condition* that the material maintained in bales on the premises shall not exceed 100 tons at any one time; that any sorting or baling of clippings shall be restricted to the top story, and that the appeal is *granted* only so long as conditions otherwise remain unchanged and that the premises shall be equipped throughout with an approved standpipe system.

THE RESOLUTION—

(611-28-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for RCA Photophone, Inc., filed, July 14, 1928, an appeal from a decision and order of the fire commissioner, affecting premises 411-413 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered May 15, 1928 (Plan No. 1343-28), reads:

"1. A two source automatic wet sprinkler system consisting of a pressure tank and a gravity tank supply is required in all cases of existing systems where the fire hazard is increased by the proposed erection of a nitro cellulose vault. (See Rules 51 and 54)."; and

WHEREAS, the order of the fire commissioner, dated June 12, 1928 (Order No. 43647-LC), reads:

"Section 241 Subdivision e, Chapter 10, Code of Ordinances provides that no permit shall be issued for the storage or keeping on hand of inflammable motion picture film in quantities greater than 5 reels or aggregating more than 5,000 feet in length in any premises which is not equipped with an approved system of automatic sprinklers.

"You are therefore ordered to

"1. Reduce the quantity of inflammable motion picture film to 5 reels or 5,000 feet.";

and

WHEREAS, the building is fireproof, eleven stories in height, 74 ft. 1¼ in. by 128 ft. ¾ in. in area; OCCUPIED: cellar, boiler room, storage, 50 persons; 1st story, stores, 90 persons; 2nd story, storage, sales room, cigars, 50 persons; 3rd story, vacant at present; 4th story, RCA offices, 25 persons; 5th story, showroom, millinery, offices, 10 persons; 6th story, showroom, furniture and rugs, 10 persons; 7th story, millinery, perfumer, showroom, 10 persons; 8th story, jewelry and perfume showroom, 27 persons; 9th story, office and showroom (feathers), 29 persons; 10th story, showroom, millinery and flowers, 14 persons; 11th story, RCA Photophone, Inc., as a demonstration and sales room for combined moving picture and talking film, 25 persons; and

WHEREAS, appellant contends that the premises is equipped with a standpipe system, a central office fire alarm system and a watchman's service and, also, a two-source sprinkler system, but the two sources consist of two 9,000-gallon pressure tanks instead of one pressure tank and one gravity tank; that the proposed film storage vault will be equipped with twelve sprinkler heads and will in all respects comply with the requirements of the fire department as to the construction of vaults for the storage of motion picture films, and contends, further, that the appellant is only a lessee of a portion of the premises and therefore could not, practically, make any changes to the sprinkler system; and

WHEREAS, the order is predicated only on the storage of motion picture film, the premises being equipped otherwise in accordance with the law, so far as the sprinkler installation is concerned.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the film storage shall be restricted to the northwest corner of the eleventh, top story, confined to a space not exceeding 7 ft. 6 in. by 8 ft. 6 in., enclosed in 8-inch brick wall; that the film storage and maintenance on these premises otherwise shall be restricted to the city rules and ordinances in all other respects; that the entire structure throughout shall be equipped with central office fire alarm and watchman's service, standpipe system and a two pressure tank source wet sprinkler system, and that the vault in which the film storage is maintained shall be equipped with not less than twelve sprinkler heads.

THE RESOLUTION—

(470-28-BZ)

WHEREAS, Alfred McCoy, for Anna McCoy, owner, filed, May 2, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Rockaway boulevard and 149th street, South Ozone Park, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Rockaway boulevard is in a business district; that 149th street is in a residence district, and that 148th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 12, 1928 (re Alt. 894-28), reads:

"6. Objection No. 5 repeated.

"The erection of a gas station in a business district is prohibited by the Zone Law.";

and WHEREAS, it is proposed to erect a one-story corrugated steel auto laundry and office, 30 ft. by 20 ft., bury three 550-gallon tanks and erect three pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the board deems that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

THE RESOLUTION—

(660-28-BZ)

WHEREAS, Benjamin Driesler, Jr., for Realty Associates, owner, filed, August 9, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 130-138 Brighton Beach avenue, south side, 110.8 ft. west of Calm street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Brighton Beach avenue, Parkway court (Calm street) Railroad Right of Way and East 2nd street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 25, 1928 (re Applic. No. 11237-28), reads:

"Proposition contrary to the Zone Resolution Art. II, Sec. 4 a, Subdivision 15. The erection of a garage for more than five motor vehicles in a business district.";

and

WHEREAS, the proposed building is to be of fireproof construction, three stories and basement in height, with a frontage of 107.46 ft. on Brighton Beach avenue, 100 ft. on Parkway court and 95.69 ft. on Railroad Right of Way; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant has based his appeal under sections 7g and 21 of the building zone resolution and has filed 82.2 per cent consents of an area deemed affected and fixed by this board, the board deems that applicant is entitled to relief.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall be erected fireproof throughout; that the facade shall be constructed substantially in accordance with the elevations design filed in this application and shall be finished with face brick and architectural terra cotta or natural stone trimming; that a return of the finished drawings shall be made to this board for approval before submission to the superintendent of buildings; that all permits required shall be obtained within nine months and all work involved thereby completed within eighteen months from the date of this action.

THE RESOLUTION—

(1236-27-BZ)

WHEREAS, Theodore Smith, owner, filed, November 22, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southeast corner of Woodhaven boulevard and 163rd avenue (Sheridan avenue), Aqueduct, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 29, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Woodhaven boulevard is in a business district; 163rd avenue, east of Woodhaven boulevard, is in a business district; 163rd avenue, from Woodhaven boulevard to a point 100 ft. west, is in a business district, and 163rd avenue, west of a point 100 ft. west of Woodhaven boulevard, is in an unrestricted district; and

WHEREAS, the decision of the fire commissioner, rendered September 21, 1927 (re Plan No. 2963-1927), reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 30 ft. on Woodhaven boulevard and 84.37 ft. on 163rd avenue, upon which it is proposed to erect a small office, 10 ft. by 15 ft. in area, and to install four gasoline storage tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the property lies on a corner formed by the intersection of Woodhaven boulevard and the easterly termination of 163rd avenue, which is dead ended at this property line; and

WHEREAS, the applicant has filed 87 per cent consents of an area fixed by this board and deemed affected, complying with rule 7, subdivision g, in principle as to spirit and intent; and

MINUTES

WHEREAS, this application was granted by the board at its meeting, May 29, 1928, on certain conditions, and applicant requested a modification of these conditions as to time limit.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be installed a concrete curbing 12 inches in height above grade by 12 inches in depth along the building line, with not more than two driveway entrances on the boulevard front not exceeding 10 ft. in width; that no gasoline pump shall be erected within 10 ft. of the building line on the Woodhaven boulevard frontage; that any building erected thereon shall not exceed a height of one story, the exterior of which shall be finished with light-colored face brick with Spanish tile type roof; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action—November 27, 1928.

738-28-BZ.

APPLICANT—Frank Wall, for Southfield Coal and Ice Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of silos for the storage and distribution of coal.

PREMISES AFFECTED—East side of North Railroad avenue, between Liberty and Buel avenues, Dongan Hills, Borough of Richmond.

APPEARANCES—

For Applicant: Frank Wall.

For Opposition: C. A. Mulligan, Rose Primano and S. Cali.

THE RESOLUTION—

(738-28-BZ)

WHEREAS, Frank Wall, for Southfield Coal and Ice Co., Inc., owner, filed, September 13, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of silos for the storage and distribution of coal; premises east side of North Railroad avenue, between Liberty and Buel avenues, Dongan Hills, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that North Railroad avenue is in a business district, Liberty avenue is in a business district and Buel avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 11, 1928, reads:

"Your application, New Building Plan No. 1940/28 premises north side of Buel avenue, east side of North Railroad Avenue, filed for construction of concrete silos for coal yard, is hereby disapproved, being contrary to the Zoning Resolution as this section is in a business zone.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 286.41 ft. on North Railroad avenue, 109.37 ft. on Buel avenue and 27.99 ft. on Liberty avenue, upon which it is proposed to erect four reinforced concrete silos (for the storage of coal) 16 ft. in diameter and 40 ft. high, grouped and erected as a unit with the necessary machinery for handling coal and consequent appurtenances; and

WHEREAS, the plot fronts on the railroad right-of-way and on Buel avenue, 85 ft. on the railroad, the entire remainder of the block on the railroad right-of-way being occupied by a coal and wood yard; and

WHEREAS, it is proposed to erect four concrete circular coal pockets fronting on the railroad right-of-way abutting the existing coal yard; and

WHEREAS, the applicant has filed consents of all property facing his premises from Liberty avenue to Buel avenue; and

WHEREAS, the board deems that it is a proper case for a variation under hardship and a local community requirement, supported by a preponderance of consents of property immediately affected.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed coal pockets shall be erected within 50 ft. of the railroad right-of-way and set back not less than 30 ft. from the Buel avenue building line; that the entire North Railroad avenue frontage shall be maintained as a driveway, enclosed by a fence wall of approved masonry not less than 8 ft. in height above fixed grade, with egress to and from the premises through this driveway on the Liberty avenue front; that there shall be not more than two vehicular entrances on the Buel avenue front; that all coal stored on these premises shall be housed under cover, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(384-28-BZ)

WHEREAS, John Morrison and Marie Morrison, applicants and owners, filed, April 23, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and extension in area and height of a dry cleaning factory building; premises 2737 27th street, east side, 186 ft. north of 30th avenue (also known as 20 Cooper street), Astoria, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 27, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 27th (Cooper) street is in a residence district, Buchanan place is in a residence district and Grant (30th) avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 22, 1928 (re Alt. No. 1080-28), reads:

"The extension of a factory in a residence district is prohibited by the Zone Law.";

and

MINUTES

WHEREAS, the building is of non-fireproof construction, two stories in height, with a frontage of 75 ft. and a depth of 104 ft.; it is proposed to erect a two-story extension, 49 ft. 10½ in. by 24 ft. at front, north side of the building, and a two-story extension, 19 ft. 5¾ in. by 28 ft. at rear, south side of the building, and also a one-story five-car garage, 37 ft. by 40 ft. at rear, north side of the building; all new work to be of fireproof construction and the entire premises to be used for a dry cleaning factory within a residence district; and

WHEREAS, the application is for an addition to an existing business conducted on these premises and in the same ownership prior to the adoption of the building zone resolution, the board is empowered to exercise its discretion under section 7, subdivision a.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the addition to the existing factory on the Cooper street front shall be erected at the northerly end of this property and shall not exceed in height two stories above grade for the use and occupancy of the operators of the business now conducted on the premises; that the proposed garage located at the northerly end to the rear of the premises shall be a one-story structure in height, fireproof, the rear and gable walls of which shall be unpierced throughout their entire height and length; that the use and occupancy of this garage shall be limited to five motor vehicles, the property of the owner operating the premises and used in the conduct of his business, and to further permit the ex-

tension of one wing, approximately 19 ft. by 28 ft. at the southerly rear corner of the premises, on condition that the rear and southerly gable walls of this southerly extension shall be unpierced throughout its entire height and length; that there shall be no additional advertising or signs displayed that are not now existing on the premises; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

AREA FIXED.

(879-28-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of a gasoline service station; premises 5843-5855 Kings Highway and 24-34 East 59th street, Borough of Brooklyn.

The following area was approved by the board:

Both sides of East 59th street and also of Kings Highway from Church avenue to a point 100 ft. north of Linden avenue; both sides of East 58th street from Kings Highway to Linden avenue; the south side of Linden boulevard from East 59th street to Remsen avenue; the west side of Remsen avenue from Linden boulevard to a point 200 ft. south of Linden boulevard.

Adjourned 4.00 p. m.

THE RESOLUTION—

(559-28-S)

WHEREAS, William F. Doyle, for Louis Dreiling, owner, filed, June 22, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 131-133 Lee avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 21, 1927 (Order No. 26226-LD), reads:

"1. Discontinue the use of the above premises which is occupied for manufacturing purposes in violation of Sec. 270 of the Labor Law. Defects noted are as follows:

"1. No second means of exit provided.

"2. The interior exit stairway is not constructed of incombustible material and less than 44" wide.";

and

WHEREAS, the building is non-fireproof, two stories (25 ft. 6 in.) in height, 39 ft. by 133 ft. 4 in. in area; OCCUPIED: 1st story, stores and moving picture theatre, seating 550 persons; 2nd story, factory, 5 persons; EXITS: an interior wooden stairway (52 in. and 43 in. wide), extending from the first story to second story, enclosed in metal lath and plaster partitions with metal-covered wood doors at openings; a proposed fire escape balcony on the second story level at the front of the building, with drop ladder in guides to street; ROOFS of adjoining buildings: about 10 ft. higher; and

WHEREAS, petitioner requests, in view of the light occupancy of the second story, the acceptance of the existing means of egress from this story.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

581-28-S.

PETITIONER—Sloan Sporting Goods Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in an order of the superintendent of buildings.

THE RESOLUTION—

(581-28-S)

WHEREAS, Sloan Sporting Goods Co., Inc., owner, filed, June 29, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the superintendent of buildings, affecting premises 88 Chambers street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated August 17, 1927 (Order No. 902-27), reads:

"In that of failing to provide counterbalanced stairs from second story balcony to street as called for on approved plans. You are hereby directed to make said

work conform to the approved plans or secure the approval of this Bureau by filing an amendment for the work as done.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 75 ft. 1 in. in area at first and second stories and 25 ft. by 65 ft. in area above; OCCUPIED: 1st story, store, 7 persons; 2nd story, office, 3 persons; 3rd and 4th stories, manufacture of rubber stamps, 9 persons on the two stories; 5th story, storage, no occupancy; EQUIPPED with a sprinkler system in the cellar and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in wood partitions with fireproof doors at openings; a fire escape on the front of the building having fireproof openings along the course thereof, extending from the second story to the top story with a drop ladder to the sidewalk; ROOFS of adjoining buildings: same height at east and west; and

WHEREAS, the petitioner claims that the occupancy is non-hazardous and the exits are adequate; that a counterbalanced stairs would obstruct the light, also hinder access and egress from the building; furthermore, the petitioner proposes to provide a drop ladder in guides in lieu of a counterbalanced stairs.

Resolved, that the order of the superintendent of buildings be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

THE RESOLUTION—

(623-28-S)

WHEREAS, Gronenberg & Leuchtag, for Cooper Square Holding Co., owner, filed, July 18, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 28-30 Cooper square, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 12, 1928 (re N. B. App. 113-1928), reads:

"4. Windows should comply with Section 264 Labor Law and Rule 503 Industrial Code.";

and

WHEREAS, the building is fireproof, ten stories in height, 49 ft. 10 1/4 in. by 113 ft. 6 3/8 in., irregular, in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing, 70 persons per story; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first, mezzanine and second stories in the street walls of the building glazed with 1/4-inch thick plate glass set in metal frames, said frames being partly fixed and partly hinged; the maximum of the glass on the first story being 12 ft. 8 1/4 in. by 8 ft. 2 in.; on the mezzanine story being 4 ft. by 4 ft. 3 in., and on the second story being 6 ft. 6 1/4 in. by 5 ft. 8 in.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of the first and second stories, *on condition* that no light of glass

MINUTES

above the first story shall exceed a width of 4 ft.; that these openings shall be equipped with approved metal frames and sash, glazed with 1/4-inch polished plate glass, and that the requirements of the labor law be complied with in all other respects.

THE RESOLUTION—

(610-28-S)

WHEREAS, John J. Gilmartin, for Rambusch Decorating Co., owner, filed, July 13, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 332 East 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 6, 1928 (Order No. 40366-LD), reads:

"1. Arrange fire escape on rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 284 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following:

"(b) No fireproof passageway from lower termination of fire escape to street."

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 95 ft. in area; OCCUPIED by one tenant as a metal working establishment: 1st story, 10 persons; 2nd story, 10 persons; 3rd story, 3 persons; 4th story, 3 persons; EXITS: an interior wooden stairway, extending from the first story to top story (with iron ladder to scuttle in roof), enclosed in partitions constructed of wood, covered on both sides with 1/2-inch plaster boards, with wood doors at openings, with a 60-degree fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the rear yard, with EGRESS from the termination of the fire escape by means of door in fence leading to yards of premises to east and thence through hallways at yard level leading to street; ROOFS of adjoining buildings: 8 ft. higher; and

WHEREAS, petitioner, in view of the light occupancy and non-hazardous use of the premises, requests the acceptance of the existing means of egress.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear fire escape, on condition that a doorway in the fence leading to the open yard of the two adjoining premises to the east, namely 234-236 East 38th street, be maintained, with egress from the adjoining yards through hallway of tenement house direct to the street, on condition that the fire escape shall otherwise comply with the labor law in all respects and the building be not increased in height or area and so long as the occupancy remain unchanged.

319-28-S.

PETITIONER—Julian Roth, for 45th Street and Third Avenue Corp., owner.

SUBJECT—Application for reopening—Amendment—Variation of the labor law as cited in a decision of the superintendent of buildings.

PREMISES AFFECTED—235-247 East 45th street, Manhattan.

APPEARANCES—

For Petitioner: Julian Roth.

ACTION OF BOARD—Petition reopened and resolution amended.

THE RESOLUTION—

(319-28-S)

WHEREAS, Julián Roth, for 45th Street and Third Avenue Corp., filed, April 6, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 235-247 East 45th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 15, 1928 (N. B. Applic. No. 1-1928), and amended March 20, 1928, reads:

"This amendment is disapproved with the following objection:

"9. Fireproof windows with panes over 720 square inches are unlawful. Sec. 264 Labor Law."

and

WHEREAS, the building, in course of construction, is fireproof, sixteen stories in height, 150 ft. by 100 ft. 4 1/4 in. in area; OCCUPIED: showrooms and manufacturing, 110 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: a fire tower; an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use 1/4-inch plate glass in the front street windows, the maximum size of glass at first story 9 ft. 2 in. by 16 ft. 2 in., at mezzanine floor 2 ft. 6 in. by 5 ft. 8 in. and at second story 7 ft. 6 in. by 7 ft. 8 in.; and

WHEREAS, this petition was granted, as to the first story, by the board, at its meeting, October 30, 1928, and petitioner requested a reopening of the case and a variation as to the mezzanine and second stories.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the front of the building, first, mezzanine and second story, on condition that no light of glass above the first story shall exceed a width of 4 ft.; that the openings be equipped with approved metal frames and sash, glazed with 1/4-inch polished plate glass, and that the requirements of the labor law be complied with in all other respects.

THE RESOLUTION—

(634-28-S)

WHEREAS, Sidney L. Strauss, for Addie A. Steeger, owner, filed, July 26, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 142-154 East 32nd street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 18, 1928, read:

"Order No. 39164-LD:

"1. Enclose the interior stairway at west side of building, serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Sec. 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.";

and

"Order No. 39166-LD:

"1. Provide free and unobstructed passageway 36" wide so as to connect interior stairways east and west sides of building. Sec. 271 of the Labor Law.";

and

WHEREAS, the building is fireproof, six stories (70 ft.) in height, 108 ft. 4 in. by 89 ft. in area; OCCUPIED: 1st story, warehouse, 11 persons; 2nd story, printing and manufacture of art objects, 39 persons; 3rd story, printing, 26 persons; 4th story, laboratory, 43 persons; 5th story, printing and manufacture of art novelties, 28 persons; 6th story, manufacture of furniture, 17 persons; EQUIPPED with a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the first story to roof; easterly stairway enclosed in fireproof partitions with fireproof doors at openings; the westerly stairway opening on each story to a public stair and elevator hall which is enclosed with fireproof partitions with fireproof doors at the openings therein; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the first story balcony, with EGRESS from the termination of the fire escape by means of a door leading into the premises at the rear; ROOFS of adjoining buildings: to west, 20 ft. lower; and

WHEREAS, petitioner, in view of the presence of the existing fire escape on the rear of the building, requests the acceptance of existing conditions.

Resolved, that the order of the fire commissioner, Order No. 39166-LD, Item 1, be and it hereby is *affirmed*, and that the petition as to this order be and it hereby is *denied*.

Resolved, further, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 39164-LD, Item 1, affecting the westerly stairs, *on condition* that the public corridor enclosing stairs shall be constructed of fireproof material with openings therein equipped with self-closing fireproof doors, opening out.

THE RESOLUTION—

(675-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for St. James Church, owner, filed, August 16, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 94 Chambers street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 9, 1928 (Order No. 36936-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3' throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Sec. 273 of the Labor Law.

"2. Enclose the interior stairway on the 1st story with partitions of fire resisting material, same extending from floor of 1st story to underside of the 2nd story, rule 7, Board of Standards and Appeals, adopted Feb. 23, 1927.";

and

WHEREAS, the building is non-fireproof, five stories (64 ft. 3 in.) in height, 24 ft. 9½ in. by 75 ft. 1 in. in area at first story and 29 ft. 9½ in. by 62 ft. 6 in. in area above; OCCUPIED: 1st story, restaurant, 6 persons; 2nd story, printing, 6 persons; 3rd story, electro typing and engraving, 5 persons; 4th story, vacant at present; 5th story, printing, 5 persons; EXITS: an interior wood stairway, extending from the first story to top story (with iron ladder leading to scuttle in roof), enclosed in wood sheeting, fire-retarded on store side of first story, with wood doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the main roof of the first story extension, with EGRESS from the termination of the fire escape by means of adjacent one-story extension roofs at rear and to the west; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends that the plans for the present fire escape were approved by the bureau of buildings under Alt. 1840-16 based on a letter from the labor department, stating that the industrial commission had adopted a resolution on May 16, 1916, accepting the proposed fire escape and egress therefrom; regarding Item No. 2, which calls for the enclosure of the stairway in the first story due to the restaurant occupancy, would state that the stairway is now enclosed in the first story with wood boards on the hall side and wire lath and cement mortar on the store side.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, Order No. 36936-LD, *on condition* that an iron balcony be provided from the rear of the second story with iron stairs to five connecting extension roofs of the premises immediately to the rear on Warren street, with exit to the street through five buildings on Warren street, and *granted*, as to Item 2, *on condition* that the stair side of the first story stair enclosure be finished with cement mortar on wire lath, so long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION—

(674-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Morris Angrist, et al., owners, filed, August 16, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 40 East Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 5, 1928, reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.

"2. Arrange the fire escape on rear of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals.

"Among the defects noted are the following:

"1. No balcony on 3rd story."

and

WHEREAS, the building is non-fireproof, five stories (55 ft. 9 in.) in height, 25 ft. by 66 ft. 8 in. in area at first story and 28 ft. by 46 ft. in area above; OCCUPIED: 1st story, stores, 8 persons; 2nd story, altering clothing, 3 persons; 3rd story, cutting clothing, 2 persons; 4th story, manufacturing clothing, 6 persons; 5th story, manufacturing cloaks, 8 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof story, enclosed in metal lath, covered on both sides with Portland cement mortar partitions, with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the main roof to the roof of the second story extension, leading thence to the first story extension roof, with EGRESS from the termination of the fire escape by means of adjacent roofs of one-story extension to the east; ROOFS of adjoining buildings: to east, one story lower; to west, same level; and

WHEREAS, petitioner requests, in view of the light occupancy of the premises, the acceptance of the existing means of egress from the termination of the fire escape, and as to the required balcony at the third story level, contends that a similar violation was dismissed as complied with by the State Department of Labor under photo 1096, which is part of the present fire department record, and also plans for this work showing the construction and egress were filed with and approved by the bureau of buildings at that time, and there has been no change in conditions since that time.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that the easterly parapet of the rear first story extension be cut down to the level of the roof of adjoining premises to the east, with egress from the roof

of the adjoining easterly extension through plain glass windows to the next adjoining building, easterly, and also down a fire escape balcony to the yard of the premises to the rear; that egress from the three yards of the premises to the rear shall be maintained open and unobstructed, and granted, as to Item 2, so long as existing fire escape stairs from the fire escape on the third story be maintained to the roof of the second story extension, and that egress from the third story be maintained by fireproof doorway to the roof of the second story extension, so long as conditions as to occupancy and use remain substantially unchanged and the building be not increased in height or area.

THE RESOLUTION—

(508-28-S)

WHEREAS, John J. Gilmartin, for Charles Weisbecker, Inc., owner, filed, June 4, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 268-270 West 125th street and 267-269 West 124th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 24, 1928 (Order No. 12033-LD), reads:

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted are the following: Windows on course not fireproof, self-closing. No steps to sills. No balcony from top story to roof. No balcony at second story. No counterbalanced stairway from lowest balcony. No safe passageway to street from termination.";

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 202 ft. in area at first story and 50 ft. by 90 ft. in area above; OCCUPIED: 1st story, market; 2nd story, bakery, 10 persons; 3rd story, office, 25 persons; 4th story, grocery storage, 3 persons; 5th story, manufacture of sausages, 5 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear wall of the building, having fireproof openings along the course thereof, extending from the main roof to roof of first story extension, with no safe means of EGRESS from the termination of the fire escape to street; ROOFS of adjoining buildings: 15 ft. lower at west; 30 ft. lower at east; and

WHEREAS, the petitioner claims that the entire fire department order will be complied with except the "passageway to street from termination of fire escapes," and proposes to provide a sliding drop ladder in guides from the

MINUTES

roof of first story extension leading into a 25-foot court adjoining at west, where egress may be had through hallways of tenements to the street; furthermore, the petitioner contends that safe egress could be provided from roof of first story extension to 125th street due to a large marquise which covers the front and used for electric sign.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to no platform on the second story, *on condition* that there be provided at the rear of the second story to roof of extension an approved fireproof casement door; *granted*, as to counterbalanced stairway to lowest balcony, *on condition* that an opening in the westerly parapet at the level of the one-story extension roof be provided and that an iron balcony with stairway and intermediate balcony be erected on the easterly gable wall of the rear extension, the lowest balcony to be not more than 12 ft. above yard grade of adjoining premises to the west, with counterbalanced drop ladder in guides from lowest balcony of this exterior iron stairs to the yard level, with egress from yard of the adjoining premises to the west through hallway to street; iron steps with platform shall be provided from the grade of the yard level to the sill of any one window in the wall of the adjoining building, so long as conditions as to occupancy and use remain unchanged.

RULES

FACTORY EXIT RULES ADOPTED FEBRUARY 23, 1927.

64-27-SR

STANDARD FACTORY EXITS

Section 1—Fire Escapes.

Rule 1. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ($\frac{1}{2}$) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grille work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ($1\frac{1}{2}$) inch mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees.

Rule 2. In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, five stories or less in height, one of the required means of exit under Section 271 of the Labor Law may consist of an outside iron fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, Labor Law.

(b) Existing fire escapes shall comply with all the provisions of Section 274, Labor Law and in addition thereto

(1) The balconies shall be not less than 3 feet in width.

(2) The rails around balconies and well holes and on stairways shall be not less than 3 feet in height.

(3) Passageways on the balconies shall be not less than 14 inches in the clear.

(4) At least one opening to each balcony shall be a single fireproof casement door at least 2 feet wide and at least 6 feet in height, except that where the distance between the sill and lintel will not permit of an opening 6 feet in height, a casement door not less than 4 ft. 6 in. in height will be permitted.

RULES

Rule 3. The single fireproof casement doors leading to all fire escape balconies shall open out and shall be self-closing. An easily operated door lock with knobs on both sides of the door shall be provided.

Such fire doors may be at window sill level if fixed iron step at least two feet wide, with risers not exceeding eight (8) inches, and treads not less than eight (8) inches are provided on the inside from floor level to sills properly secured.

Rule 4 (a) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to the provisions of these rules.

(b) A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

Rule 5. All fire escapes shall be maintained structurally safe, properly painted, and kept clear of all obstructions.

Section 2—Enclosure of Factory Stairways.

Rule 6. Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest point of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Three	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Five	Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, goods, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions may stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with ventilating sections at the top floor.

All openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied on any factory floor by the same occupant

Rule 7. Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy, the interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

Rule 8. Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law, or rule 2 of these rules. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof, except on the front of buildings.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 9. Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part

RULES

of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 7 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

Rule 10. Storage of Combustible Material Within Factory Stairway Enclosures.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

Section 3—Safe Egress from Roofs of Factory Buildings.

Rule 11. Interior stairways serving as required means of exit in factory buildings erected after October 1, 1913, and not exceeding five stories in height, and in buildings erected before October 1, 1913, now occupied or to be occupied as a factory, shall not be required to extend to the roof where there is no safe egress from the roof, under Sections 270, 271 and 272, Labor Law.

(a) When the roofs, or the top of the parapet wall of an adjoining building are more than eight feet below or more than five feet above the top of the parapet wall of the building in question, and there is no outside party wall fire escape, party wall exterior screened stairway, party wall balconies or bridges, or where any outside exits do not connect to adjoining buildings at roof level, or where there are no unbarred window openings five feet above the roof or parapet wall of the building in question.

(b) When the roof of the building in question has a pitch exceeding one foot in six feet of horizontal run.

Rule 12. (a) When there is no safe egress from the roof, as above described, there shall be in all cases at least a double-rung ladder at the top of the interior stairway, and within the interior stairway enclosure when stairway is enclosed. Such ladder shall be at least 18 inches in width and shall be properly secured at top and bottom. The ladder shall lead to a scuttle opening not less than 2 feet by 3 feet or be of such additional area as may be required to provide ample head room. The scuttle cover shall be hinged and of light weight construction, or be counter-balanced. An easily operated hook may be provided on scuttle cover.

(b) Where the stair bulkhead door opens within 10 feet from the open edge of the roof, an iron railing properly braced at least 3 feet high and at least 10 feet long shall be provided at the edge of roof.

SUBSTANDARD FACTORY EXITS.

Section 4—Fire Escapes.

Rule 13. When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be maintained structurally safe, properly painted, and with the openings leading thereto, kept in good repair.

In lieu of a counter-balanced stairway, a drop ladder in guides with a back-drop gravity hook may be provided.

The drop ladder shall be of sufficient length to reach from the lowest balcony to the ground or safe landing place, with a passageway opening cut in the balcony rail, which rail shall be properly braced.

When such substandard fire escapes are located in a court, side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, to the roof of adjoining extensions, or other means of egress satisfactory to the authorities having jurisdiction.

Substandard fire escapes shall be kept clear of all obstructions, shall not be used for fire drills, and shall not be considered as a basis for increase in occupancy.

Section 5—Stairways and Bridges.

Rule 14.—Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

Rule 15.—Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided as required for substandard fire escapes in subdivision a.

Rule 16.—Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

Rule 17. No sign of any character shall be placed at openings leading to these sub-standard exits.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, December 4, 1928, 10 a. m.

Minutes of Regular Meeting, December 4, 1928, 2 p. m.

Correction.

Rules of Procedure.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

THE LIBRARY OF THE

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 11, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 18, 1928, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

CALL OF CLERK'S CALENDAR

TUESDAY, DECEMBER 11, 1928, 2 P. M.

Building Zone Cases.

558-28-BZ.
APPLICANT—Philip Freshman, for Lilly Realty Co., owner.

PREMISES—1664-1678 Eleventh avenue, northwest corner of Prospect avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT, partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and, also, a gasoline service station.

605-28-BZ.

APPLICANT—William Weintraub, for Frank Morea, owner.

PREMISES—Southwest corner of Queens boulevard and Hillyer street, Elmhurst, Borough of Queens.

APPLICATION, under sections 7c and 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

621-28-BZ.

APPLICANT—Samuel Rosenblum, for Isaac Morganstein, owner.

PREMISES—1182 Sutter avenue, south side, 40 ft. west of Crystal street, Brooklyn.

APPLICATION, under sections 7f and 21 of the building zone resolution,

TO PERMIT in a business district the maintenance of an iron works for a temporary period.

630-28-BZ.

APPLICANT—Cellar & Kraushaar, for Arseekay Syndicate, owner.

PREMISES—Southwest corner of Liberty avenue and 78th street, Woodhaven, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

650-28-BZ.

APPLICANT—William Holt, for Tomas Adikes, owner.

PREMISES—144-08 to 144-18 91st avenue, south side, 133 ft. west of 146th street, Jamaica, Borough of Queens.

APPLICATION, under section 7g of the building zone resolution,

TO PERMIT in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

662-28-BZ.

APPLICANT—Allen & Mencaccy, for Boom Construction Corp., owner.

PREMISES—Northeast corner of Grand avenue and 72nd place, Maspeth, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

672-28-BZ.

APPLICANT—Hallinan & Groh, for William Zagarino, owner.

PREMISES—Northeast corner of Van Wyck boulevard and Lincoln avenue, Jamaica, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

150-28-BZ.

APPLICANT—William Lyman, substituted for William Farrell, for Bronx Architectural Iron Works, owner.

CALENDAR

PREMISES—850 East 221st street, The Bronx.
APPLICATION, under section 21 of the building zone resolution,
TO PERMIT in a residence district the maintenance of the use and occupancy of an existing building for the manufacture of iron and steel works.

866-28-BZ.

APPLICANT—John J. Dorman, for City of New York, owner.

PREMISES—27-12 to 27-16 Kearney street, west side, 100 ft. south of 27th avenue, Elmhurst, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district and also in an "E" area district the erection and maintenance of a fire house, without a rear yard and less than 10 ft. from the street line, and also to occupy a greater per cent of the lot than permitted under the zone resolution.

867-28-BZ.

APPLICANT—John J. Dorman, for City of New York, owner.

PREMISES—44-01 244th street, Douglaston, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district and also within an "E" area district the erection and maintenance of a fire house, without a rear yard, and less than 10 ft. from the street line, also to construct an outer court less than 5 ft. in width and occupy a greater per cent of the lot than permitted under the zone resolution.

DECEMBER 11, 1928, 10 A. M.

Appeals from Administrative Orders.

24-28-A—2-12 West 34th street, Manhattan.

566-28-A—429-435 East 23rd street, Manhattan.

587-28-A—423-435 East 56th street, Manhattan.

609-28-A—1319 Metropolitan avenue, north side, 522 ft. east of Newtown Creek, Maspeth, Borough of Queens.

617-28-A—117-125 Adams street and 54-62 Prospect street, southeast corner, Brooklyn.

679-28-A—329-331 West 15th street, Manhattan.

686-28-A—408-438 Fulton street, southeast corner of Galatin place, Brooklyn.

817-28-A—490-538 Hamilton avenue, Brooklyn.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, December 11, 1928, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 386-28-BZ—Application, April 24, 1928, under section 21 of the building zone resolution, of Julius Eckman, applicant, on behalf of Jack M. Hoffman, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises west side of Flatbush avenue, 120 ft. south of Avenue R, Brooklyn.

CAL. NO. 387-28-BZ—Application, April 24, 1928, under section 21 of the building zone resolution,

of Julius Eckman, applicant, on behalf of Stollkester Holding Co., owner, to permit in a residence district the erection and maintenance of a gasoline service station; premises 1445-1455 East 29th street, Brooklyn.

CAL. NO. 255-28-BZ—Application, March 23, 1928, under sections 7g and 21 of the building zone resolution, of William F. Doyle, applicant, substituted for Charles Schaefer, Jr., on behalf of Wm. A. Taylor Building Co., Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 1676-1678 Jerome avenue, east side, 165 ft. north of East 174th street, The Bronx.

CAL. NO. 294-28-BZ—Application, April 2, 1928, under section 21 of the building zone resolution, of Arthur M. Spiro and Joseph Spiro, applicants and owners, to permit in a business district the erection and maintenance of a coal yard and coal pockets; premises north side of Great Kills road, 111 ft. west of Amboy road, Great Kills, Borough of Richmond.

THE RESOLUTION—

(658-28-A)

WHEREAS, White Construction Co., Inc., for Ideal Chair Co., lessee, filed, August 7, 1928, an appeal from an order of the superintendent of buildings, affecting premises south side of Grand street, 150 ft. west of Garrison avenue, Maspeth, Borough of Queens; and

WHEREAS, the order of the superintendent of buildings, dated July 18, 1928, reads:

"You will please notice that there exists a violation of the Building Code at the premises hereinafter described, in that

"Sec. 563

"Operating two freight elevators without a certificate from this Bureau. Shaft doors are not equipped with electric contacts, in that cars are not provided with gates at the rear openings of same.";

and

WHEREAS, the building is of reinforced concrete construction, three stories (42 ft.) in height, 100 ft. by 400 ft.

in area; OCCUPIED for the manufacture and storage of furniture: 1st story, 80 persons; 2nd story, 150 persons; 3rd story, 75 persons; and

WHEREAS, the appellant claims that the freight elevators marked A and B on plans are affected by the order; that these elevator shafts are enclosed with 6-inch terra cotta blocks, with all openings provided with fireproof doors of the Peelle Company manufacture; furthermore, the appellant contends that upon inquiry it was learned that the Bureau of Buildings of Manhattan does not require electric interlocks or other locking devices to insure the shaft doors being closed before the cars may start on freight elevators where the openings are provided with Peelle Company's type of door, also that car gates are not required on freight elevators.

Resolved, that the order of the superintendent of buildings be and it hereby is affirmed, and that the appeal be and it hereby is denied.

THE RESOLUTION—

(644-28-A)

WHEREAS, Wander & Kaufman, Inc., lessee, filed, July 30, 1928, an appeal from an order of the fire commissioner, affecting premises 62 West 47th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 13, 1928 (Order No. 44133-LC), reads:

"You are hereby notified that an inspection of premises 62 West 47th Street, Manhattan, used for the storage and use of oxygen, shows that the following must be done before permit requested by you can be issued:

"1. Have each operator of a blow-pipe or other similar device or apparatus for heating, melting or welding, apply for and secure a Certificate of Fitness. Examinations every day from 9 A.M. to 3 P.M., Room 1100, Municipal Building. Each applicant must file two unmounted photographs at least 2 x 3 inches.";

and

WHEREAS, the building is fireproof, sixteen stories in height, 118 ft. by 100 ft. 5 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing (mostly jewelry), approximately 40 persons per story; appellant occupying a portion of the northerly section of the twelfth story as a manufacturing jeweler; and

WHEREAS, appellant contends that there are two cylinders, each containing 220 cubic feet of oxygen, stored in the premises; that the persons operating the individual torches do not operate the oxygen regulator; that the large torch for melting platinum at the tank side is operated by a member of the firm who has a certificate of fitness; and

WHEREAS, the operation of the equipment noted in the order of the fire commissioner requires the use of oxygen and illuminating gas.

Resolved, that the order of the fire commissioner be and it hereby is granted on condition that the person operating the tank and the large platinum melting torch shall obtain

MINUTES

a certificate of fitness; that the tank shall be located at the front of the building adjacent to or near an open window; that the uses and occupancy of this portion of the premises shall be limited to manufacturing jewelry trade, and that the requirements of the labor law shall be complied with in all other respects.

619-28-A.

APPELLANT—The New York Edison Company, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—311 West 35th street, Manhattan.

APPEARANCES—

For Appellant: E. M. Van Norden.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Negative 0
Absent 0

THE RESOLUTION—

(619-28-A)

WHEREAS, F. W. Jesser, secretary of the New York Edison Co., appellant, filed, July 17, 1928, an appeal from a decision of the superintendent of buildings, affecting premises 311 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 11, 1928 (N. B. 485-27), reads:

"You are hereby notified that the building occupied as an Electrical Distributing Station and known as Number 311 West 35th Street, in the Borough of Manhattan, in the City of New York, does not conform to Section 392 of the Building Code, in respects noted below:

"In that of failing to carry up the chimneys of the east adjoining building as required by law.

"You are hereby directed to immediately stop all further work on said wall until chimneys of east adjoining building are carried up according to law.";

and

WHEREAS, the building is fireproof, four stories (74 ft. 11 in.) in height, 18 ft. by 98 ft. 9 in. in area; OCCUPIED as an electrical distributing station, 15 persons throughout the building; and

WHEREAS, the appellant, in lieu of carrying up independently in masonry as required, the chimney of No. 309 West 35th street, proposes to extend up the 4-inch by 12-inch flue in question in 18 gauge black iron (with riveted joints); the metal flue to be securely braced to the adjoining higher wall at intervals of about 7 ft. with iron hoops fastened in place with expansion bolts.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that a circular metal flue, not less than No. 10 gauge metal of lock-joint, spark proof, flue construction shall be erected, extending the existing flue on No. 309 West 35th street up to and not less than 3 ft. above the roof of No. 311 West 35th street, the premises creating the condition on which this order is based, and that the flue shall be securely fastened with iron brackets not less than 6 ft. apart in height of the wall with expansion bolts in wall of No. 311 West 35th street.

APPELLANT—Samuel Rosenblum, for Bordens Farm Products Co., Inc., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2840-2862 Atlantic avenue, 181-195 Schenck avenue and 250-270 Barbey street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(655-28-A)

WHEREAS, Samuel Rosenblum, for Bordens Farm Products Co., Inc., filed, August 6, 1928, an appeal from a decision of the fire commissioner, affecting premises 2840-2862 Atlantic avenue, 181-195 Schenck avenue and 250-270 Barbey street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered June 30, 1928, reads:

"Plan of fuel oil equipment as filed with this Bureau shows substantial compliance with Fuel Oil Rules adopted by the Board of Standards and Appeals, but standpipes are not shown to be provided in this building in accordance with Section 581, Article 28, Chapter 5 of the Code of Ordinances. You are therefore advised that a storage permit for fuel oil cannot be issued until the legal requirements for standpipe have been fully complied with.";

and

WHEREAS, the building is non-fireproof, one, two and three stories in height (48 ft.), 200 ft. 8 in. by 135 ft. to 176 ft. in depth, about 31,000 sq. ft. in area at first story and 23,500 sq. ft. in area above; OCCUPIED for the pasteurization and bottling of milk: 1st story, 38 persons; 2nd story, 25 persons; 3rd story, 20 persons; and

WHEREAS, the appellant claims that the building is divided into several sections; the northeast and southeast sections are fireproof and the first floor of the southwesterly section is fireproof; that each section is considerably less than 10,000 sq. ft. in area; furthermore, there is a covered driveway through the center of the building from street to street having all communicating openings on the south side provided with single fireproof sliding doors; and

WHEREAS, the order is predicated on an application for change of fuel from coal to that of oil burning equipment, affecting a group of buildings, no single unit of which exceeds an area of 10,000 sq. ft.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the structures as now subdivided remain substantially unchanged; that the buildings be not increased in height or area, so long as conditions as to operation and use remain unchanged, and that the fuel oil equipment shall be installed in accordance with the fuel oil rules of the board of standards and appeals.

1280-27-A.

APPELLANT—Samuel Rosenblum, for Nathaniel H. Lyons and Aljean Realty Corp., owners.

SUBJECT—Application for reopening—extension of time to complete work—re appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—289 Fulton street and 264 Washington street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

ACTION OF BOARD—Appeal reopened and time extended to complete work.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle 4
Negative 0
Absent: Chief Kenlon 1

MINUTES

THE RESOLUTION—

(1280-27-A)

WHEREAS, Samuel Rosenblum, for Aljean Realty Corp., owner, filed, December 6, 1927, an appeal from a decision of the superintendent of buildings, affecting premises 289 Fulton street and 264 Washington street, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered November 17, 1927 (re App. No. 23420-1926), reads:

"No one continuous building for lodging house purposes permitted.

"An open space between each house and rear end of lot required.

"And not more than 65 per cent of the lot shall be occupied. Contrary to Sec. 1315 of Chap. 19.";

and

WHEREAS, the premises consist of a plot of ground with a frontage of 26 ft. 7 2/3 in. on Fulton street and 22 ft. 11 in. on Washington street and a depth of 214 ft. 7 in., upon which is located two buildings, the one facing Fulton street being non-fireproof, four stories in height, with a depth of 125 ft. on the first and second stories and 40 ft. 2 in. on the third and fourth stories; the building facing on Washington street having a depth of 79 ft. 6 1/2 in. on the first and second stories and 55 ft. 2 in. on the third story; the building facing on Fulton street being OCCUPIED as a lodging house; and

WHEREAS, it is proposed to alter the building facing on Washington street, to cut openings in the division wall between the two buildings on the first and second stories, and to occupy the entire premises as a lodging house, the openings to be protected by fireproof sliding doors on both sides of the opening; the means of EGRESS consisting of an interior stairway in the Fulton street building, extending from the first story to the roof, enclosed in fire-retarding partitions; a proposed fireproof stairway in the Washington street building, extending from the first story to the roof, enclosed in fireproof partitions with fireproof, self-closing doors at the openings; the Fulton street building to be occupied by 38 persons on the first story; 57 on the second, and 16 on the third and fourth stories, respectively; the Washington street building to be occupied by 39 persons on the first story, 37 on the second story and 22 on the third story; and

WHEREAS, appellant contends that the buildings have been erected over thirty years; that the four-story building on Fulton street has been used as a lodging house for that length of time and has received permits from the various city departments and that alterations were made several years ago to comply with all legal requirements; that the three-story building has been used for a factory; that regarding the area of the lot occupied, which is more than 65 per cent, it is the intention to operate both buildings under one management and the connection between the buildings will facilitate operation; that through ventilation will be secured by providing the connection between the buildings; that the first and second stories are more than normal height, being 14 ft. and 15 ft., respectively, thus aiding ventilation; that as the Fulton street building is 125 ft. deep and the Washington street building 79 ft. 6 1/2 in. deep, there will be an improvement for both sections by making the proposed change, and that the proposed horizontal exits create a better physical condition for the Fulton street as well as the Washington street section and, also, numerous skylights have been provided in the extension roof; and

WHEREAS, these two buildings now exist back to back, and the Fulton street section is now authorized for occupancy as lodging house and the Washington street section occupied as factory; it is proposed to combine the both buildings by means of horizontal openings only with general use throughout both structures for lodging house purposes; and

WHEREAS, this appeal was granted by the board at its

meeting, May 15, 1928, on certain conditions, and appellant requested a modification of the time limit.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area; the horizontal opening at rear between both buildings shall be equipped with an automatic self-closing fireproof door; that there shall be provided at the rear on the existing Fulton street lodging house two skylights not less than 4 ft. by 11 ft. each in square area, one in each corner, equipped with an electric fan, the ventilating shaft to be provided with a fixed open louvre skylight at roof level; that the skylights as indicated on the plans filed in this appeal for the second story shall be provided; that the premises shall otherwise comply with all laws and ordinances applicable thereto; that all permits necessary shall be obtained within three months and any work involved thereby shall be completed within three months from December 4, 1928.

THE RESOLUTION—

(154-28-BZ)

WHEREAS, Hamill, Weinberg & Munro, substituted for

Philip J. Sinnott, for Harry Gillman, owner, filed, February 23, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a business building; premises northeast corner of Van Cortlandt avenue and Orloff avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 4, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Van Cortlandt avenue, Orloff avenue and Gale place are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 2, 1928 (re App. N. B. 68-28), reads:

"1. The proposed erection of a business building in the residence district is contrary to the provisions of the Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 48.74 ft. on Van Cortlandt avenue, 88.51 ft. on curved corner and 66.61 ft. on Orloff avenue; to be occupied as stores; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

514-28-BZ.

APPLICANT—Joel D. Marder, for Western Union Telegraph Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a two times height district the erection and maintenance of the street walls in excess of the height permitted under the zone resolution.

PREMISES AFFECTED—56-70 Hudson street, 150-166 West Broadway, 79-97 Thomas street and 2-24 Worth street, Manhattan.

APPEARANCES—

For Applicant: Joel D. Marder.

For Opposition: None.

THE RESOLUTION—

(514-28-BZ)

WHEREAS, Joel D. Marder, for Western Union Telegraph Co., Inc., owner, filed, June 5, 1928, an application, under the building zone resolution, to permit in a two times height district the erection and maintenance of the street walls of a building in excess of the height permitted under the zone resolution; premises 56-70 Hudson street, 150-166 West Broadway, 79-97 Thomas street and 2-24 Worth street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 4, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that Hudson street, Thomas street, West Broadway and Worth street are in two times height and unrestricted use districts; and

WHEREAS, the decision of the superintendent of buildings, rendered May 10, 1928 (re N. B. App. 278-28), reads:

MINUTES

"1. Building exceeds provisions of Section 8G of Building Zone Resolution for Hudson St. Front.";

and
WHEREAS, the building is to be of fireproof construction, twenty-one stories (327 ft.) in height, with a frontage of 180 ft. 10¼ in. and a depth of 254 ft. 8¾ in.; to be occupied as an office building; it is proposed to erect street wall to a height of 287 ft. 5¾ in. instead of 180 ft. as provided in two-times district; Hudson street being 90 ft. wide; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

337-28-BZ.

APPLICANT—Emil Guterman, for William J. Shuttleworth, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the change of occupancy of an existing five (5) car garage to a motor vehicle repair shop.

PREMISES AFFECTED—Southwest corner of Liberty avenue and Redding street, Woodhaven, Borough of Queens.

APPEARANCES—

For Applicant: Emil Guterman.

For Opposition: Charles E. Russell.

THE RESOLUTION—

(337-28-BZ)

WHEREAS, Emil Guterman, for William J. Shuttleworth, owner, filed, April 12, 1928, an application, under the building zone resolution, to permit in a business district the change of occupancy of an existing five (5) car garage to a motor vehicle repair shop; premises southwest corner of Liberty avenue and Redding street, Woodhaven, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 4, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Woodhaven boulevard is in a business district, Liberty avenue is in a business district, Redding street, south of a point 100 ft. south of Liberty avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 22, 1928 (re Alt. No. 912-28), reads:

"3. An automobile repair shop in a business district is prohibited by the Zone Law.";

and
WHEREAS, the premises consist of a plot of ground having a frontage of 61.49 ft. on Liberty avenue and 100 ft. on Redding street, upon which is located a dwelling, a gasoline service station, and at the southerly lot line a one-story building, 25 ft. by 60 ft. in area, now occupied as a five-car garage; it is proposed to use this structure as a motor vehicle repair shop; and

WHEREAS, the board deems that applicant is entitled to relief under section 21 of the building zone resolution and that the denial of this application would constitute a hardship upon the applicant.

Resolved, that the board of standards and appeals does

herby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the southerly gable wall of the structure erected on the premises shall be unpierced throughout its entire height and length; that any repairs conducted on the premises shall be confined within the structure erected on the rear of the plot, as described in this appeal, not exceeding an area of 25 ft. front by 60 ft. in depth and shall be restricted to manually operated repairs and adjustments incidental to the maintenance and conduct of a five-car garage; that there shall be no anvils or open forges maintained or operated on the premises, and that there shall be no machinery used in the conduct or operation of the work conducted on the premises other than a portable one-half horse power electric drill; that any public advertising displayed shall be restricted to one projecting sign on the front of the building, indicating the name and title of the business conducted therein; that this variation is granted for a period not to extend beyond two years from the date of this action.

309-28-BZ.

APPLICANT—William F. Doyle, for B. M. Maltz & Sons, Inc.

SUBJECT—Application for reopening—amendment to include decision of the superintendent of buildings in application—re application (re decision of the fire commissioner) under sections 7(g) and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(309-28-BZ)

WHEREAS, William F. Doyle, for B. M. Maltz and Sons, Inc., owner, filed, April 4, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 2323-2331 Flatbush avenue and 2370-2384 Utica avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 23, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Flatbush avenue and Utica avenue are in a business district and Avenue S is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered March 29, 1928, reads:

"1. A gasoline service station at the above location being in a business district may not be permitted. Appeal may be taken to the Board of Standards and Appeals. Sec. 4-6, Building Zone Resolution.";

and

WHEREAS, it is proposed to erect a cement block office, 20 ft. by 20 ft., bury four 550-gallon tanks and erect four pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, this application was granted by the board at its meeting, October 23, 1928, on the basis of a decision of the fire commissioner, and applicant now requests that the

MINUTES

board reaffirm its action on the basis of a decision of the superintendent of buildings, dated November 15, 1928, which reads:

"Application 19026-1928:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4 a, subdiv. 46.

"The installation of a gasoline service station in a business district. Denied."

Resolved, that the board of standards and appeals does hereby *reaffirm* its action of October 23, 1928, and *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected on the building line on both street fronts a concrete curbing not less than 12 in. in height and a triangular concrete platform not less than 10 ft. in depth and 12 in. in height from the intersection of Utica avenue with Flatbush avenue; that the proposed one-story building shall be finished on the exterior with white enameled brick with dark enameled brick trim; that the roof shall be of hip type, finished with variegated slate or Spanish tile; that there shall be not more than two vehicular openings in the concrete curbing on either street front; that the use, operation and sales of these premises shall be restricted exclusively within the property lines; that there shall be no crankcase service, grease racks or pits installed on the premises; that any signs or advertising display shall be restricted to that on the illuminated lamps of the gasoline pumps; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this action.

THE RESOLUTION—

(460-26-BZ)

WHEREAS, Eugene De Rosa, for C. B. M. Realty Corp., owner, filed, May 22, 1927, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a theatre and a business building; premises northeast corner of Fifth avenue and 50th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 26, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 50th street is in a residence district, that 49th street is in a residence district and that Fifth avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 23, 1927 (Applic. No. 6511-26), reads:

"Plans as submitted do not comply with resolution of the Board of Appeals insofar as the size of building is increased in area on 49th Street. Therefore you are

required to submit proposition for an amendment to Board of Appeals.";

and

WHEREAS, the proposed building is to be of fireproof construction, three stories in height, with a frontage of 136 ft. 9 in. on 50th street and 110 ft. 9 in. on 49th street and a depth of 200 ft. 4 in.; to be occupied as a theatre and business building; and

WHEREAS, the owners of more than 85 per cent of the property affected within the residence area of both street fronts have given consent; and

WHEREAS, the board considered the application specifically, supported by the property owners immediately affected; and

WHEREAS, this application was granted by the board at its meeting, July 26, 1927, on certain conditions, and applicant requested a modification of the time limit.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be no public entrance to the theatre on 50th street side of the building; that any doorway openings from the theatre shall be restricted to emergency exit use, required under article 25 of the building code; that there shall be no advertising signs or billboards erected or displayed within the residence use area of these premises; that there shall be no roof signs erected or maintained within the residence use area of premises; that the facades of the building on 49th and 50th streets shall be finished with natural stone or face brick with architectural terra cotta or stone trimmings; that the structure shall be erected strictly in accordance with article 25 of the building code, and that all permits necessary shall be obtained within nine months and any work involved thereby shall be completed within twelve months from the date of this action—December 4, 1928.

748-27-BZ.

APPLICANT—William F. Regan, for Antlers Holding Corp., owner.

SUBJECT—Application for reopening—extension of time to procure permits—application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

THE RESOLUTION—

(748-27-BZ)

WHEREAS, William F. Regan, for Antlers Holding Corp., owner, filed, June 27, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of 86th street and Gravesend avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 20, 1927, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Gravesend avenue is in a business district, 86th street is in a business district and Avenue X is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered June 24, 1927, reads:

MINUTES

"No. 4065-26:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals.";

and
WHEREAS, it is proposed to erect an office, bury two 550-gallon storage tanks and erect two pumps for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the applicant has filed more than 70 per cent of an area of consents applicable under rule of exception section 7g; and

WHEREAS, the applicant is estopped from obtaining the required 80 per cent consents because of the inactive interest of the ownership of the B. M. T. railroad repair shops on the opposite side of street, the board deems the application in this circumstance is justified under section 21; and

WHEREAS, this application was granted by the board at its meeting, December 20, 1927, on certain conditions, and applicant requested a modification of the time limit.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be no driveway to or from the plot on Gravesend avenue frontage and that the driveways to the property for the operation of this use shall be restricted to the 86th street frontage; that there shall be no driveway within 25 ft. of Gravesend avenue frontage on 86th street; that a concrete curbing not less than 18 inches in height and 12 inches in width shall be installed at the building line on the 86th street front, other than at the two driveways, which driveways shall not exceed a width of 9 ft. 6 in.; also this concrete curbing shall be erected on building line continuous throughout the entire Gravesend avenue frontage; that a wall of approved masonry shall be erected along the northerly property line of these premises, not less than 10 ft. in height, faced on exposed side with light-glazed brick, coped with architectural terra cotta or natural stone; that any building erected on these premises for use in conjunction with the business conducted thereon shall be finished on the exterior with light-colored glazed face brick with a parapet wall finished with a cornice of architectural terra cotta not less than 18 inches in girth; that any advertising display shall be restricted to plate glass windows in building erected on premises and to the illuminated globes of the oil pumps, and that all permits shall be obtained within six months and any work involved thereby shall be completed within six months from the date of this action—December 4, 1928.

THE RESOLUTION—

(1053-27-BZ)

WHEREAS, William F. Doyle, substituted for Henry J. Nurick, for Clarog Holding Co., owner, filed, September 26, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 665-687 Rogers avenue and 208-222 Clarkson avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 13, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Rogers avenue is in a business district, Clarkson avenue is in a business district and Lenox road is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 23, 1927 (re App. No. 12988-27), reads:

"1. The erection of public garage in a business district is contrary to Building Zone Resolution Art. 2, Sec. 4-15.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 200 ft. and a depth of 137 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the premises are now occupied by a public gasoline station and there are permits in force for the storage of twenty automobiles in a public garage; and

WHEREAS, the board of appeals, under Cal. No. 1420-23-BZ, did grant under the rule of exception 7, subdivision e, a public garage contiguous to this site; and

WHEREAS, this application was granted by the board at its meeting, March 13, 1928, on certain conditions, and applicant requested a modification of these conditions.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the structure shall not exceed two stories in height above grade, shall be fireproof throughout and shall have a roof of flat design and construction; that the rear and gable walls shall be unpierced throughout their entire height and length; that there shall be no vehicular opening on the Rogers avenue front, and that not more than one door opening, 3 ft. 8 in. in width, for emergency exit shall be permitted on the Rogers avenue front; that any ascending ramp incorporated above sidewalk level shall start at a point not less than 10 ft. inside the building line; that the exterior of the building on the street fronts shall be of attractive architectural design of Gothic treatment; that the facades on these streets shall be finished with light color natural stone or face brick with architectural terra cotta trim; that there shall be no roof signs; that there shall be no advertising of any nature or description other than an electric projecting sign on either or both street fronts, indicating the name and title of the business conducted on the premises; that all necessary permits shall be obtained within nine months and the work completed within eighteen months from the date of this action, and that the architect shall make a return to this board of elevation and plans for approval in accordance with the foregoing conditions before submission to the bureau of buildings.

THE RESOLUTION—

(585-28-BZ)

WHEREAS, William F. Doyle, for Clover Wet Wash Laundry, owner, filed, June 29, 1928, an application, under the building zone resolution, to permit in a business district the alteration and extension in height of a laundry building; premises north side of Clark street, 100 ft. west of Van Alst avenue, Long Island City, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 4, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Clark street, Van Alst avenue and Astoria avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 7, 1928 (re Plan No. Alt. 5825-27), reads:

"3. Extending a laundry in a business district is contrary to the Zone Law."

and

WHEREAS, the existing building is of frame construction, one story in height, with a frontage of 35 ft. and a depth of 100 ft.; occupied as a wet wash laundry; it is proposed to erect a second story, 35 ft. by 76 ft. 8 in. in area, over the existing one-story frame laundry building; the proposed story will be constructed of brick, supported by steel columns, provided with an exterior brick enclosed stairway in addition to an interior stairway, and occupied only for storage and office purposes within a business district; and

WHEREAS, there exists on the premises at present a one-story frame structure, 35 ft. wide by 100 ft. deep; and

WHEREAS, it is proposed to erect an additional story, 35 ft. by 76 ft. 8 in., of masonry construction, for the use of clerical force or such other business not specifically operating machinery or for the conduct of laundry work; and

WHEREAS, the board deems the applicant is entitled to relief under section 21, hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the existing frame structure shall be razed and removed in the first story; that a two-story building of approved masonry shall be substituted therefor, not exceeding in area the dimensions of the existing one-story building, namely, 35 ft. frontage by 76 ft. 8 in., with an extension of 23 ft. 4 in. by 35 ft.; that the use, conduct and operation of the wet wash laundry work shall be restricted and confined to the first story; that the use of the second story shall be restricted to conforming business use occupancy; that the second story shall be restricted to an area not exceeding 35 ft. in frontage and not more than 76 ft. 8 in. in depth; that the use, conduct and operation of this business shall be confined and restricted to the premises within the property lines; that there shall be no advertising of any nature or description other than one flat wall sign affixed to front wall at second story level, and that all permits re-

quired shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

1

THE RESOLUTION—

(569-27-BZ)

WHEREAS, William F. Doyle, for Delaney & Otten Co., Inc., owner, filed, May 20, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station (previously denied); premises southeast corner of Fourth avenue and 12th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 30, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourth avenue is in a business district; 12th street, east of a point 100 ft. east of Fourth avenue, is in a residence district, and 12th street, west of a point 100 ft. west of Fourth avenue, is in an unrestricted district; and

WHEREAS, the decision of the fire commissioner, rendered May 19, 1927 (re Plan No. 1300-27), reads:

"1. A gasoline service station may not be permitted in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 50 ft. on Fourth avenue and 97 ft. 10½ in. on 12th street, upon which it is proposed to erect a small accessory store and the necessary tanks and pumps for a gasoline service station; and

WHEREAS, a committee of the board personally inspected the premises under appeal and submitted a report recommending the favorable consideration of this variation; and

WHEREAS, the premises are now occupied by a prohibitive non-conforming use; and

WHEREAS, the applicant has filed with the board a preponderance of consents in excess of 60 per cent of affected owners of property on both street fronts and of all adjoining property owners as well as those opposite in all directions, the board deems that a denial of this application would constitute a hardship under section 21 of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, October 30, 1928, on the basis of a decision of the fire commissioner, and applicant now requests that the board reaffirm its action on the basis of a decision of the superintendent of buildings, rendered November 23, 1928, which reads:

"Application 19231-1928:

"Gasoline station in a business district is a prohibited

MINUTES

use contrary to B. Z. Resolution. Art. II, 4 a, 46, and is hereby denied."

Resolved, that the board of standards and appeals does hereby *reaffirm* its action of October 30, 1928, and *make* a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be erected along the southerly and easterly property lines a wall of approved masonry, battered or curved back from the building line at a rake not less than 45 degrees to the street front of the abutting buildings on both streets, said wall to be faced on the interior with light-colored enamel face brick panelled with dark-colored enameled brick; that the proposed structure shall not exceed a ground area of 20 ft. square or a height of one story above grade, finished on the exterior with light-colored enamel brick and dark-colored brick trim at all openings; that the parapet shall be coped with natural stone; that there shall be erected on the building line on both street fronts a concrete curbing not less than 12 in. in height above grade; that there shall be erected at the intersection of Fourth avenue and 12th street a concrete platform not less than 12 in. above grade in height and not less than 10 ft. in depth in both directions from the intersection of Fourth avenue and 12th street; that the gasoline pumps installed shall be located not less than 10 ft. from the building line formed by the intersection of 12th street and Fourth avenue; that the use, conduct and operation of the business shall be confined to and restricted within the property lines of the premises; that any advertising display shall be restricted to the frieze on the building erected thereon and the glass globes of the gasoline pumps; that all permits required shall be obtained within nine months and all work involved completed within one year from the date of this action.

WHEREAS, James J. Kearney, substituted for John J. Buckley, for James Scovell, owner, filed, April 24, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of Cross Island boulevard and Hollis avenue, Bellaire, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 4, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cross Island boulevard is in a business and residence district, Hollis avenue is in a business and residence district and 207th street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered February 9, 1928 (re Applic. No. N. B. 155-28), reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Standards and Appeals.";

and

WHEREAS, the decision of the superintendent of buildings, rendered November 8, 1928 (Plan No. N. B. 9617-28), reads:

"1. The extension of a gasoline station in a business district is contrary to building zone resolution.";

and

WHEREAS, it is proposed to erect a brick office, 20 ft. by 20 ft., bury two 550-gallon tanks and erect five pumps upon a lot 80.05 ft. by 92.80 ft., for the purpose of conducting a gasoline service station within a business district; and

WHEREAS, the application is predicated on the principle of section 7, subdivision g, requiring 80 per cent consents of the area fixed and deemed affected by the board; and

WHEREAS, the applicant has filed more than 87 per cent consents of the area fixed and deemed affected by the board; and

WHEREAS, the board believes that a denial of this variation would be a hardship within the intent and spirit of the zoning resolution and an arbitrary discrimination.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be built at a point not less than 20 ft. easterly from the existing building line a concrete curbing not less than 12 in. in width and not less than 12 in. in height above grade, with not more than two driveways thereto on either street front; that there shall be erected on the interior property lines of the plot a wall of approved masonry not less than 10 ft. in height, lined on the interior of the premises with light-colored face brick or enamelled face brick with face brick trim of dark color; that the wall shall be coped with natural stone or architectural terra cotta, moulded of a girth not less than 12 in.; that there shall be no advertising of any nature or description exposed, painted or planted on the exterior of the wall facing northerly; that the gasoline pumps installed on these premises shall be set back not less than 10 ft. from the building line; that the use, conduct, operation and sale of the gasoline shall be confined wholly within the property lines of these premises; that any grease racks installed shall be located within an enclosure of brick construction with arch openings thereto; that a return of the drawing shall be made to this board for approval before submission to the bureau of buildings, and that all permits shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

CASES DISMISSED.

Appeals from Administrative Orders.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duty:

(102-28-A)

Filed February 2, 1928—Premises 136-140 West 23rd street, Borough of Manhattan. Order of the fire commissioner. Appellant: Mark Ginsberg Co., Inc. Dismissed for lack of prosecution.

(333-28-A)

Filed April 9, 1928—Premises 237 Columbia street, Borough of Brooklyn. Order of the fire commissioner. Appellant: Alexander Oil Burner Corp. Dismissed for lack of prosecution.

MINUTES

(339-28-A)

Filed April 12, 1928—Premises 128 West 34th street, Borough of Manhattan. Decision of the fire commissioner. Appellant: Petroleum Heat and Power Co. Dismissed for lack of prosecution.

(368-28-A)

Filed April 19, 1928—Premises 61 Second avenue, Borough of Manhattan. Decision of the fire commissioner. Appellant: Petroleum Heat and Power Co. Dismissed for lack of prosecution.

(418-28-A)

Filed May 2, 1928—Premises 46-48 Myrtle avenue, Borough of Brooklyn. Decision of the fire commissioner. Appellant: Petroleum Heat and Power Co. Dismissed for lack of prosecution.

(423-28-A)

Filed May 5, 1928—Premises 290 Vernon avenue, Long Island City, Borough of Queens. Decision of the fire commissioner. Appellant: E. M. Wharff. Dismissed for lack of prosecution.

(452-28-A)

Filed May 17, 1928—Premises 254 West 34th street, Borough of Manhattan. Decision of the fire commissioner. Appellant: J. M. Seidenberg & Co. Dismissed for lack of prosecution.

(463-28-A)

Filed May 19, 1928—Premises 191-195 Canal place, Borough of The Bronx. Decision of the superintendent of buildings. Appellant: Frank C. Schmitz. Dismissed for lack of prosecution.

(467-28-A)

Filed May 21, 1928—Premises 3400-3406 Third avenue, Borough of The Bronx. Order of the fire commissioner. Appellant: Petroleum Heat and Power Co. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners	
Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders and decisions of administrative officials affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are dismissed for lack of prosecution.

Under the Building Zone Resolution.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duties:

(15-28-BZ)

Filed January 9, 1928—Premises southeast corner of Hillside avenue and 207th street, Queens Village, Borough of Queens. Decision of the superintendent of

buildings. Applicant: Stanley Jahoda. Dismissed for lack of prosecution.

(30-28-BZ)

Filed January 13, 1928—Premises southwest corner of Pitkin avenue and 79th street, Borough of Queens. Decision of the superintendent of buildings. Applicant: Philip J. Sinnott. Dismissed for lack of prosecution.

(31-28-BZ)

Filed January 13, 1928—Premises southeast corner of Central avenue and Pansy place, Ridgewood, Borough of Queens. Decision of the superintendent of buildings. Applicant: Philip J. Sinnott. Dismissed for lack of prosecution.

(135-28-BZ)

Filed February 11, 1928—Premises 236-240 West 50th street, Borough of Manhattan. Order of the fire commissioner and decision of the superintendent of buildings. Applicant: Jacob L. Diamond. Dismissed for lack of prosecution.

(293-28-BZ)

Filed April 2, 1928—Premises 35 Gunther place, Borough of Brooklyn. Decision of the fire commissioner. Applicant: Agostino Tirino. Dismissed for lack of prosecution.

(297-28-BZ)

Filed April 2, 1928—Premises 520 East 87th street, Borough of Brooklyn. Decision of the superintendent of buildings. Applicant: Henry J. Nurick. Dismissed for lack of prosecution.

(342-28-BZ)

Filed April 13, 1928—Premises northwest corner of Pitkin avenue and Woodhaven boulevard (Beddi street), Woodhaven, Borough of Queens. Decision of the superintendent of buildings. Applicant: William A. Lacerenza. Dismissed for lack of prosecution.

(357-28-BZ)

Filed April 17, 1928—Premises 127 Riverside drive, Borough of Manhattan. Decision of the superintendent of buildings. Applicant: Mary Feldman. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

THE RESOLUTION—

(670-28-S)

WHEREAS, Israel Rubenstein, for 347 West 39th Street Corp., owner, filed, August 15, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises

347-353 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 2, 1928 (N. B. Applic. No. 136), reads:

"9. Windows should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, fourteen stories in height, 90 ft. by 98 ft. 9 in. in area; OCCUPIED: 1st story, stores; upper stories, tenant factories, 50 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are windows in the street wall, on the first story of the building, glazed with 1/4-inch polished plate glass, the maximum area of the glass being 8 ft. by 9 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the first story of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the first story, street front, on condition that the openings be equipped with approved metal frames and sash, glazed with 1/4-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

425-28-S.

PETITIONER—Klein & Kavanagh, Inc., owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

PREMISES AFFECTED—207-209 East 120th street, Manhattan.

APPEARANCES—

For Petitioner: James T. Wallace.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon 5
Negative 0
Absent 0

THE RESOLUTION—

(425-28-S)

WHEREAS, Klein & Kavanagh, Inc., owners, filed, May 7, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 207-209 East 120th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 7, 1928, reads:

"1. Extend the interior stairway at the east side of building to the roof, as per Sec. 271 of the Labor Law.

"2. Arrange the fire escape on front of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provision of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law. Defects noted as follows:

"1. No fireproof doors on 2nd and 3rd stories.";

and

WHEREAS, the building is non-fireproof, three stories in height, 37 ft. 6 in. by 75 ft. 8 in. in area at first story and 37 ft. 6 in. by 62 ft. 2 in. in area above; OCCUPIED: cellar, storage; 1st story, manufacture of metal cornices, 4 persons; 2nd and 3rd stories, manufacturing, not more than seven persons above first story engaged at manufacturing; EXITS: an interior wood stairway, extending from the

MINUTES

first story to top story, enclosed in plaster on metal lath partitions with fireproof doors at openings; a fire escape on the front of the building having fireproof openings along the course thereof, extending from the second to third story, with cantilever ladder to sidewalk; ROOFS of adjoining buildings: 10 ft. higher at west; same level at east; and

WHEREAS, the petitioner claims, as to Item 1 of the order, that there is an outside balcony at rear of third story with an iron gooseneck ladder extended to roof, also a fixed iron ladder from third story to roof scuttle; that the extension of interior stairs to roof would involve considerable structural changes and expense; as to Item 2, that the fire escapes have been accepted by the superintendent of buildings as complying with the requirements of the labor law (a letter to such effect dated June 3, 1927, is filed with the papers); furthermore, the petitioner contends that the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that there shall be installed in the stair hall enclosure a skylight in the roof of the top story and one skylight within loft area, approximately 12 sq. ft. in area; granted, as to Item 2, only so far as it affects the requirement as to casement doors, on condition that steps shall be provided to within 18 inches of sill level; that the fire escapes shall comply with the labor law; that the building be not increased in height or area, and that the occupancy shall not exceed seven persons above the first story.

642-28-S.

PETITIONER—Croker Natl. Fire Prevention Eng. Co., for C. C. H. Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—872 Broadway and 28 East 18th street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE VOTE—

Negative

Absent

THE RESOLUTION—

(642-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for C. C. H. Realty Corp., owner, filed, July 27, 1928, a petition for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 872 Broadway and 28 East 18th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated April 3, 1928, read:

“Order No. 34972-LD:

“3. Extend the interior stairway at the east side of building to roof, as per Section 271 of the Labor Law.”;

and

“Order No. 34974-LD:

“Remove all articles and wares from stair enclosure, 1st story, as per Rule 10, Board of Standards and Appeals, adopted February 23rd, 1927.”;

and

WHEREAS, the building, irregular in shape, is non-fireproof, four stories (47 ft. 11 in.) in height, having a frontage of 34 ft. 3 in. on Broadway and 88 ft. 1 in. on East 18th street; OCCUPIED: 1st story, stores, 10 persons; 2nd story, retail clothier, 3 persons (2 being engaged at manufacturing); 3rd story, retail clothier, 3 persons (2 being engaged at manufacturing); 4th story, vacant at present;

EXITS: an interior wooden stairway, extending from the first story to top story (with double-rung iron ladder leading to scuttle in roof), enclosed in gypsum block partitions with wood doors at openings; a fire escape on the northeast front of the building, having fireproof openings along the course thereof, extending from the top story to the second story balcony, with EGRESS from the termination of the fire escape by means of counterbalanced stair to street; ROOFS of adjoining buildings: to east, same level; to south, 2 ft. lower; and

WHEREAS, there are located in the stair enclosure on the first story a shoe polishing stand with three chairs; and

WHEREAS, petitioner, as to Item 3 of Order No. 34972-LD, contends that if this interior stairway were extended to the roof as required by this violation the bulkhead itself would block any possible egress to the east, so that the conditions at present are better than would be the case if this order were complied with; regarding Item 1 of Order No. 34974-LD, petitioner contends that the stand being placed against the south wall of the building in no way interferes with or obstructs passage either up or down the stairway which terminates directly inside the street doors.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 3 of Order No. 34972, only so far as it affects the stairs at the top story to the roof, on condition that a fixed double-rung iron ladder be provided at the top stairwell hall enclosure to the scuttle in the roof.

Resolved, further, that Item 1 of Order No. 34974-LD of the fire commissioner is affirmed, and that the petition as to this order be and it hereby is denied.

MINUTES

BOARD OF STANDARDS AND APPEALS

*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Wednesday, November 7, 1928, as they appeared in Bulletin No. 46, Vol. XIII, are hereby corrected to read as follows:

THE RESOLUTION—

(159-28-BZ)

WHEREAS, William F. Doyle, for Hyman Chipkin and Meyer Chipkin, owners, filed, February 24, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of an extension to a motor vehicle repair shop, also the change of occupancy from a stable for more than five horses to a garage for the storage of more than five motor vehicles; premises 796-804 Park avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, September 25, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in a business district; Throop avenue is in a business district, and Floyd street is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered February 24, 1928 (re Plan No. 327-1928), reads:

"1. Garage for more than five cars and repair shop may not be extended being situated in a business district. Sec. 6, Building Zone Resolution.";

and

WHEREAS, the decision of the superintendent of buildings, rendered October 29, 1928 (App. No. 18049-28), reads:

"The following objections have been filed by the examiners:

"Public garage for more than five cars in a business district is contrary to the Building Zone Resolution, Art. II, 4 (15) and is hereby denied.";

and

* Correction—Words "the vehicular openings shall be limited to a width not exceeding 9 ft. in the clear" omitted lines 61, 62 and 63 of resolution.

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 25 ft. and a depth of 100 ft.; to be occupied as an auto repair shop for the purpose of conducting a garage business within a business district; and

WHEREAS, the board is authorized, under section 7, subdivision e, of the rules of exception of the building zone resolution, and the application is supported by documentary proof that the appeal comes within the purview of this rule of exception; and

WHEREAS, this application was originally based on decision of the fire commissioner; and

WHEREAS, the applicant has since filed the objection of the bureau of buildings, which objection is incorporated herein.

Resolved, that the board of standards and appeals does hereby *affirm* its action of October 25, 1928, so far as use and occupancy are concerned, and does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the height of the building shall not exceed a mean average height of 26 ft. above grade, without rear yard; that the rear and gable walls shall be unpierced throughout their entire height and length; that any ramp installed shall set back from the building line not less than 10 ft.; that the front elevation shall be finished with light-colored face brick, architectural terra cotta or natural stone trim; that any gasoline storage equipment shall be installed approximately in the center of the building at the street front; that there shall be no portable gasoline pumps maintained or operated on the premises; that there shall be but one sign permitted, a projecting electric sign, indicating the name and title of the business conducted on the premises; there shall be no other advertising signs or display permitted; that any skylights installed shall be glazed with plain glass, having wire guards above and below; that the building shall be erected in strict accordance with the requirements of the building code in all respects; that all permits required shall be obtained within six months and all work involved completed within one year from the date of this action.

RULES

RULES OF PROCEDURE OF BOARD OF STANDARDS AND APPEALS ADOPTED FEBRUARY 15, 1927

(89-27-SR)

ARTICLE I—PUBLIC HEARING.

1. Regular sessions designated as public hearings of the Board of Standards and Appeals shall be held on Tuesday of each week at 10 A. M. and 2 P. M.

2. Morning sessions shall be devoted to hearings on appeals from administrative orders and applications for variation of the building zone resolution. Afternoon sessions, in general, shall be given over to hearings on petitions for variation of the labor law and consideration of rules. Notice shall be published in the Bulletin of the Board of deviation from this procedure.

3. Special sessions may be called by the Chairman, or at the request of four members, provided that notice of the same has been mailed to each member at least twenty-four hours before the time set, except that the announcement of a special session at any meeting at which a quorum is present shall be sufficient notice of such meeting.

4. All hearing sessions shall be open to the public.

5. A quorum of the Board of Standards and Appeals shall consist of four members.

6. The members of the Board shall attend the meetings in person, except that during absence or disability a substitute may act, as provided by law under section 718 of the Charter as amended by Local Law No. 13. The names of such substitutes, designated by the Mayor, shall have been previously filed with the chairman.

ARTICLE II—CASES BEFORE THE BOARD.

1. Every application under the Building Zone Resolution, every appeal under section 719 of the Charter and every petition under section 718a, subdivision 4, of the Charter, shall be made to the Board on the forms provided, and shall include the data required in such forms, so as to supply all information necessary for a clear understanding by the Board and its staff. Action in each case must be based largely on the information so furnished. The statements made by the applicant, appellant or petitioner and the determination of the Board in each case will be incorporated in a resolution formally adopted and published in the Bulletin of the Board. Officials who are charged with the enforcement of the laws, ordinances and rules relating to buildings in the City of New York will be bound by such resolutions, and, before granting permit or taking any other affirmative action, should see that there are no misstatements as to facts and that the conditions of the resolution are observed. Any administrative official discovering any misstatement of essential information is requested to notify the Board, in order that it may take such action as the circumstances require. All approvals shall remain valid only as long as the information and the conditions on which the resolution was based are maintained.

2. Any communication purporting to be an application, appeal or petition shall be regarded as a mere notice of intention to seek relief and shall be of no force or effect until it is made in the form required.

3. Upon receipt of any such communication, the writer shall be supplied with the proper forms for presenting his application, appeal or petition, and he shall be required to file the proper form and furnish all necessary data within twenty days of the date of the order or decision appealed from.

4. The duplicate of each application, appeal or petition required by this article shall be forwarded promptly to the administrative official whose order is involved in such case.

5. At the public hearing of a case before the Board, the applicant shall first present the argument in support of the case and those in objection shall follow. To maintain orderly procedure, each side shall proceed without interruption by the other.

6. Every person before the rostrum shall abide by the order and direction of the Chairman. Discourtesy or disorderly or contemptuous conduct shall be regarded as a breach of the privileges of the Board and shall be dealt with as the Chairman deems proper. Orders to maintain discipline shall be carried out by the Sergeant-at-Arms.

Subject to the direction of the Chairman, the Secretary shall enforce the rules of the Board and shall direct and supervise the Sergeant-at-Arms in maintaining order and decorum in the hearing room and lobbies during all public hearings.

7. No member shall proceed to debate, discuss an issue, put a motion or offer a resolution until he shall have addressed the Chairman and have been recognized by him. While the Chairman is putting a motion or offering a resolution, or during the progress of a roll call, no member shall interrupt or leave his seat. When a motion to adjourn is carried, the members of the Board shall keep their seats until the Chairman declares the meeting adjourned.

ARTICLE III—THE CALENDAR.

1. Each case filed in the proper form, with the required data, shall be numbered serially, irrespective of whether it be an application, appeal or petition. These Calendar numbers shall begin anew on January 1st of each year, and shall be hyphenated with the number of the year and the initials indicating the character of the case. Thus the calendar number of an application under the Building Zone Resolution in 1926 shall be "210-26-BZ"; an appeal from an order, requirement, decision or determination of a Superintendent of Buildings or of the Fire Commissioner, "211-26-A," and a petition for variation of the Labor Law or any rule or standard adopted thereunder, "212-26-S."

2. As soon as a case receives a calendar number, it shall be placed on the Docket. Thereafter the appellant or petitioner shall be notified of the date his case will be set for public hearing. In building zone applications the applicant shall be notified of the date when his case will be reached in the call of the Clerk's Calendar.

3. The Clerk's Call Calendar shall be called each Tuesday at 2 P. M., in Room 1013, Municipal Building, Manhattan, by the Chairman or the Secretary, and a date, for the public hearing of each application for variation of the Building Zone Resolution, shall then be set, which shall be full and sufficient notice to all persons interested in such case.

4. Thereafter each case shall be listed, by calendar number and premises, in the Hearing Calendar printed in the Bulletin of the Board, under the title of the respective proceedings, and the date for which such case has been set.

ARTICLE IV—DISPOSITION OF CASES.

1. Every decision of the Board on any case shall be by resolution.

RULES

2. The final disposition of any application, appeal or petition before the Board shall be in the form of a resolution either reversing, varying or modifying the order, requirement, decision or determination appealed from and granting the application, appeal or petition, or affirming the order and denying the application, appeal or petition. The concurring vote of four members shall be necessary to a decision. If a resolution fail to receive four votes in favor of the applicant, appellant or petitioner, the action will be deemed equivalent to a denial, and a resolution denying such application, appeal or petition shall be formally entered on the record, unless there be a member absent at the roll call and the vote of the absentee added to the number of votes for the applicant appellant or petitioner would equal four, in which case the matter will be laid over for reconsideration, until a final determination is reached.

3. Any applicant, appellant or petitioner may withdraw his application, appeal or petition at any time prior to action thereon, with the consent of the Board, but if a motion has been made, and is pending, either to grant or to dismiss, such motion shall have precedence.

4. No application, appeal or petition dismissed or denied can be considered again except (1) on a motion to reconsider the vote, or (2) on a request for a rehearing.

5. No request to grant a rehearing can be entertained unless new evidence is submitted. If, on motion of a member of the Board, adopted by four affirmative votes, the request for a rehearing is granted, the case shall be put on the calendar for a rehearing.

In all cases, the request for a rehearing shall be in writing, reciting the reasons for the request, and shall be duly verified and accompanied by the necessary data and diagrams. Such request shall be filed with the Chairman, who shall have a report on the case prepared by the engineers. The Chairman may then set a date when the request for reopening shall be submitted to the Board, of which date the person requesting the reopening shall be notified.

If the Board votes to reopen a case affecting a building zone application, a date shall be set for the "Calendar Call" and the applicant shall be required to notify each of the property owners entitled to notice of the application, the same procedure to be followed as in an original application.

6. The Board may, on the motion of any member, review any decision that it has made and may reverse or modify such decision, but no such review shall prejudice the rights of any person who has in good faith acted thereon before it is reversed or modified.

ARTICLE V—BUILDING ZONE APPLICATIONS.

1. No application for a variation or modification of the provisions of the Building Zone Resolution shall be entertained by the Board except in a specific case, and from an order, requirement, decision or determination made by any Superintendent of Buildings, the Tenement House Commissioner, or the Fire Commissioner, on the ground that the proposed plan or use violates the Building Zone Resolution.

2. No such application shall be entertained unless the application is filed within twenty days from the date of the action of the Superintendent of Buildings, Tenement House Commissioner, or Fire Commissioner.

3. Every application shall be made in duplicate on Form 3BZ and shall be accompanied by all the data required by such form, and shall be considered subject to such rules as the Board has adopted or may adopt, under Article 5, Section 21, of the Building Zone Resolution.

4. As soon as any application is completed by the filing of the data required in Form 3BZ, the case shall receive a calendar number and shall be placed on the Clerk's Calendar, and the applicant shall be notified by the Board on Form 6CC, of the time set for the call of the calendar, which shall be at least five days after the mailing of said notice. With this notice the applicant shall be supplied with an official copy of Form 7NO, which he is required to send to every property owner entitled to notice of the application. Within three days the applicant must file a verified statement that he has so notified each of such property owners either by personal service or by registered mail. Not less than fourteen days' notice of the date fixed for calendar call in each Building Zone application shall be given by publication in the Bulletin of the Board.

5. On the call of the Clerk's Calendar the applicant shall appear in person, or by agent or attorney, and property owners affected by the application may appear either in person or by agent or attorney and present any typewritten and verified objections they may have to the granting of the application, together with a description of their property and an affidavit of ownership. Then a date shall be set for a public hearing on the application which shall be not less than fourteen days thereafter. Notice of said hearing shall be given by publication in the Bulletin of the Board.

6. On the date set for the public hearing, the applicant shall state his case, then the opposition shall be heard, and the applicant shall have an opportunity to reply.

7. No application that has been denied after a public hearing can be entertained under the same state of facts or basis of appeal, unless based upon a new decision by a superintendent of buildings on plans which materially change the aspects of the case.

ARTICLE VI—APPEALS.

1. No appeal from any order, requirement, decision or determination of the Superintendent of Buildings or the Fire Commissioner or from any rule or regulation relating to the construction, alteration, structural changes in, equipment, occupancy or use of any building or structure, under Section 719 of the Charter, shall be entertained unless such appeal is filed in duplicate on Form 1A, with all the data required in such form, within twenty days from the date of the order appealed from.

ARTICLE VII—PETITIONS.

1. No petition for variation of the Labor Law, or of any rule adopted thereunder affecting the construction or alteration of buildings, exits therefrom, the installation of fixtures or apparatus as authorized by Section 718-a, subdivision 4 of the Charter, shall be entertained unless it is made in duplicate on Form 2S, with all the data required in such form, within twenty days from the date of the administrative order to which the petition refers.

No petition for approval of a device, material or method of construction shall be entertained unless it is filed in duplicate on Form 4SA, with all the data required in such form.

No petition for the adoption or amendment of Rules shall be entertained unless it is filed in duplicate on Form 5SR, with all the data required in such form.

ARTICLE VIII—PETITIONS.

1. No resolution of the Board of Standards and Appeals adopting or amending any rule or regulation under subdivision 2 or 3 of section 718-a of the Charter shall be adopted unless such proposed rule or regulation shall

RULES

have been published in the Bulletin of the Board for at least ten days prior to a public hearing thereon. Four affirmative votes of the Board shall be necessary for the adoption of such resolution.

2. Amendments to these Rules of Procedure may be made by the Board of Standards and Appeals at any regular meeting, providing notice of such amendment has been given to each member of the Board three days prior to such meeting, either in writing or by publication in the Bulletin. The suspension of any rule of procedure may be ordered at any meeting by unanimous vote.

ARTICLE IX—OTHER RESOLUTIONS.

1. Every resolution of the Board of Standards and Appeals suggesting changes or amendments to the law under subdivision 5, section 718-a of the Charter shall require at least four affirmative votes for its adoption.

2. Every resolution not otherwise provided for, ordinary motions or decisions on rules of order shall require not more than three affirmative votes.

ARTICLE X—INSPECTIONS.

1. In any case in which the Board may deem it necessary, an inspection of the premises in question may be ordered by the Board. Such inspection shall be made by the Chairman and by two or more members designated by him, and they shall report their findings to the Board in writing.

ARTICLE XI—TESTS.

1. In any case in which the Board may order a test of any material or device, the test shall be conducted under the supervision of an assistant engineer, in the presence of the Chairman and two or more members appointed by him, and the result of such test shall be reported to the Board in writing, and the material or device shall not have the approval of the Board unless the report be favorable and adopted by four affirmative votes.

ARTICLE XII—RECORDS.

1. All applications, appeals and petitions shall be on the required forms, and all communications, reports, etc., and plans, relative to any matter appearing on the calendar, shall be on sheets approximately 8 in. by 10½ in. in size. After final disposition, they shall be bound in some suitable manner. These records shall be kept in filing cabinets in their numerical order, in such a manner that they are accessible to the public at all reasonable hours, as prescribed by the Charter of the City of New York.

2. An index indicating locations by boroughs shall be kept.

3. All reports on matters coming before the Board for action shall be duplicated in sufficient numbers to furnish a copy to each member. The original shall be filed with the records in each case.

ARTICLE XIII—THE BULLETIN.

1. The Bulletin of the Board of Standards and Appeals shall be published on Tuesday of each week. It shall contain:

- (1) Directory of the Board.
- (2) Docket.

(3) Clerk's Calendar Call.

(4) The Hearing Calendar.

(5) Notice of hearing on building zone applications and on proposed rules or the amendment of rules.

(6) An abstract of the minutes of each meeting, including a brief statement of the action in each case, with the roll call thereon and the full text of the resolutions adopted.

(7) Rules adopted.

(8) Such other information as may be of value to the public and within the scope of the work of the Board.

ARTICLE XV—OFFICERS.

1. The Chairman shall preside at meetings. The Chairman may designate any member of the Board to preside and perform the duties of the Chair at public hearings.

2. The Chairman, subject to these rules, shall decide all points of order or procedure, unless otherwise directed by a majority of the Board in session at that time.

3. The Chairman shall designate the members of the Board to make an inspection, and, unless otherwise directed by the vote of four members of the Board, shall appoint any committee that may be deemed necessary.

4. The Chairman shall report at each meeting on all pertinent official transactions that do not otherwise come to the attention of the Board.

5. Administrative authority is vested solely in the Chairman of the Board who shall, subject to these rules, transact all official business of the Board, engage the necessary employees and direct the work of the office.

6. Subject to these rules and the direction of the Chairman, the Secretary shall conduct all official correspondence, compile the required records, edit the Bulletin, maintain the necessary files and indices, and generally supervise the clerical work of the office force, maintaining discipline in accordance with the rules of the office and charter provisions.

7. Subject to these rules and the direction of the Chairman, the Assistant Engineers shall examine and report on all applications, appeals and petitions; prepare all proposed rules or revised rules suggested by outside agencies, with report on the reasons and necessity for same; supervise and witness the tests conducted under the auspices of the Board, and assist generally in all technical matter coming before the Board.

8. The Chief Clerk shall keep all accounts, keep the files and indices in proper order and up to date, and generally assist the Secretary. During the absence or disability of the Secretary, the Chief Clerk shall act in that capacity.

9. A complete stenographic record of the transactions at public meetings shall be made for the files, including verbatim reports of such parts as may be directed, and there shall be prepared, after each meeting and in time for the next publication of the Bulletin, the abstract of the minutes which is to appear in such Bulletin.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, December 14, 1928, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

Matter in *italics* is new. Matter in brackets [] to be omitted.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FUEL OIL, any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125°F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinance).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

[The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived

from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

(a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.]

OILS NOT PERMITTED:

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

[(d) Where the Use of Grade B Fuel Oil Is Permitted.]

FUEL OIL:

[Grade B] Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

[(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.]

DEVICES:

[(f)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks *except as otherwise provided in these rules.*

Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

Section 1. Inside of Buildings Above Ground.

(a) *OVER 275 GALLONS CAPACITY.* Where tank cannot be buried as required in subdivision c of this rule.

PUBLIC HEARING

storage tanks exceeding 275 gallons capacity, or any part of such tanks, when located above the floor level of the lowest story of any building shall each be placed in an enclosure of inside dimensions of 6 inches greater on all sides than the outside dimensions of the tank. The walls of the enclosure shall be constructed of concrete not less than 6 inches in thickness or 8 inches in thickness of brick masonry. The walls shall be carried up to a height not less than 12 inches above the top of the tank and the space between the tank and the walls and top of the enclosure shall be filled with sand or well tamped earth. Enclosure shall not be constructed until after tank inspection is made.

[(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.]

(b) Not more than one tank shall be placed in an enclosure.

(c) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "d."

(d) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(e) 275 GALLONS CAPACITY AND LESS. Storage tanks of 275 gallons capacity and less may be installed in the lowest story so that the bottom of tank shall not be more than 2 feet above the burner oil inlet connection. The tank shall be set on and firmly anchored to a concrete or rock base which base shall be equivalent in weight to at least 15 cubic feet of concrete. Not more than one tank shall be permitted for any one building.

(f) OVER 275 GALLONS CAPACITY. Storage tanks exceeding 275 gallons capacity shall be buried below the level of the lowest floor and below the level of the burner oil inlet connection except where the burial of tanks below the level of the burner oil inlet connection is impractical:

(a) by reason of rock or water conditions.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used and the tank shall be placed at the lowest practical level. The top of the tank shall be protected by not less than 12 inches of sand or dry earth or 4 inches of concrete. Tanks shall be placed on firm soil and surrounded with soft earth or sand.

[Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its

capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of sary to prevent floating, tanks shall be securely anchored. horizontal outline of tanks in all directions. Where neces-

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.]

Section [3] 2. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the concrete which shall extend at least one foot beyond the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section [4] 3. Outside of Buildings Below Ground.

(a) Tanks buried outside of buildings below ground shall have the top of the tanks not less than 2 feet below the surface of the ground and below the level of the burner oil inlet connection to which the tanks may be connected, except where the burial of tanks below the level of the burner oil inlet connection to which the tank may be connected is impractical:

(a) by reason of rock or water condition.

(b) where the bottom of the tank will be below the level of the foundation footing and where the angle of repose cannot be maintained as certified by the Superintendent of Buildings.

Under conditions (a) and (b) a syphon breaking device provided for in these rules shall be used.

[(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with

PUBLIC HEARING

soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Subdivision B. Grade B Fuel Oil.

Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.]

Section 4. Capacity.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Rule 5. [Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.]

[Section 1.] Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers

shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $\frac{5}{16}$ in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$ in. shell, $\frac{3}{8}$ in. heads.

Tanks over 120 inches in diameter to be of $\frac{3}{8}$ in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell $\frac{1}{4}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{1}{4}$ in. pitch.

In shell $\frac{5}{16}$ in. thick, $\frac{5}{8}$ in. diameter rivets $2\frac{3}{8}$ in. pitch.

In shell $\frac{3}{8}$ in. thick, $\frac{3}{4}$ in. diameter rivets $2\frac{1}{2}$ in. pitch.

Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than $\frac{5}{16}$ of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be $\frac{5}{8}$ of an inch in diameter and spaced not more than $2\frac{1}{4}$ inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides

PUBLIC HEARING

of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be $\frac{1}{4}$ inch and the minimum thickness of roof plates $\frac{1}{8}$ inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than $\frac{3}{16}$ inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For $\frac{3}{16}$ inch heads, $1\frac{1}{4}$ inch flange.

For $\frac{1}{4}$ inch heads, 2 inch flange.

For $\frac{5}{16}$ inch heads, 2 inch flange.

For $\frac{3}{8}$ inch heads, $2\frac{1}{4}$ inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure, except as otherwise stated, of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

PUBLIC HEARING

[Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.]

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

[(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.]

Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted; except that for Grade B oil $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

Section 3. Tests for Piping. [Grade A.]

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ($1\frac{1}{2}$) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

[Section 3a. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.]

Section 3a. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 4. Relief Valves.

[(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than $\frac{1}{2}$ in. by $\frac{1}{2}$ in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

PUBLIC HEARING

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.]

(a) *Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply line near pump. There shall be no shut-off valves in the relief line.*

(b) *All heaters shall be provided with a relief valve to prevent excessive oil pressure.*

(c) *Relief valves shall be set to discharge at not more than 1½ times the maximum working pressure of the system.*

Syphon Breaking Devices—Syphon breaking devices, where permitted, shall be constructed in such a manner that the admission of air at any point in the supply line will break the syphon. Where installed, such a device shall not be accepted until it has been effectively demonstrated in the presence of a representative of the Bureau of Fire Prevention.

Section 5. Fill Pipes.

(a) *Each tank shall be provided with a separate fill pipe which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway grating. Where the fill box terminal is below the level of the top of the tanks, the fill pipe shall terminate at the top of the tank; a check valve and a gate valve shall be installed in the fill box terminal (at the tank).*

[(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.]

Section 6. Vent Pipes.

(a) An open, galvanized or painted iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direc-

tion of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 7. Return [Pipes] Line from Burners.

Return lines from burners, where [necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank.] *used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.*

Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

Rule 9. Valves and Control of Flow for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve.]

(a) *In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet connection to the burner a shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.*

(b) *In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.*

Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure

PUBLIC HEARING

This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for [Grade A] Fuel Oil.

[A test wall or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

[Subdivision A. Grade A Fuel Oil.]

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps, except as otherwise stated in these rules.

[Subdivision B. Grade B Fuel Oil.]

[(a)] (f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

[(b)] Pumps shall be of approved design as described in Rule 11A (a).]

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to the burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

Installations in which burners are located on different floors of a building and are supplied with oil from the same source, a remote control shall be provided on each floor on which burners are located. This remote control to be such that its operation will stop the flow of oil to all burners on that particular floor, and such control shall be located either inside or outside an accessible entrance to the floor or room containing the burners as close to the entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for [Grade A] Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant Other Than Domestic Installation Using [Grade A] Fuel Oil.

No fuel oil burning plant, other than domestic installations, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

[This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.]

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for [Grade B] Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

PUBLIC HEARING

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device so installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

Rule 20. Fire Protection [for Grade A and B oil in Domestic Installations] in dwellings, [occupied by not more than two families and in] old [law tenements occupied by three or more families in] and new law tenements, [and in] commercial and industrial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied exclusively by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace or boiler shall be covered with approved fire retarding material and the ceiling, except it be of fireproof construction, and within two (2) feet of the top of the furnace or boiler, shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace or boiler, except that when the top of furnace or boiler is within six (6) inches of a combustible ceiling the ceiling shall be protected with two layers of approved fire retarding material with one inch air space between layers, and any combustible ceiling, partition or other combustible material within nine (9) inches of any smoke pipe shall be covered with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. [In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.]

(c) In old and new law tenement houses, [or in] commercial and industrial plants [the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.] of non-fireproof construction the heating apparatus and oil burning device shall be located in an enclosure, the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door the sill of which shall be not less than twelve (12) inches above boiler room floor level; and the ceiling of the enclosure if not of fireproof construction shall be protected with approved fire retarding material, except that when the top of the furnace or boiler is within twelve (12) inches of a combustible ceiling,

the ceiling shall be protected with two (2) layers of approved fire retarding material with one (1) inch air space between layers, any vertical openings extending in the boiler room proper to be protected with self-closing fireproof doors and four (4) inch partition of approved fireproof material, said enclosure shall be ventilated to the outer air. Any smoke pipe within eighteen (18) inches of a combustible ceiling, partition, or other combustible material, the ceiling, partition, or other combustible material, shall be protected with approved fire retarding material extending at least one (1) foot beyond each side of the smoke pipe. All vertical openings in old law tenement houses shall be protected in cellar with fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors.

(d) In new law tenement houses, commercial and industrial plants of fireproof construction the heating apparatus and oil burning device shall be located in an enclosure constructed of fireproof material not less than four (4) inches in thickness with any opening therein protected with self-closing fireproof door, said enclosure shall be ventilated to the outer air.

(e) Furnished room houses, boarding houses and non-housekeeping apartments, dormitories and day nurseries and similar occupancies with not more than ten (10) sleeping rooms, also convents, rectories, monasteries and churches, the fire protection shall be the same as that required for dwellings occupied exclusively by not more than two families.

(f) Dwellings occupied by not more than two (2) families and stores the occupancy of which is considered hazardous and requires a permit from the fire department, except stores for which a permit is required for the use and operation of soda water fountains, furnished room and boarding houses, non-housekeeping apartments, dormitories, day and night nurseries, with more than ten (10) sleeping rooms and similar occupancies, the fire protection shall be the same as that required for old law tenement houses.

[Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.]

(g) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

Rule 21. Systems Prohibited [Where Grade B Fuel Oil Is Used.]

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of [Grade A or Grade B] Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, Chairman.

WILLIAM I. O'GORMAN, Secretary.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.
Special meetings as published in this Bulletin.
Call of Clerk's Calendar, Tuesdays, at 2 p. m.
All hearings are held in Room 1013, Municipal Building, Manhattan.

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

UNIVERSITY OF ILLINOIS

CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 18, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Wednesday, December 26, 1928, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION—

(317-28-BZ)

WHEREAS, McCooley & Conroy, for Michel Holding Corp., owner, filed, April 5, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1901-1905 Neptune avenue, northwest corner of West 19th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Neptune avenue is in a business district, West 19th street is in both an unrestricted and business district and West 20th street is in both an unrestricted and residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 23, 1928 (re App. No. 3738-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4 (a), Subdivision 46.

"The installation of a gasoline service station in a business district.";

and

WHEREAS, it is proposed to erect a non-fireproof office, 12 ft. by 12 ft., bury three 550-gallon tanks and erect six pumps for the purpose of conducting a gasoline service station within a business district on a plot of ground 100 ft. by 118 ft. 9¾ in.; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution on the grounds of practical difficulty and unnecessary hardship because of existing conditions in the same street, front and rear.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that there shall be built on the northerly and westerly lines a masonry wall 10 ft. high, and on the building lines of West 19th street and Neptune avenue a concrete curb not less than 12 in. in height, with two openings on each street front, not more than 10 ft. wide; that all pumps shall be located at least 10 ft. back of the building line; that the two walls on the northerly and westerly sides shall be faced with white enamel brick on the inside and on the top with artificial stone or terra cotta, raked back 10 ft. from the concrete curb to be erected on building line to height of wall; that there shall be no gasoline service permitted outside of the building line; that any grease racks shall be confined to the northwest corner of the property; that there shall be erected on this property on the northerly end center an office for the use of the owner and occupant of the premises, 12 ft. by 12 ft., with a Spanish tile or slate roof, brick walls with artificial stone or terra cotta trimmings; that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action.

767-28-BZ.

APPLICANT—William F. Doyle, for Harriet Bailey, owner.

SUBJECT—Application (re decisions of the fire commissioner and superintendent of buildings) under sections 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—279-285 East 233rd street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: A. J. Ward.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief

Kenlon 4

THE RESOLUTION—

(767-28-BZ)

WHEREAS, William F. Doyle, for Harriet Bailey, owner, filed, October 4, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 279-285 East 233rd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 233rd street is in a residence, unrestricted and business district, East 234th street is in a business district and Katonah avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered September 28, 1928 (Plan No. 2439-28), reads:

"1. A gasoline service station at the above location, which is a business district, may not be permitted. Appeal may be taken to the Board of Standards and Appeals. Sec. 4, Building Zone Res.";

and

WHEREAS, the decision of the superintendent of buildings, rendered November 24, 1928 (re App. N. B. 2263-28), reads:

"1. Erection of building and maintenance of premises for gasoline service station in business district is contrary to provisions of the Building Zone Resolution.";

and

WHEREAS, it is proposed to erect a two-story frame building, with office and store on first story and a living apartment on second story; to bury four 550-gallon tanks, erect six pumps and grease racks for the purpose of conducting a gasoline service station within a business district on an irregular plot with a frontage of 79.78 ft. and a depth of 97 ft. and 83.38 ft.; and

WHEREAS, applicant has filed 80 per cent consents of the owners in the area affected and fixed by the board; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that on the rear and side building lines shall be erected a masonry wall, not less than 10 ft. in height, faced on the inside with white enamel brick, coped with terra cotta or natural stone coping; that on the building line at street front there shall be erected a concrete curb, not less than 12 in. in height, with two openings not more than 10 ft. wide each; that the walls on the westerly and easterly lot lines shall be racked back 10 ft. from the concrete curb to the height of the proposed wall; that there shall be erected on the property a two-story building, 25 ft. by 32 ft., approximately, in area, located within 10 ft. of the rear lot line; said building to be of attractive design and built of terra cotta blocks or face brick with Spanish tiled roof, in which building shall be located an office and salesroom on the ground floor with dwelling apartments above on the second floor; that all pumps shall be located 10 ft. inside the street building line; that any advertising displayed shall be restricted to the illuminated glass globes on the gasoline pumps erected on the premises; that there shall be no grease racks or crankcase racks permitted on this piece of property; that there shall be no sale of gasoline permitted outside the building line on the street front; that all permits shall be obtained within six months and any work involved shall be completed within one year from the date of this action, and that a return of drawings shall be submitted to this board for approval before submission to the superintendent of buildings.

APPEARANCES—

For Applicant: John H. McCooley, Jr.

For Opposition: None.

ACTION OF BOARD—Laid over to December 26, 1928, at 10 a. m., pending inspection and report by a committee of the board.

574-28-BZ.

APPLICANT—John J. Dunnigan, for Edward A. Schill, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district, extending from an unrestricted district, the change of occupancy from a garage to a garage, showroom, service station and a motor vehicle repair shop.

PREMISES AFFECTED—1339-1343 Jerome avenue, west side, 470 ft. south of West 170th street, The Bronx.

APPEARANCES—

For Applicant: J. F. Dusenbury.

For Opposition: Harold Lee.

ACTION OF BOARD—Laid over to December 26, 1928, at 10 a. m., on request of applicant's representative.

589-28-BZ.

APPLICANT—William F. Doyle, for Rita Goldberg, owner.

SUBJECT—Application (re decision of the fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1014-1024 Brooklyn avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

MINUTES

ACTION OF BOARD—Laid over to December 26, 1928, at 10 a. m., in order that applicant may obtain consents.

956-27-BZ.

APPLICANT—Henry R. Mygatt, for Stanley Murray, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously denied).

PREMISES AFFECTED—East side of Jerome avenue, 105.36 ft. north of East 172nd street, The Bronx.

APPEARANCES—

For Applicant: Frederick J. Flynn.

For Opposition: William J. Vitale.

ACTION OF BOARD—Laid over to January 2, 1929, at 10 a. m., on request of attorney for opposition; applicant concurring.

223-28-BZ.

APPLICANT—J. Gerald Shea, substituted for Emil Guter-
man, for Edward J. Foy, owner.

SUBJECT—Application (re decision of the fire commis-
sioner) under section 21 of the building zone
resolution, to permit in a business district the
erection and maintenance of a gasoline service
station.

PREMISES AFFECTED—329-353 Skillman avenue, north
side, 11 ft. east of Lowery street, Long Island
City, Borough of Queens.

APPEARANCES—

For Applicant: John McQuade.

For Opposition: None.

ACTION OF BOARD—Laid over to January 2, 1929, at
10 a. m.

451-28-BZ.

APPLICANT—William F. Doyle, for Alexander Ginsburg,
owner.

SUBJECT—Application (re decision of the fire commis-
sioner) under section 21 of the building zone resolu-
tion, to permit in a business district the erection
and maintenance of a garage for the storage of
more than five (5) motor vehicles.

PREMISES AFFECTED—1969-1979 Cropsey avenue and
8796-8818 20th avenue, northwest corner, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Murray M. Cowen.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioners Holland and Guil-
foyle 2

Negative: Acting Chairman Connell and Chief
Kenlon 2

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(451-28-BZ)

WHEREAS, William F. Doyle, for Alexander Ginsburg,
owner, filed, May 10, 1928, an application, under the building
zone resolution, to permit in a business district the erec-
tion and maintenance of a garage for the storage of more
than five motor vehicles; premises 1969 Cropsey avenue and
8796-8818 20th avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application
by the board of standards and appeals, at its special meeting,
Friday, December 7, 1928, after due notice by publication in
the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-
ing zone resolution show that Cropsey avenue is in a busi-
ness district, 20th avenue is in a business district and Bath
avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered
May 11, 1928 (re 1302-28), reads:

"1. Proposed garage for more than five cars at this
location which is in a business zone may not be per-
mitted. Bldg. Zone Resolution, Sec. 4.";

and

WHEREAS, the proposed building is to be of non-fireproof
construction, two stories in height, with a frontage of 200
ft. on 20th avenue and 87 ft. 10½ in. on Cropsey avenue;
to be occupied as a garage for the storage of more than
five motor vehicles; and

WHEREAS, the board deemed that applicant did not sub-
stantiate his basis of appeal brought under section 21 of
the building zone resolution.

Resolved, that the decision of the fire commissioner be
and it hereby is affirmed, and the application be and it hereby
is denied.

160-28-BZ.

APPLICANT—Edward J. Bausch, for Feinborough Homes,
Inc., owner.

SUBJECT—Application (re decision of the fire commis-
sioner) under section 21 of the building zone
resolution, to permit in a business district the
erection and maintenance of a gasoline service
station.

PREMISES AFFECTED—Northwest corner of Margaret
place (Trotting Course lane) and 82nd avenue
(Olivia place), Glendale, Borough of Queens.

APPEARANCES—

For Applicant: Jacob E. Bausch.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioners Holland and Guil-
foyle 2

Negative: Acting Chairman Connell and Chief
Kenlon 2

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(160-28-BZ)

WHEREAS, Edward J. Bausch, for Feinborough Homes,
Inc., owner, filed, February 24, 1928, an application, under
the building zone resolution, to permit in a business dis-
trict the erection and maintenance of a gasoline service sta-
tion; premises northwest corner of Margaret place (Trot-
ting Course lane) and 82nd avenue (Olivia place), Glen-
dale, Borough of Queens; and

WHEREAS, a public hearing was held on this application
by the board of standards and appeals, at its special meet-
ing, December 7, 1928, after due notice by publication in the
Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-
ing zone resolution show that Margaret place (Trotting
Course lane) is in a business and unrestricted district, 82nd
avenue (Olivia place) is in a business and unrestricted
district and Woodhaven boulevard is in a business dis-
trict; and

WHEREAS, the decision of the fire commissioner, rendered
December 31, 1927 (re Plan No. 4399-27), reads.

"1. A gasoline service station may not be permitted
in a business district.";

and

WHEREAS, it is proposed to erect an office, 18 ft. by 38
ft., bury sixteen 550-gallon tanks and erect twelve pumps
for the purpose of conducting a gasoline service station
within a business district on a plot of ground 100.49 ft. by
153.87 ft., irregular; and

WHEREAS, the board deemed that applicant did not sub-
stantiate his basis of appeal brought under section 21 of the
building zone resolution.

Resolved, that the decision of the fire commissioner be and
it hereby is affirmed, and the application be and it hereby is
denied.

MINUTES

567-28-BZ.

APPLICANT—James W. Byrnes, for John D'Antuono, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the alteration, extension and change of occupancy from a garage for five (5) motor vehicles to a garage for the storage of more than five (5) motor vehicles.

Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief

Kenlon 4

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(567-28-BZ)

WHEREAS, James W. Byrnes, for John De Antuono, owner, filed, June 25, 1928, an application, under the building zone resolution, to permit in a business district the alteration, extension and change of occupancy from a garage for five motor vehicles to a garage for the storage of more than five motor vehicles; premises 969-971 Fourth avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, Friday, December 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourth avenue is in a business district, 37th street is in an unrestricted and business district and 38th street is in an unrestricted and business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 15, 1928 (re Applic. No. 9637-28), reads:

"Proposition as to extending present occupancy from 5 car garage to public garage for more than 5 cars—contrary to Zone Resolution, Art. 2, Section 4a, par 15.

"Therefor application denied for extending occupancy of a prohibited use in a business district.";

and
WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 18 ft.; occupied as a garage for the storage of five motor vehicles; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deems that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

203-28-BZ.

APPLICANT—William Koppe, for Tremune Realty Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the alteration and conversion of occupancy of portion of an apartment building from dwelling to business use (stores).

PREMISES AFFECTED—1801 University avenue, northwest corner of Tremont avenue, The Bronx.

APPEARANCES—

For Applicant: William Koppe and John Ackerman.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief

Kenlon 4

Absent: Chairman Walsh..... 1

THE RESOLUTION—

(203-28-BZ)

WHEREAS, William Koppe, for Tremune Realty Corp., owner, filed, March 6, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and conversion of occupancy of portion of an apartment building from dwelling to business use (stores); premises 1801 University avenue, northwest corner of Tremont avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, Friday, December 7, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that University avenue, west side, north of a point 100 ft. south of Tremont avenue, is in a residence district; University avenue, west side, south of a point 100 ft. south of Tremont avenue, is in a business district; University avenue, east side, north of a point 100 ft. south of Tremont avenue, is in a residence district; University avenue, east side, south of a point 100 ft. north of Tremont avenue, is in a business district; Tremont avenue, west of University avenue, is in a residence district, and Tremont avenue, east of University avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 3, 1928 (re App. Alt. 50-1928), reads:

"Proposed alteration and conversion of portion of building in residence district to be occupied for business purposes is contrary to the provisions of the building zone resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, five stories in height, with a frontage of 169 ft. and a depth of 90 ft., irregular; now occupied as an apartment house; it is proposed to alter the building by providing stores on the first story of both street fronts; and

WHEREAS, the board deems that applicant did not substantiate his basis of appeal brought under section 21 of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

AREA FIXED.

(534-28-BZ)

The chairman presented and read a communication from William H. Bulkley, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, a motor vehicle repair shop and also the installation of a gasoline service station; premises 5869 Amboy road, north side, Princes Bay, Borough of Richmond.

The following area was approved by the board:

Both sides of Amboy road from Peterson street to a point 200 ft. east of the premises in question.

ACTION OF BOARD—Laid over to January 15th, 1929, at 10 a. m., on request of appellant. Final disposition.

350-28-A.

APPELLANT—Croker Natl. Fire Prev. Eng. Co., for Maria J. Doscher, owner.

SUBJECT—Application for reopening—reconsideration, previously denied—re appeal from order of fire commissioner.

PREMISES AFFECTED—330 Rivington St., Manhattan.

APPEARANCES—

For Appellant: William H. Good.

ACTION OF BOARD—Appeal restored to Calendar and set for hearing December 18, 1928, at 10 a. m.

THE VOTE TO RESTORE TO CALENDAR—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

617-28-A.

APPELLANT—Ingersoll-Rand Company, for Watch Tower Bible and Tract Society, owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—117-125 Adams street and 54-62 Prospect street, southeast corner, Brooklyn.

APPEARANCES—

For Appellant: Chester A. Adey, John R. Voorhees and W. L. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative—Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(617-28-A)

WHEREAS, Ingersoll-Rand Co., for Watch Tower Bible and Tract Society, owner, filed, July 17, 1928, an appeal from a decision of the fire commissioner, affecting premises 117-125 Adams street and 54-62 Prospect street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered November 1, 1927 (Plan No. 4607-26), reads:

"2. Use of 200 gallon auxiliary tank contrary to Grade A Fuel Oil Rules.";

and

WHEREAS, the building is fireproof, eight stories in height, 90 ft. by 97 ft. 6 in. in area; OCCUPIED: 1st story, garage, paper storage, engine room and boiler room, 2 persons; 2nd story, shipping, 6 persons; 3rd story, stock storage, 1 person; 4th story, bindery, 32 persons; 5th story, binding and mailing, 15 persons; 6th story, press room, 13 persons; 7th story, composition rooms, 16 persons; 8th story, offices, 50 persons; and

WHEREAS, appellant contends that the 200-gallon auxiliary tank for storage of Grade A fuel oil is used in conjunction with a Diesel engine operated power plant for generating electric power to be used in the building in question; that it contains a day's supply of oil and is necessary in the operation of the plant; and

WHEREAS, the use of the oil on these premises is restricted to the industrial operation of a Diesel engine, internal combustion design; and

WHEREAS, the fuel oil rules are not applicable.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that all auxiliary fire-fighting equipment, as required by the fire commissioner, shall be installed and maintained.

587-28-A.

APPELLANT—J. Burmeister, for Lazarus Fried & Sons, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—423-435 East 56th street, Manhattan.

APPEARANCES—

For Appellant: J. Burmeister.

For Administration—Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(587-28-A)

WHEREAS, J. Burmeister, for Lazarus Fried and Sons, Inc., owner, filed, June 29, 1928, an appeal from an order

MINUTES

of the fire commissioner, affecting premises 423-435 East 56th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 18, 1928 (Order No. 37385-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is of reinforced concrete construction, five stories (60 ft.) in height, 139 ft. by 77 ft. 8¾ in., irregular, about 11,000 sq. ft. floor area; OCCUPIED for the manufacture of leather belting: cellar, boiler room, 3 persons; 1st story, shipping, 8 persons; 2nd story, offices, 14 persons; 3rd, 4th and 5th stories, leather working, 16, 10 and 14 persons, respectively; and

WHEREAS, the applicant claims that the building is equipped with a sprinkler system fed by two 6,000-gallon pressure tanks and a 15,000-gallon gravity tank; that the floor area of the second and fourth stories are divided by a 6-inch terra cotta block partition, all openings protected with fireproof doors and windows; that there are five fire hydrants within 200 ft. from the building; furthermore, the appellant contends that the occupancy is small, non-hazardous and the exits adequate; and

WHEREAS, the order is predicated on the requirements as to the area only; and

WHEREAS, the building is of reinforced fireproof concrete construction throughout.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the premises shall be equipped with an approved two-source wet sprinkler system with central office connection; that the building shall be not increased in height or area, and that the occupancy and use remain unchanged.

817-28-A.

APPELLANT—Brooklyn Ash Removal Company, Inc. owner.

SUBJECT—Appeal from decision of the fire commissioner. PREMISES AFFECTED—490-538 Hamilton avenue, Brooklyn.

APPEARANCES—

For Appellant: Philip S. Hill and Earl L. Collins.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION:

(817-28-A)

WHEREAS, Brooklyn Ash Removal Co. filed, October 25, 1928, an appeal from a decision of the fire commissioner, affecting premises 490-538 Hamilton avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered September 22, 1928 (No. 2692-28), reads:

"1. Plans indicate that building exceeds 40' in height and 20,000 square feet in area, a Standard Wet System must be provided. Rule 9A and 10A.";

and

WHEREAS, the proposed building is of reinforced concrete construction, two and three stories (40 to 60 ft.) in height, 121 ft. 9 in. by 307 ft. to 483 ft., irregular; about 32,000 sq. ft. in area; OCCUPIED as a garbage incinerator

and ash removal plant: 1st story, furnace rooms, 9 persons; 2nd story, reclaiming floor, 25 persons; 3rd story, dumping floor, 6 persons; and

WHEREAS, in lieu of installing a regulation standpipe system and gravity tank, the applicant proposes to omit the gravity tank and install the standpipe system fed through a 6-inch connection to the 12-inch city water main of 55 pounds pressure per square inch; also a second source of supply from wells located on the premises in question, provided with electrically-driven pumps of 1,000 gallons per minute at 100 pounds pressure; a gate valve will be placed in the supply line from the wells, and a check valve will be placed in the 6-inch supply from the city main on the street side of the connection from the wells, so that when the pumps are in operation the check will close on the supply from city main and the water pressure increased to 100 pounds for fire fighting; furthermore, the appellant proposes, in addition to the above standpipe system, to install an approved sprinkler system.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that there shall be installed a standpipe equipment with not less than a 6-inch connection to the city main, and as a second source of supply, from wells located on the premises; that the system shall be provided with electrically-driven pumps of not less than 1,000 gallons per minute; that a gate valve shall be placed in the supply line between the city service and the well supply; that the approval of the water department shall be obtained before connecting the well system and the city water service on the same pipes; that the premises shall be maintained substantially unchanged, and that the requirements of the standpipe rules otherwise shall be complied with in all other respects.

679-28-A.

APPELLANT—G. B. Seeley's Son, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—329-331 West 15th street, Manhattan.

APPEARANCES—

For Appellant: Horace A. Woodward.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(679-28-A)

WHEREAS, G. B. Seeley's Son, Inc., owner, filed, August 30, 1928, an appeal from an order of the fire commissioner, affecting premises 329-331 West 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 13, 1928, reads:

"1. Provide a room or compartment in which to keep and use liquified chlorine; such room shall be

"(b) Located on the ground floor, and

"(c) Easily accessible from the street or yard as per Sec. 214-A-4-C.";

and

WHEREAS, the building in question, the westerly one of a group comprising the plant of G. B. Seeley, Inc., manufacturers of carbonated waters, is fireproof, five stories in height, 50 ft. by 150 ft. 8 in., irregular, in area; OCCUPIED: basement, boiler room and water distillation plant, 3 persons; 1st story, stock room and storage of more than five motor vehicles, 5 persons; 2nd story, bottling room, 15 persons; 3rd story, bottle washing, syrup room and room for storage of chlorine and chlorinator, 5 persons; 4th story, stock room, 2 persons; 5th story, stock room, 3 persons; and

MINUTES

WHEREAS, appellant contends that the one cylinder (20 pounds) of chlorine is immersed in water; leaving the cylinder the gas goes to a chlorinator (fixed on the wall 3 ft. from the cylinder) where it is dissolved in water and flows to the supply tank of a pump in the basement where it is again diluted with water and pumped to a tank on the roof, from where it is piped to bottle rinsers; appellant contends, further, that the chlorine is stored in a fireproof room (vented to the outer air) on the third story; that there is no safe place for storage on the first story and that owing to the precautions taken, there is no hazard.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that not more than one cylinder of chlorine shall be maintained on the premises at any one time, confined to the third story, the cylinder to be immersed in water connected with chlorinator fixed to the wall in the same room dissolving same in water with a flow to supply tank of pump in the basement where it shall again be diluted with water and lifted to a tank on the roof, the chlorine cylinder to be stored and maintained in a fireproof room, third story, ventilated by a mechanical fan and duct to the outer air above the roof level, and that the switch control in the operation of the fan shall be located in the open room outside the chlorine tank storage.

24-28-A.

THE RESOLUTION:

(24-28-A)

WHEREAS, Wells & Newton Co., Inc., for the Waldorf Astoria, Inc., owner, filed, January 12, 1928, an appeal from an order of the fire commissioner, affecting premises 2-12 West 34th street, 1-19 West 33rd street and 338-350 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 6, 1925 (Order No. 75080-F), reads:

"2. Provide an approved intermediate tank or pressure reducing valve for standpipe system. Section 20, Chapter 12, Code of Ordinances.";

and

WHEREAS, the building is fireproof, eighteen stories in height, 226 ft. 6 in. in height, 348 ft. by 198 ft. in area; OCCUPIED as a hotel: cellar, engine room and kitchen, 60 persons; 1st story, offices, 40 persons; 2nd story, meeting rooms, 25 persons; 3rd to 16th stories, inclusive, guest bedrooms, 50 persons per story; 17th story, servants, 25 persons; 18th story, machine room, 5 persons; EQUIPPED with a standpipe system, consisting of eight risers, a 5,000-gallon tank on the roof for house and standpipe service, being located 20 ft. above the roof, and necessary siamese connections and hose outlet valves on each story; and

WHEREAS, appellant proposes to provide at the hose outlets on each story a pressure-reducing valve which will reduce the pressure to 50 or 60 pounds or less; and

WHEREAS, the appellant contends that the standpipes conform to the requirements of rule 44 of the standpipe rules and that they are an existing installation; and

WHEREAS, the case was withdrawn at the meeting held on June 5, 1928, and reopened by the vote of the board on November 20, 1928; and

WHEREAS, the razing and demolition of the building is contemplated discontinuing the present hotel occupancy; and

WHEREAS, the present standpipe system is equipped with standard angle globe valves installed prior to the adoption of any standpipe rules by the fire department or board of standards and appeals, and that the standpipe system is under the supervision and operation of a privately maintained fire-fighting brigade in this building.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the pressure reducing valve item of the order, *on condition* that there shall be installed below each hose outlet where the static pressure exceeds 50 pounds, secured to the standpipes, a cast iron plate with raised letters 1/2 inch high directing the use and operation of valves by the fire brigade or uniformed fire-fighting force, reading: "High pressure for fire department and hotel fire brigade use only," and that the equipment otherwise shall comply with the rules for existing buildings.

BUILDING ZONE CASES.

Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(628-28-BZ)

WHEREAS, Philip J. Sinnott, for Patrick Haugely, owner, filed, July 20, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a business building for store occupancy; premises southwest corner of Nelson avenue and Macombs road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nelson avenue and West 175th street are both in residence districts and Macombs road is in a residence and business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 16, 1928 (re App. No. 1458-28), reads:

"1. Erection of a building in a residential zone for business use is contrary to the provisions of the Building Zone Resolution.";

and

WHEREAS, the building is to be of non-fireproof construction, one story in height, with a frontage of 150 ft. on Nelson avenue, 150 ft. on Macombs road and 106.82 ft. in width at rear; to be occupied as a business building for store occupancy; and

WHEREAS, the plot under appeal is triangular in shape, facing existing business use on both street fronts opposite, and the board deems that denial of relief would be arbitrary discrimination and would constitute unnecessary hardship within the meaning of section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the first story, street grade, of this property, permitting business use as retail mercantile store use, *on condition* that any building erected thereon, in excess of one story, shall be restricted to conforming residential use and operation above the first story; that there shall be no roof signs erected; that any advertising sign display shall be restricted to the plate glass show windows on the first story street front, or flat wall signs on frieze of store front; that no merchandise shall be displayed, exposed or maintained outside the building line of this property; that all permits required shall be obtained within six months and the work involved completed within one year from the date of this action.

THE RESOLUTION—

(482-28-BZ)

WHEREAS, Herman Levine, for Julia Cameron, owner, filed, May 24, 1928, an application, under the building zone resolution, to permit, partly in a residence district and partly in a business district, the maintenance of a motor vehicle repair shop and garage for the storage of more than five motor vehicles; premises 403-413 West 124th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 124th street, north side, west of a point 100 ft. west of Morningside avenue, is in a residence district; West 124th street, north side, east of a point 100 ft. west of Morningside avenue, is in a business district; West 124th street, south side, west of the westerly line of Morningside avenue, is in a residence district; West 124th street, south side, east of the easterly line of Morningside avenue, is in a business district; Hancock place is in a business district; LaSalle street is in a business district, and Amsterdam avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 23, 1928 (re Applic. No. 35-1928), reads:

"1. Public garage and motor vehicle repair shop partly in a business district and partly in a residential district contrary to zoning resolution."

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 175 ft. and a depth of 100 ft. 11 in.; to be occupied as a motor vehicle repair shop and garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant has substantiated his basis of appeal under section 7g in that he has filed over 82 per cent consents with this board, affecting practically all the property on West 124th street, Morningside avenue and Amsterdam avenue; and

WHEREAS, the board deemed that he was entitled to relief under section 21 of the building zone resolution on the grounds of unnecessary hardship and practical difficulty.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected of fireproof construction throughout, equipped with an approved sprinkler system and restricted in size, area and dimensions to plans of record filed with this appeal; that all necessary permits shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

THE RESOLUTION—

(657-28-BZ)

WHEREAS, Albert Conway, for Second Mortgage Securities Corp., owner, filed, August 7, 1928, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed business building; premises 1106-1118 Eastern Parkway, south side, 45 ft. west of Utica avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Utica avenue is in a business district; Eastern Parkway, west of a point 100 ft. west of Utica avenue, is in a residence district, and Union street, west of a point 100 ft. west of Utica avenue, is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 6, 1928 (re App. No. 5940-28), reads:

"Proposition is contrary to Art. II, Sec. 3 of the Building Zone Resolution. The erection of a business building extending into a residential use district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, three stories and basement in height, with a frontage of 110 ft. and a depth of 90 ft. 7 in.; to be occupied as a business building (stores and offices); and

WHEREAS, the board deems that applicant has substantiated his basis of appeal brought under sections 7c and 21 of the building zone resolution in that the premises are now occupied for business use, and that denial of this variation would develop a hardship upon the applicant.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building erected shall not exceed in height three stories above grade, the first story of the street grade for the use of retail shops or stores, the remaining two upper stories shall be restricted to business office use and occupancy; that there shall be no manufacturing of any nature or description above the first story level; that any advertising display shall be restricted to the plate glass show windows or the frieze of the show window store front; that there shall be no advertising of any nature or description above the street floor level; that the building shall set back from the building line on Eastern Parkway not less than 30 ft.; that all other requirements of the zoning law shall be complied with in all respects; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

255-28-BZ.

APPLICANT—William F. Doyle, substituted for Charles Schaefer, Jr., for William A. Taylor Building Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7g and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1676-1678 Jerome avenue, east side of Jerome avenue, 165 ft. north of East 174th street, The Bronx.

THE RESOLUTION—

(255-28-BZ)

WHEREAS, William F. Doyle, substituted for Charles Schaefer, Jr., for William A. Taylor Building Co., Inc., owner, filed, March 23, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1676-1678 Jerome avenue, east side, 165 ft. north of East 174th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district, Townsend avenue is in a residence district, East 174th street is in a business district and Clifford place is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 23, 1928 (re App. N. B. 589-28), reads:

"1. Proposed garage in business district contrary to zoning resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the application is substantially supported by consents of owners of property immediately affected and because the property lies between two public garages of extensive area, the board deems that the denial of this application would constitute a hardship as defined in section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be limited in height to two stories above grade; that there shall be established and maintained at the level of the second story rear a 10-foot yard throughout the entire width of the premises; fixed ventilators shall be installed along the rear, second story, wall not more than 10 ft. apart and not more than 8 ft. in length; that the building shall be constructed fireproof; that the exterior of the front elevation shall be finished in two-toned face brick and trimmed with architectural terra cotta or natural stone trim; there shall be no advertising displayed on the avenue front other than one projecting electric sign, indicating the name and title of the business conducted on the premises; that the requirements of the zoning law shall be complied with in all other respects; that all permits required shall be obtained within nine months and all work involved thereby completed within one year from the date of this action.

314-28-BZ.

APPLICANT—William F. Doyle, for 1738 Crotona Park Co., owner.

SUBJECT—Application for reopening—modification—re application (decision of fire commissioner) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—902-914 Westchester avenue, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(314-28-BZ)

WHEREAS, William F. Doyle, for 1738 Crotona Park Co., owner, filed, April 5, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 902-914 Westchester avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 9, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Westchester avenue is in a business district, East 163rd street is in a business district and Rogers place, from a point 100 ft. south of East 163rd street to a point 100 ft. north of Westchester avenue, is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered March 28, 1928 (re Plan No. 826-28), reads:

"1. A gasoline service station at the above location being in a business district may not be permitted."; and

WHEREAS, the premises consist of an irregularly shaped plot of ground having a frontage of 123.72 ft. on East 163rd street, 150.37 ft. on Westchester avenue and 85.47 ft. on Rogers place; it is proposed to remove the existing stores and to erect upon the plot a small one-story office and accessory store and, also, to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the premises consist of a triangular island plot, lying in the bed of two highways, each being 100 ft. in width, said premises facing on three street fronts; and

WHEREAS, the premises have been occupied with a one-story store building for a number of years, making no return on the investment, the board believes that applicant is entitled to relief under section 21 of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, October 9, 1928, on certain conditions, and applicant requested a modification of these conditions.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed building to be erected for the accommodation and shelter of the operators and patrons of the gasoline service station shall not exceed one story in height, located approximately in the center of the plot, and shall be finished on the exterior with light enameled brick with architectural terra cotta or stone trimming; that there shall be incorporated at the building line throughout the premises a concrete curbing not less than 12 inches in height; that there shall be located at the apex formed by Westchester avenue and 163rd street a concrete platform not less than 12 inches in height and not less than 20 ft. in length; that the gasoline pumps shall be located not less than 10 ft. from the building line on any street front; that the operation, use and conduct of the premises shall be restricted and confined within the limits of the property; that there shall be no signs or advertising displayed other than that on the illuminated globes of the gasoline pumps and an illuminated sign on the ridge of the proposed building; that all permits required shall be obtained within six months and any work involved completed within one year from the date of this

MINUTES

action, and that a return of the drawings, plans and elevations shall be made to this board for approval before submission to the superintendent of buildings.

CASES DISMISSED.

Appeals from Administrative Orders.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duties:

(484-28-A)

Filed May 25, 1928—Premises 318 West 15th street, Borough of Manhattan. Order of the fire commissioner. Appellant: Petroleum Heat and Power Co. Dismissed for lack of prosecution.

(507-28-A)

Filed June 4, 1928—Premises 1184 75th street and 7512 Twelfth avenue, Borough of Brooklyn. Order of the fire commissioner. Appellant: Fred W. Denny. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders and decisions of administrative officials affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are *dismissed* for lack of prosecution.

Under the Building Zone Resolution.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duties:

(496-28-BZ)

Filed May 31, 1928—Premises southwest corner of Richmond road and Newberry avenue (1328 Richmond

road), Borough of Richmond. Decision of the superintendent of buildings. Applicant: Walter W. Wanzer. Dismissed for lack of prosecution.

(532-28-BZ)

Filed June 12, 1928—Premises southwest corner of Jerome avenue and Clinton place, Borough of The Bronx. Decision of the superintendent of buildings. Applicant: Thomas Jefferson Ryan. Dismissed for lack of prosecution.

(538-28-BZ)

Filed June 14, 1928—Premises northwest corner of East 205th street and Webster avenue (Parkside place), Borough of The Bronx. Decision of the superintendent of buildings. Applicant: Thomas Jefferson Ryan. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners
Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications, under the building zone resolution, affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are *dismissed* for lack of prosecution.

AREA FIXED.

(801-27-BZ)

The chairman presented and read a communication from Cohen & Siegel, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3220-3238 Webster avenue, Borough of The Bronx.

The following area was approved by the board:

Both sides of Webster avenue and also Parkside avenue from a point 400 ft. south of premises in question to a point 200 ft. north of proposed garage; also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

Adjourned 3.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

MINUTES

BOARD OF STANDARDS AND APPEALS

REGULAR MEETING

TUESDAY AFTERNOON, DECEMBER 11, 1928.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

APPEALS FROM ADMINISTRATIVE ORDERS.

412-28-A.

APPELLANT—Austin C. Keough and William T. Powers, for Paramount Famous Lasky Corporation, lessee.

SUBJECT—Appeal from order of the fire commissioner. PREMISES AFFECTED—1493-1501 Broadway, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to January 8, 1929, at 10 a. m., pending inspection and report by a committee of board.

365-28-A.

APPELLANT—The Alice Foote MacDougall Coffee Shops, Inc., lessee.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—50 West 57th street, Manhattan.

APPEARANCES—

For Appellant: Thomas J. Donovan.

ACTION OF BOARD—Laid over to December 18, 1928, at 10 a. m., on request of appellant's representative.

MINUTES

576-28-A.

APPELLANT—William F. Doyle, for Isidore Gross, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—628-642 Amboy street, northwest corner of East 98th street, Brooklyn.

APPEARANCES—

For Appellant: William F. Doyle.

ACTION OF BOARD—Laid over to January 8, 1929, at 10 a. m., to submit documentary proof.

580-28-A.

APPELLANT—The New York Trust Company, lessee.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—1 East 57th street, northeast corner of Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: Thaddeus Olszewski.

ACTION OF BOARD—Laid over to January 8, 1929, at 10 a. m., on request of appellant's representative.

541-28-A.

APPELLANT—Le Roy P. Ward, for Adams-Flanagan Co., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—2866-2870 Third avenue, The Bronx.

APPEARANCES—

For Appellant: Le Roy P. Ward.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative 0

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(541-28-A)

WHEREAS, Le Roy P. Ward, for Adams-Flanagan Co., owner, filed, June 15, 1928, an appeal from an order of the fire commissioner, affecting premises 2866-2870 Third avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated May 28, 1928 (Order No. 37886-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto;"

and

WHEREAS, the building is non-fireproof, the southerly portion being four stories and basement and the northerly portion being three stories and basement in height, irregular in area; having a frontage of 75 ft. on Third avenue, 235 ft. on Westchester avenue and 215 ft. on Bergen avenue; a total area of approximately 27,000 sq. ft. on the basement story, 26,000 sq. ft. on the second and third stories and 11,700 sq. ft. on the fourth story; OCCUPIED as a department store, 210 employees in entire premises; and

WHEREAS, appellant contends that the building is low in height, faces on three street fronts, is equipped with an automatic sprinkler system supplied from a 30,000-gallon gravity tank and three pressure tanks having a total capacity of 25,000 gallons; there being, also, siamese connections on Westchester avenue and Bergen avenue; appellant contends that the system is provided with a thermostatic fire alarm with connection to fire headquarters; and

WHEREAS, the order is issued on the area of the structure; and

WHEREAS, the building is but three stories in height, with one portion not more than four stories in height, facing on three street fronts; and

WHEREAS, the entire premises is equipped throughout with approved wet sprinkler system and watchman system with central office connection.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted on condition that the building be not increased in height, area or dimension, so long as conditions as to occupancy and use remain substantially unchanged and the horizontal opening on the third story to a four-story building adjoining to the northwest shall be equipped with automatic fire doors on both sides of opening.

774-28-A.

APPELLANT—William F. Doyle, for Israel B. Miller, owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—6501-6505 13th avenue, southeast corner of 65th street, Brooklyn.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—The motion to sustain the order of the fire commissioner to surrender the permit and discontinue the maintenance and operation of the gasoline service station, denied.

THE VOTE TO SUSTAIN ORDER OF THE FIRE COMMISSIONER—

Affirmative: Commissioner Connell..... 1

Negative: Chairman Walsh, Commissioners

Holland and Guilfoyle and Chief Kenlon. 4

Absent 0

THE RESOLUTION—

(774-28-A)

WHEREAS, William F. Doyle, for Israel B. Miller, owner, filed, October 5, 1928, an appeal from an order of the fire commissioner, affecting premises 6501-6505 13th avenue, southeast corner of 65th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 11, 1928 (Order No. 18919-C), reads:

"1. Surrender to the Bearer F. D. PERMIT No. 255103, issued July 12th, 1928, to expire July 10th, 1929, authorizing the maintenance of a gasoline sales station at the above location and permitting the storage of twenty-two hundred (2,200) gallons of gasoline in four underground storage tanks, as the permit is herewith revoked for the reason that the gasoline storage tanks were installed without plans and specifications, being approved by the Fire Department (F. D. Plan No. 1454-28 disapproved).

"2. You are, therefore, ordered to forthwith discontinue the maintenance of gasoline-sales station at the premises, 6501-6505 13th Avenue, Brooklyn, and to remove all gasoline from the underground storage tanks, and to close and seal the inlet and outlet openings of said storage tanks;"

and

WHEREAS, the premises consist of a one-story non-fireproof office, 20 ft. by 20 ft., greasing pits, four pumps and four 550-gallon underground tanks, upon a lot 60 ft. by 100 ft. in area; OCCUPIED as a gasoline service station within a business use district; and

WHEREAS, the appellant claims that four 550-gallon tanks were buried on the premises, in accordance with approved plans for a gasoline service station, filed with the fire department in 1924; that the present owner filed plans with the fire department in 1928 for the erection of additional buildings and pumps in connection with the gasoline station; permits were obtained from the fire department and also the superintendent of buildings to perform the work, the foundations were being erected when a taxpayers' action

MINUTES

was started and also an appeal was filed with the board of standards and appeals, known as Cal. No. 715-28-A, for the revocation of the permits; the fire department and the superintendent of buildings then revoked the permits, the appeal (Cal. No. 715-28-A) was then withdrawn; this appeal is now made for the purpose of deciding the validity of the acts as noted above; and

WHEREAS, it would appear from the documentary proof submitted by the appellant that permits were issued and there was no departmental contradiction as to the progress of the work on the gasoline service station.

Resolved, that the order of the fire commissioner to surrender permit and to discontinue the maintenance of a gasoline service station be *reversed* and the appeal *granted*.

379-28-A.

APPELLANT—Samuel Rosenblum, for Bond Stores, Inc., lessee.

SUBJECT—Appeal from orders of the fire commissioner and decision of the superintendent of buildings.

PREMISES AFFECTED—1556-1560 Broadway and 157-165 West 46th street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon..... 1

THE RESOLUTION—

(379-28-A)

WHEREAS, Samuel Rosenblum, for Bond Stores, Inc., lessee, filed, April 21, 1928, an appeal from orders of the fire commissioner and decision of the superintendent of buildings, affecting premises 1556-1560 Broadway and 157-165 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 24, 1927 (Order No. 21538-LD), reads:

"1. Discontinue the use of the premises for factory purposes for the reason that the building is occupied in violation of Certificate of Occupancy No. 10141 issued October 26, 1925, and because the premises do not comply with the Labor Law for the reason that the stairway at the west side of the building does not lead directly to the street and is not enclosed in fireproof partitions on the 1st story and all doors do not open outwardly and are not of fireproof construction."

and

WHEREAS, the order of the fire commissioner, dated December 8, 1927 (Order No. 29529-LD), reads:

"1. Arrange the door leading to stairway at west side of building so as to open outwardly, without obstructing the stairway, as per Section 271 of the Labor Law."

and

WHEREAS, the decision of the superintendent of buildings, rendered November 8, 1928, reads:

"In reply to your letter relative to premises 1556-60 Broadway and 157-65 West 46th Street, we beg to state that we have examined the plans of said building and advise you that the following changes will be necessary in the building to permit the use of 15 persons on the second floor in making repairs to garments sold on the premises in connection with stores and showrooms for the sale of clothing on the second floor; also 3 persons on the 8th floor by a commercial photographer and two persons on the 10th floor as a mechanical dentist and one person on the 11th floor as a mechanical dentist:

"1. Exterior windows do not meet the requirements of the Labor Law as the glass exceeds 720 sq. in. in area.

"2. Doors do not swing out and have plain glass panels, Section 264, paragraph 5 and Section 270, paragraph 5.

"3. Interior stairs in front of building, Broadway side, not enclosed from mezzanine level to building line at street level in fireproof partitions.

"4. All steel should be protected with 2 inches of fireproof material."

and

WHEREAS, the building is fireproof, sixteen stories and pent house in height, 60 ft. by 180 ft., irregular, in area; erected in 1925; OCCUPIED: 1st story, stores and theatre, 15 persons each store and 598 theatre; 2nd story and mezzanine, stores and showrooms, 100 persons, of which 15 are at minor repairs; 3rd story to 16th story, offices, 120 persons each story; pent house, apartment, 8 persons; which occupancy is permitted by Certificate of Occupancy No. 10556 of 1926; the means of EGRESS consist of an interior fireproof stairway and a fire tower; the building having a frontage of 60 ft. on Broadway and 100 ft. on 46th street; and

WHEREAS, it appears that there is a stairway leading from the Broadway front to the second story and the second story is used as a clothing store, and it becomes necessary from the nature of the business to do slight repair work; there is no manufacturing, only minor repairs in connection with garments sold on the premises; that the doors referred to in the order open from the offices to the halls which connect to the stairs; that all doors at exits now open outwardly; that there is a center revolving door on the second story; and

WHEREAS, appellant contends that it is not desired to convert the building into a factory building; that the occupancy at repair work is not over 21 persons; that the total occupancy is 120 persons per floor and 100 persons on the second story; that less than 25 persons are engaged in what might be termed factory work, which is 1 per cent of the total occupancy of the building.

Resolved, that the orders of the fire commissioner and the decision of the superintendent of buildings be and they hereby are *affirmed*, and that the appeal be and it hereby is *denied*.

BUILDING ZONE CASES

477-28-BZ.

APPLICANT—John J. Dunnigan, for the Roman Catholic Church of The Holy Spirit, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7(c) and 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a business building (stores).

THE RESOLUTION—

(406-28-BZ)

WHEREAS, Edward L. Kelly, for Anna Stanaitis, owner,

MINUTES

filed, April 30, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 301-305 Grandview avenue, Ridgewood, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 11, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Metropolitan avenue, between Grandview avenue and Rene court, is in a business district; Metropolitan avenue, north side, west of Sophie street, is in an unrestricted district; Metropolitan avenue, south side, west of Grandview avenue, is in a residence district; Emma street, east side, north of Metropolitan avenue, is in an unrestricted district; Grandview avenue, east side, is in a business district, and Grandview avenue, west side, is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered April 14, 1928 (re No. 962-28), reads:

"1. A gasoline service station at the above premises

being in a business district may not be permitted. 4-6 Building Zone Resolution.";

WHEREAS, the decision of the superintendent of buildings, rendered December 6, 1928 (Plan No. 10580-28), reads:

"The creation of a gasoline service station in a business district is contrary to Zone Law.";

and
WHEREAS, the premises consist of an irregular shaped plot of ground having a frontage of 60.45 ft. on Metropolitan avenue, 71.99 ft. on Grandview avenue and a distance of 38.11 ft. across the rear, upon which it is proposed to erect a small one-story office and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the decisions of the fire commissioner and the superintendent of buildings be and they hereby are affirmed, and that the application be and it hereby is denied.

Adjourned 6.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be laid side by side across the top of a gas crucible furnace

with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RULES

RULES OF PROCEDURE OF BOARD OF STANDARDS AND APPEALS

ADOPTED FEBRUARY 15, 1927

(89-27-SR)

ARTICLE I—PUBLIC HEARING.

1. Regular sessions designated as public hearings of the Board of Standards and Appeals shall be held on Tuesday of each week at 10 A. M. and 2 P. M.

2. Morning sessions shall be devoted to hearings on appeals from administrative orders and applications for variation of the building zone resolution. Afternoon sessions, in general, shall be given over to hearings on petitions for variation of the labor law and consideration of rules. Notice shall be published in the Bulletin of the Board of deviation from this procedure.

3. Special sessions may be called by the Chairman, or at the request of four members, provided that notice of the same has been mailed to each member at least twenty-four hours before the time set, except that the announcement of a special session at any meeting at which a quorum is present shall be sufficient notice of such meeting.

4. All hearing sessions shall be open to the public.

5. A quorum of the Board of Standards and Appeals shall consist of four members.

6. The members of the Board shall attend the meetings in person, except that during absence or disability a substitute may act, as provided by law under section 718 of the Charter as amended by Local Law No. 13. The names of such substitutes, designated by the Mayor, shall have been previously filed with the chairman.

ARTICLE II—CASES BEFORE THE BOARD.

1. Every application under the Building Zone Resolution, every appeal under section 719 of the Charter and every petition under section 718a, subdivision 4, of the Charter, shall be made to the Board on the forms provided, and shall include the data required in such forms, so as to supply all information necessary for a clear understanding by the Board and its staff. Action in each case must be based largely on the information so furnished. The statements made by the applicant, appellant or petitioner and the determination of the Board in each case will be incorporated in a resolution formally adopted and published in the Bulletin of the Board. Officials who are charged with the enforcement of the laws, ordinances and rules relating to buildings in the City of New York will be bound by such resolutions, and, before granting permit or taking any other affirmative action, should see that there are no misstatements as to facts and that the conditions of the resolution are observed. Any administrative official discovering any misstatement of essential information is requested to notify the Board, in order that it may take such action as the circumstances require. All approvals shall remain valid only as long as the information and the conditions on which the resolution was based are maintained.

2. Any communication purporting to be an application, appeal or petition shall be regarded as a mere notice of intention to seek relief and shall be of no force or effect until it is made in the form required.

3. Upon receipt of any such communication, the writer shall be supplied with the proper forms for presenting his application, appeal or petition, and he shall be required to file the proper form and furnish all necessary data within twenty days of the date of the order or decision appealed from.

4. The duplicate of each application, appeal or petition required by this article shall be forwarded promptly to the administrative official whose order is involved in such case.

5. At the public hearing of a case before the Board, the applicant shall first present the argument in support of the case and those in objection shall follow. To maintain orderly procedure, each side shall proceed without interruption by the other.

6. Every person before the rostrum shall abide by the order and direction of the Chairman. Discourtesy or disorderly or contemptuous conduct shall be regarded as a breach of the privileges of the Board and shall be dealt with as the Chairman deems proper. Orders to maintain discipline shall be carried out by the Sergeant-at-Arms.

Subject to the direction of the Chairman, the Secretary shall enforce the rules of the Board and shall direct and supervise the Sergeant-at-Arms in maintaining order and decorum in the hearing room and lobbies during all public hearings.

7. No member shall proceed to debate, discuss an issue, put a motion or offer a resolution until he shall have addressed the Chairman and have been recognized by him. While the Chairman is putting a motion or offering a resolution, or during the progress of a roll call, no member shall interrupt or leave his seat. When a motion to adjourn is carried, the members of the Board shall keep their seats until the Chairman declares the meeting adjourned.

ARTICLE III—THE CALENDAR.

1. Each case filed in the proper form, with the required data, shall be numbered serially, irrespective of whether it be an application, appeal or petition. These Calendar numbers shall begin anew on January 1st of each year, and shall be hyphenated with the number of the year and the initials indicating the character of the case. Thus the calendar number of an application under the Building Zone Resolution in 1926 shall be "210-26-BZ"; an appeal from an order, requirement, decision or determination of a Superintendent of Buildings or of the Fire Commissioner, "211-26-A," and a petition for variation of the Labor Law or any rule or standard adopted thereunder, "212-26-S."

2. As soon as a case receives a calendar number, it shall be placed on the Docket. Thereafter the appellant or petitioner shall be notified of the date his case will be set for public hearing. In building zone applications the applicant shall be notified of the date when his case will be reached in the call of the Clerk's Calendar.

3. The Clerk's Call Calendar shall be called each Tuesday at 2 P. M., in Room 1013, Municipal Building, Manhattan, by the Chairman or the Secretary, and a date, for the public hearing of each application for variation of the Building Zone Resolution, shall then be set, which shall be full and sufficient notice to all persons interested in such case.

4. Thereafter each case shall be listed, by calendar number and premises, in the Hearing Calendar printed in the Bulletin of the Board, under the title of the respective proceedings, and the date for which such case has been set.

ARTICLE IV—DISPOSITION OF CASES.

1. Every decision of the Board on any case shall be by resolution.

RULES

2. The final disposition of any application, appeal or petition before the Board shall be in the form of a resolution either reversing, varying or modifying the order, requirement, decision or determination appealed from and granting the application, appeal or petition, or affirming the order and denying the application, appeal or petition. The concurring vote of four members shall be necessary to a decision. If a resolution fail to receive four votes in favor of the applicant, appellant or petitioner, the action will be deemed equivalent to a denial, and a resolution denying such application, appeal or petition shall be formally entered on the record, unless there be a member absent at the roll call and the vote of the absentee added to the number of votes for the applicant appellant or petitioner would equal four, in which case the matter will be laid over for reconsideration, until a final determination is reached.

3. Any applicant, appellant or petitioner may withdraw his application, appeal or petition at any time prior to action thereon, with the consent of the Board, but if a motion has been made, and is pending, either to grant or to dismiss, such motion shall have precedence.

4. No application, appeal or petition dismissed or denied can be considered again except (1) on a motion to reconsider the vote, or (2) on a request for a rehearing.

5. No request to grant a rehearing can be entertained unless new evidence is submitted. If, on motion of a member of the Board, adopted by four affirmative votes, the request for a rehearing is granted, the case shall be put on the calendar for a rehearing.

In all cases, the request for a rehearing shall be in writing, reciting the reasons for the request, and shall be duly verified and accompanied by the necessary data and diagrams. Such request shall be filed with the Chairman, who shall have a report on the case prepared by the engineers. The Chairman may then set a date when the request for reopening shall be submitted to the Board, of which date the person requesting the reopening shall be notified.

If the Board votes to reopen a case affecting a building zone application, a date shall be set for the "Calendar Call" and the applicant shall be required to notify each of the property owners entitled to notice of the application, the same procedure to be followed as in an original application.

6. The Board may, on the motion of any member, review any decision that it has made and may reverse or modify such decision, but no such review shall prejudice the rights of any person who has in good faith acted thereon before it is reversed or modified.

ARTICLE V—BUILDING ZONE APPLICATIONS.

1. No application for a variation or modification of the provisions of the Building Zone Resolution shall be entertained by the Board except in a specific case, and from an order, requirement, decision or determination made by any Superintendent of Buildings, the Tenement House Commissioner, or the Fire Commissioner, on the ground that the proposed plan or use violates the Building Zone Resolution.

2. No such application shall be entertained unless the application is filed within twenty days from the date of the action of the Superintendent of Buildings, Tenement House Commissioner, or Fire Commissioner.

3. Every application shall be made in duplicate on Form 3BZ and shall be accompanied by all the data required by such form, and shall be considered subject to such rules as the Board has adopted or may adopt, under Article 5, Section 21, of the Building Zone Resolution.

4. As soon as any application is completed by the filing of the data required in Form 3BZ, the case shall receive a calendar number and shall be placed on the Clerk's Calendar, and the applicant shall be notified by the Board on Form 6CC, of the time set for the call of the calendar, which shall be at least five days after the mailing of said notice. With this notice the applicant shall be supplied with an official copy of Form 7NO, which he is required to send to every property owner entitled to notice of the application. Within three days the applicant must file a verified statement that he has so notified each of such property owners either by personal service or by registered mail. Not less than fourteen days' notice of the date fixed for calendar call in each Building Zone application shall be given by publication in the Bulletin of the Board.

5. On the call of the Clerk's Calendar the applicant shall appear in person, or by agent or attorney, and property owners affected by the application may appear either in person or by agent or attorney and present any typewritten and verified objections they may have to the granting of the application, together with a description of their property and an affidavit of ownership. Then a date shall be set for a public hearing on the application which shall be not less than fourteen days thereafter. Notice of said hearing shall be given by publication in the Bulletin of the Board.

6. On the date set for the public hearing, the applicant shall state his case, then the opposition shall be heard, and the applicant shall have an opportunity to reply.

7. No application that has been denied after a public hearing can be entertained under the same state of facts or basis of appeal, unless based upon a new decision by a superintendent of buildings on plans which materially change the aspects of the case.

ARTICLE VI—APPEALS.

1. No appeal from any order, requirement, decision or determination of the Superintendent of Buildings or the Fire Commissioner or from any rule or regulation relating to the construction, alteration, structural changes in, equipment, occupancy or use of any building or structure, under Section 719 of the Charter, shall be entertained unless such appeal is filed in duplicate on Form 1A, with all the data required in such form, within twenty days from the date of the order appealed from.

ARTICLE VII—PETITIONS.

1. No petition for variation of the Labor Law, or of any rule adopted thereunder affecting the construction or alteration of buildings, exits therefrom, the installation of fixtures or apparatus as authorized by Section 718-a, subdivision 4 of the Charter, shall be entertained unless it is made in duplicate on Form 2S, with all the data required in such form, within twenty days from the date of the administrative order to which the petition refers.

No petition for approval of a device, material or method of construction shall be entertained unless it is filed in duplicate on Form 4SA, with all the data required in such form.

No petition for the adoption or amendment of Rules shall be entertained unless it is filed in duplicate on Form 5SR, with all the data required in such form.

ARTICLE VIII—PETITIONS.

1. No resolution of the Board of Standards and Appeals adopting or amending any rule or regulation under subdivision 2 or 3 of section 718-a of the Charter shall be adopted unless such proposed rule or regulation shall

RULES

have been published in the Bulletin of the Board for at least ten days prior to a public hearing thereon. Four affirmative votes of the Board shall be necessary for the adoption of such resolution.

2. Amendments to these Rules of Procedure may be made by the Board of Standards and Appeals at any regular meeting, providing notice of such amendment has been given to each member of the Board three days prior to such meeting, either in writing or by publication in the Bulletin. The suspension of any rule of procedure may be ordered at any meeting by unanimous vote.

ARTICLE IX—OTHER RESOLUTIONS.

1. Every resolution of the Board of Standards and Appeals suggesting changes or amendments to the law under subdivision 5, section 718-a of the Charter shall require at least four affirmative votes for its adoption.

2. Every resolution not otherwise provided for, ordinary motions or decisions on rules of order shall require not more than three affirmative votes.

ARTICLE X—INSPECTIONS.

1. In any case in which the Board may deem it necessary, an inspection of the premises in question may be ordered by the Board. Such inspection shall be made by the Chairman and by two or more members designated by him, and they shall report their findings to the Board in writing.

ARTICLE XI—TESTS.

1. In any case in which the Board may order a test of any material or device, the test shall be conducted under the supervision of an assistant engineer, in the presence of the Chairman and two or more members appointed by him, and the result of such test shall be reported to the Board in writing, and the material or device shall not have the approval of the Board unless the report be favorable and adopted by four affirmative votes.

ARTICLE XII—RECORDS.

1. All applications, appeals and petitions shall be on the required forms, and all communications, reports, etc., and plans, relative to any matter appearing on the calendar, shall be on sheets approximately 8 in. by 10½ in. in size. After final disposition, they shall be bound in some suitable manner. These records shall be kept in filing cabinets in their numerical order, in such a manner that they are accessible to the public at all reasonable hours, as prescribed by the Charter of the City of New York.

2. An index indicating locations by boroughs shall be kept.

3. All reports on matters coming before the Board for action shall be duplicated in sufficient numbers to furnish a copy to each member. The original shall be filed with the records in each case.

ARTICLE XIII—THE BULLETIN.

1. The Bulletin of the Board of Standards and Appeals shall be published on Tuesday of each week. It shall contain:

- (1) Directory of the Board.
- (2) Docket.

(3) Clerk's Calendar Call.

(4) The Hearing Calendar.

(5) Notice of hearing on building zone applications and on proposed rules or the amendment of rules.

(6) An abstract of the minutes of each meeting, including a brief statement of the action in each case, with the roll call thereon and the full text of the resolutions adopted.

(7) Rules adopted.

(8) Such other information as may be of value to the public and within the scope of the work of the Board.

ARTICLE XV—OFFICERS.

1. The Chairman shall preside at meetings. The Chairman may designate any member of the Board to preside and perform the duties of the Chair at public hearings.

2. The Chairman, subject to these rules, shall decide all points of order or procedure, unless otherwise directed by a majority of the Board in session at that time.

3. The Chairman shall designate the members of the Board to make an inspection, and, unless otherwise directed by the vote of four members of the Board, shall appoint any committee that may be deemed necessary.

4. The Chairman shall report at each meeting on all pertinent official transactions that do not otherwise come to the attention of the Board.

5. Administrative authority is vested solely in the Chairman of the Board who shall, subject to these rules, transact all official business of the Board, engage the necessary employees and direct the work of the office.

6. Subject to these rules and the direction of the Chairman, the Secretary shall conduct all official correspondence, compile the required records, edit the Bulletin, maintain the necessary files and indices, and generally supervise the clerical work of the office force, maintaining discipline in accordance with the rules of the office and charter provisions.

7. Subject to these rules and the direction of the Chairman, the Assistant Engineers shall examine and report on all applications, appeals and petitions; prepare all proposed rules or revised rules suggested by outside agencies, with report on the reasons and necessity for same; supervise and witness the tests conducted under the auspices of the Board, and assist generally in all technical matter coming before the Board.

8. The Chief Clerk shall keep all accounts, keep the files and indices in proper order and up to date, and generally assist the Secretary. During the absence or disability of the Secretary, the Chief Clerk shall act in that capacity.

9. A complete stenographic record of the transactions at public meetings shall be made for the files, including verbatim reports of such parts as may be directed, and there shall be prepared, after each meeting and in time for the next publication of the Bulletin, the abstract of the minutes which is to appear in such Bulletin.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, December 14, 1928, 10 a. m.

Minutes of Special Meeting, December 14, 1928, 2 p. m.

Minutes of Regular Meeting, December 18, 1928, 10 a. m.

Minutes of Regular Meeting, December 18, 1928, 2 p. m.

Fire Retarding Rules.

Appliances Approved.

Reserve Calendar.

Notice of Public Hearing on Amendments to Fuel Oil Rules.

Rules for Testing Wood.

Progress Report.

PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

THE LIBRARY OF THE

HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Wednesday, December 26, 1928, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Wednesday, January 2, 1929, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and disposition of same expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

524-28-A—223-225 Waverly place, Manhattan.

Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Wednesday morning, December 26, 1928*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 641-28-BZ—Application, July 27, 1928, under section 21 of the building zone resolution, of Thomas O'Rourke Gallagher, applicant, on behalf of Salvatore Ferraioli, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 2713-2717 Harway avenue, Brooklyn.

CAL. NO. 133-28-BZ—Application, February 10, 1928, under sections 7e and 21 of the building zone resolution, of 340 West 57th Street Corp., applicant and owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 229-235 East 85th street, Manhattan.

CAL. NO. 673-28-BZ—Application, August 16, 1928, under sections 7a, 7b and 21 of the building zone resolution, of Edward P. Doyle, applicant, on behalf of John P. Leo, owner, to permit in a residence district the extension and maintenance of a building to be used for business use; premises 477 West 150th street, Manhattan.

CAL. NO. 347-28-BZ—Application, April 14, 1928, under section 21 of the building zone resolution, of McCooey & Conroy, applicants, on behalf of Samuel Koff, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 1293-1311 Gravesend avenue, northeast corner of Bay Parkway, Brooklyn.

THE RESOLUTION—

(1192-27-BZ)

WHEREAS, Henry J. Nurick, for Louis Del Gaudio, owner, filed, November 11, 1927, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 1756-1764 Bushwick avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bushwick avenue is in a business district; Pellington place, north of a point 100 ft. north of Bushwick avenue, is in a residence district, and Fanchon place, north of a point 100 ft. south of Bushwick avenue, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 31, 1927 (re App. No. 18180-27), reads:

"1. Proposition is contrary to Zone Resolution, Art. II, Sec. 4a (46) gasoline service station in a business district."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 54 ft. 11½ in. on Pellington place and 94 ft. 4½ in. on Bushwick avenue, upon which it is proposed to erect a one-story office, 15 ft. by 20 ft. in area, and to install the necessary tanks and pumps for a gasoline service station; and

WHEREAS, the board deemed that applicant failed to substantiate his basis of appeal under section 21 on the grounds of unnecessary hardship or practical difficulties.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

510-28-BZ.

APPLICANT—Philip Freshman, for Gertrude Holding Corp., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 7g of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and also the installation of a gasoline service station.

PREMISES AFFECTED—15-23 Bay Ridge avenue, northwest corner of Owl's Head court, Brooklyn.

1

THE RESOLUTION—

(510-28-BZ)

WHEREAS, Philip Freshman, for Gertrude Holding Corp., owner, filed, June 4, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and also the installation of a gaso-

MINUTES

line service station; premises 15-23 Bay Ridge avenue, northwest corner of Owl's Head court, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay Ridge avenue is in a business district, Owl's Head court is in a business and residence district and Shore road is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 25, 1928 (re App. No. 8459-28), reads:

"Proposition contrary to the zone resolution Art. II, Sec. 4a subdivisions 15 and 46.

"The erection of a garage for more than five motor vehicles and the installation of a gasoline service station in a business district."

and
WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 110 ft. and a depth of 86 ft. 8 in.; to be occupied as a garage for the storage of more than five motor vehicles and a gasoline service station; and

WHEREAS, after a full hearing and examination of all the facts, the board deems that the application brought under section 21 of the building zone resolution fails of any support.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

479-28-BZ.

APPLICANT—Bennett & Koepfel, for Samuel Bikoff, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence use and "E" area district the erection, within the 10 foot setback line, of a side extension of a building.

PREMISES AFFECTED—60-66 89th street, southeast corner of Shore court, Brooklyn.

APPEARANCES—

For Applicant: Emil Koepfel, Samuel Bikoff and William E. Griffin.

For Opposition: Freeman Imperato.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Absent	0

THE RESOLUTION—

(479-28-BZ)

WHEREAS, Bennett & Koepfel, for Samuel Bikoff, owner, filed, May 23, 1928, an application, under the building zone resolution, to permit in a residence use and "E" area district the maintenance, within the 10 foot setback line, of a side extension of a building erected without a permit; premises 60-66 89th street, southeast corner of Shore court, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 89th street, west of a point 100 ft. west of Colonial road, is in a residence use and "E" area district; 89th street, east of a point 100 ft. west of Colonial road, is in a residence use and "C" area district; Colonial road is in a residence use and "C" area district; Narrows avenue is in a residence use and "E" area district; and Shore court is in a residence use and "E" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 2, 1928 (re App. No. 4575-28), reads:

"Proposition for side extension to be erected within the 10 ft. setback in a residence district, "E" area, contrary to Art. 4, Sec. 15, Par. D of Zone Resolution."

and

WHEREAS, the existing building is of frame construction, two stories in height, with a frontage of 15 ft. 8 in. and a depth of 41 ft. 2 in.; occupied as a one-family dwelling; it is proposed to maintain the existing extension, 5 ft. by 16 ft. in area and 12 ft. high, which has been built on the northerly side of the house; said extension encroaches 5 ft. within the required 10 foot setback line (from the building line); and

WHEREAS, the board deemed that inasmuch as the structure is an invasion of the area district regulations and was built in violation of the law without application or permit of building bureau.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

590-28-BZ.

APPLICANT—Hamill, Weinberg & Munro, substituted for Cohen & Siegel, for Leo Silver Co., Inc., owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit, partly in a business district and partly in a residence district, and also within a "B" area district, the alteration and extension in height of an existing garage for the storage of more than five (5) motor vehicles and the installation of a gasoline service station, also the omission of the rear yard required under the zone resolution.

PREMISES AFFECTED—543-549 East Fordham road, north side, 100 ft. east of Bathgate avenue, The Bronx.

APPEARANCES—

For Applicant: James J. Munro.

For Opposition: John J. Lenehan.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION—

(590-28-BZ)

WHEREAS, Hamill, Weinberg & Munro, substituted for Cohen & Siegel, for Leo Silver Co., Inc., owner, filed, July 3, 1928, an application, under the building zone resolution, to permit, partly in a business district and partly in a residence district, and also within a "B" area district, the alteration and extension in height of an existing garage for the storage of more than five motor vehicles and the installation of a gasoline service station, also the omission of the rear yard required under the zone resolution; premises 543-549 East Fordham road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Fordham road is in a business district, and Lorillard place, East 191st street and Bathgate avenue are in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 22, 1928 (re App. N. B. 1399-28), reads:

"1. Proposed garage for storage of more than five motor vehicles and gasoline service station partly in business district and partly in residence district is contrary to provisions of Building Zone Resolution,

MINUTES

"2. Rear yard may be provided as required by Building Zone Resolution.";

and

WHEREAS, it is proposed to reconstruct and extend an existing building; the building, when reconstructed, is to be of fireproof construction, two stories in height, with a frontage of 100 ft. and a depth of 83 ft. and 150 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles and a gasoline service station; and

WHEREAS, there exists by action of this board, under Cal. No. 447-20-BZ, under section 7e, a garage covering the exact premises, non-fireproof in construction, with a wood-truss roof; and

WHEREAS, it is proposed to alter the existing non-fireproof garage, not exceeding in height the peak of the existing roof; and

WHEREAS, the existing garage on the premises was granted under the rules of exception, section 7; subdivision e.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as the garage use is concerned, the gasoline service station on street front not being permitted, *on condition* that the structure shall be constructed fireproof in accordance with the building code; that the gable walls and rear first story wall shall be unpierced throughout their height and length; that the street wall on the Fordham road front shall be erected flush with the building line; that a rear yard of not less than 10 ft. in depth for the full width of the property at the rear, at the level of the second story, shall be maintained, with wall ventilators attached along rear wall at second story level; that the front elevation shall be finished with face brick with architectural terra cotta or natural stone trim; that any advertising signs displayed shall be restricted to plate glass show windows and one flat wall sign, with not more than one projecting electric sign, indicating the name and title of business conducted on the premises, and that all permits required shall be obtained within six months and any work involved shall be completed within one year from the date of this action.

595-28-BZ.

APPLICANT—William F. Doyle, for Hyrose Building Corp., owner.

SUBJECT—Application (re decision of the tenement house commissioner) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house with stores on the first story.

PREMISES AFFECTED—Southeast corner of Montgomery street and Albany avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle and Benjamin H. Haskell.

For Opposition: None.

Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

(595-28-BZ)

WHEREAS, William F. Doyle, for Hyrose Building Corp., owner, filed, July 5, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house with stores on the first story; premises southeast corner of Montgomery street and Albany avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Montgomery street and Albany avenue are in a residence district and Empire boulevard is in a business district; and

WHEREAS, the decision of the tenement house commissioner, rendered June 15, 1928, reads:

"The use of the first story of proposed building for business purposes is contrary to Art. 2, Sec. 3 of the Building Zone Resolution, and is therefore unlawful.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, six stories and basement in height, with a frontage of 79 ft. and a depth of 140 ft. 7 in.; to be occupied as an apartment house with stores on the basement story; and

WHEREAS, this application is supported by the consents of all the property owners within the affected area; and

WHEREAS, it is proposed to erect a conforming tenement house structure facing on Montgomery street and turning on Albany avenue for a depth of 140 ft. 7 in.; and

WHEREAS, Empire boulevard, the next street southerly from Montgomery avenue, is more than 10 ft. lower; and

WHEREAS, there does exist now on both sides of Albany avenue and immediately abutting stores and business use; and

WHEREAS, the board deems that the application, under section 21, justifies a variation in the nature of an adjustment only for that portion of the cellar area not exceeding a frontage of 40 ft. 7 in. on Albany avenue immediately abutting the existing store use.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the basement area for a frontage of 40 ft. 7 in. by a depth of 100 ft. 8¼ in., starting at a point not less than 100 ft. southerly from the intersection of Montgomery street and Albany avenue, for use as retail mercantile stores, *on condition* that the remainder of the premises throughout shall be restricted and confined to conforming residential use and occupancy; that any advertising displayed on this proposed business occupancy shall be restricted to fixed letters on the plate glass show windows; that there shall be no merchandise of any nature or description exposed or displayed beyond the building line of this business use; that this business use shall be restricted specifically from the conduct of any meat market, fish store or hazardous use or occupancy, and that all permits shall be obtained within nine months and whatever work may be involved shall be completed within eighteen months from the date of this action.

528-28-BZ.

APPLICANT—Bly & Hamann, for Sarah A. Sweedler, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—442-452 89th street and 8902 Fifth avenue, southwest corner of Fifth avenue, Brooklyn.

APPEARANCES—

For Applicant: Nathan Sweedler.

For Opposition: Edward C. Cullen, Morris Fried, Frank Ferrara, Frank H. Lester, Benjamin Liebman, Stephen Kish and Moses Levison.

MINUTES

THE RESOLUTION—

(528-28-BZ)

WHEREAS, Bly & Hamann, for Sarah A. Sweedler, owner, filed, June 9, 1928, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 442-452 89th street and 8902 Fifth avenue, southwest corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its special meeting, December 14, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 89th street is in an unrestricted district, Fifth avenue is in a business district and 90th street is in an unrestricted and business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 4, 1928 (re App. No. 8870-28), reads:

"Public garage for more than 5 cars in a business district is prohibited use, as per B. Z. Resolution, Art. 2, Sec. 15 and is hereby denied.";

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 75 ft. and a depth of 106 ft. 11 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the property is cut by two use districts therefore coming under purview of section 7c; the unrestricted area on 89th street lying between Fourth and Fifth avenues, with garages directly opposite; and

WHEREAS, the board deems that applicant is entitled to relief under section 21 on the grounds of unnecessary hardship and practical difficulties.

Resolved, that the board of standards and appeals does

hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed in height two stories above grade; that the Fifth avenue frontage, street grade, shall be restricted to store use and occupancy for a depth not less than 20 ft. from Fifth avenue and shall be separated from the garage area of the first story by walls of approved masonry; that the westerly and southerly gable walls shall be unpierced throughout their entire height and length; that any openings for vehicular use shall be restricted to the 89th street front and shall be located not less than 75 ft. westerly from the corner formed by the intersection of Fifth avenue and 89th street; that any gasoline storage equipment installed shall be located not less than 75 ft. from the Fifth avenue corner and shall be restricted in operation, use and maintenance to the interior of the premises; that the front elevation shall be finished with light-color face brick, with two-tone colored brick for trim if of panel design, with architectural terra cotta or natural stone trim; that no roof sign shall be erected or maintained; that any advertising sign displayed shall be restricted to the plate glass show windows of the store fronts on Fifth avenue and that not more than one projecting electric sign shall be erected on 89th street, indicating the name and title of business conducted on the premises; that the architect shall make a return of the drawings for approval to this board before submission to the superintendent of buildings in accordance with the foregoing conditions, and that all permits required shall be obtained within nine months and any work involved shall be completed within eighteen months from the date of this action.

PETITION FOR VARIATION.

152-28-S.

PETITIONER—William F. Doyle, for Alan Realty Co., owner.

SUBJECT—Application for reopening—modification—re variation of the labor law as cited in a decision of the superintendent of buildings.

PREMISES AFFECTED—1384-1388 Broadway, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle and Erhard Djorup.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon.. 4

Negative: Commissioner Connell..... 1

Absent 0

THE RESOLUTION—

(152-28-S)

WHEREAS, William F. Doyle, for Alan Realty Co., owner, filed, February 21, 1928, a petition for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 1384-1388 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 9, 1928, reads:

"1. All windows throughout must comply with Sec. 264-7 Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, twenty-three stories in height, having a frontage of 78 ft. $\frac{1}{4}$ in. on Broadway and 102 ft. 2 in. on West 38th street; OCCUPIED: 1st story, stores; 2nd story, bank; upper stories, offices, show-rooms and 25 per cent manufacturing, approximately 30 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the first story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in both street walls of the building on the first, second, third and fourth stories glazed with plate glass; the maximum area of the glass not exceeding on the first story 8 ft. by 13 ft.; on the second story 6 ft. by 7 ft.; on the third story 8 ft. by 10 ft., and on the fourth story 8 ft. by 10 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the four lower stories and would also detract from the architectural appearance of the building; and

WHEREAS, this petition was granted by the board at its meeting, July 3, 1928, on certain conditions, and petitioner requested a modification of these conditions as to area of glass in windows of first story.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows of the three lower stories,

MINUTES

street front, *on condition* that all openings shall be equipped with approved metal frames and sash, glazed with one-quarter-inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(1426-24-A)

WHEREAS, William F. Doyle, for Mrs. Theresa D. Browning, owner, filed, December 3, 1924, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 2121-2129 Broadway and 227-229 West 74th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 7, 1924 (Order No. 63036-F), reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation fire department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, four stories (50 ft.) in height, having a frontage of 91 ft. on Broadway and a frontage of 143 ft. on West 74th street; an approximate area of 10,575 sq. ft.; OCCUPIED: 1st story, restaurant; 2nd and 3rd stories, factory, dressmaking and millinery; 4th story, billiard club; approximately 166 persons above the first story; and

WHEREAS, the original appeal was granted June 2, 1925, on certain conditions, for a temporary period of two years; and

WHEREAS, Croker National Fire Prevention Engineering Co. substituted for William F. Doyle, appellant, requests a reopening and modification of the resolution eliminating the time restriction, and claims that the owner has now decided not to demolish the building; it is also proposed to install the standpipe system in accordance with the rules, except the present 2,500-gallon roof tank will be used, having 2,000 gallons reserved for standpipes; the bottom of the tank is 14 ft. 6 in. above the highest outlet on the top story.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so far as it affects the capacity of the roof tank and the height of same above the roof, *on condition* that a tank with a capacity of not less than 2,400 gallons, not less than 14 ft. above the hose outlet on the top story, shall be provided; that there shall be retained in the tank

for standpipe reserve not less than 2,000 gallons, and that the standpipe installation shall otherwise comply with the rules in all other respects; further, that the building be not increased in height or area.

566-28-A.

APPELLANT—Thomas J. Donovan, for Andrews Laundry Service Co., Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

THE RESOLUTION—

(566-28-A)

WHEREAS, Thomas J. Donovan, for Andrews Laundry Service Co., Inc., owner, filed, June 23, 1928, an appeal from an order of the fire commissioner, affecting premises 429-435 East 23rd street and 432-438 East 24th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 9, 1928 (Order No. 42333-C), reads:

"1. Discontinue the washing or immersing of a garment, fabric, fibre or article in a liquid product of petroleum for the purpose of cleaning it. Sec. 10, Ch. 10, Code of Ordinance.

"2. Discontinue the storage or use of varnoline or any other liquid product of petroleum in violation of the Code of Ordinances, Sec. 113, Ch. 10."

and

WHEREAS, the building is fireproof, three stories in height, 87 ft. 6 in. by 197 ft. 6 in. in area; OCCUPIED by one concern as a laundry and cleaning establishment; a portion of the first story being occupied for the storage of motor delivery trucks; 1st story, 60 persons; 2nd story, 130 persons; 3rd story, 80 persons; and

WHEREAS, the varnoline is stored in four tanks, each having a capacity of 1,460 gallons, the tanks being buried below the floor of the "varnoline room" which is a fireproof compartment on the first story of the premises; and

WHEREAS, the appellant contends that the building is adequately provided with exits; that there is installed an automatic sprinkler system and a standpipe system and contends, further, that varnoline is not classed as a volatile inflammable liquid; that its flashpoint is high (about 104) and that it is safe for the proposed use; and

WHEREAS, the flashpoint of this material is substantially higher than the flashpoint of similar mixtures permitted in dry cleaning and laundry establishments.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the storage of this mixture shall be restricted to a room of fireproof construction on the first story, limited in quantity on the premises at any one time to not more than 1,460 gallons, and shall be buried below the floor of the lowest story in an approved steel tank; that there shall be not more than one doorway from the interior of this room to the interior of the building equipped with self-closing fireproof door opening in to this room in which the material is stored and known as the dry-cleaner room; that there shall be provided to an open alleyway adjoining to the east, in the same ownership, a doorway from the dry-cleaner room, and one double-hung win-

MINUTES

dow to the room adjoining immediately to the north and designated as a dry-tumbler room, which shall be enclosed in fireproof construction, with not more than one door to the interior of the building, opening in, equipped with self-closing fireproof door; that from the dry-tumbler room to the alley there shall be an approved single-acting door, opening out, and one double-hung window; that the use and operation of this cleaning material shall be restricted to these two rooms on the first story, and shall be conducted in accordance with the laws pertaining to and affecting dry-cleaning establishments, and that all permits required shall be obtained before the use and operation is commenced.

BUILDING ZONE CASES.

601-28-BZ.

APPLICANT—William Weintraub, for Max Schoenfeld, owner.

SUBJECT—Application (re decision of the fire commissioner) under sections 7c and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—7716 Queens boulevard, Elmhurst, Borough of Queens.

APPEARANCES—

For Applicant: William Weintraub.

ACTION OF BOARD—Laid over to January 8, 1929, at 10 a. m., to amend to include bureau of buildings decision.

THE RESOLUTION—

(664-28-BZ)

WHEREAS, William F. Doyle, for Annie Silverman, owner, filed, August 13, 1928, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 636-640 Gates avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Gates avenue is in both an unrestricted district and business district, Sumner avenue is in a business district and Monroe street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered August 8, 1928 (re Plan No. 2615-28), reads:

"1. A garage for more than five cars at the above premises being in a business district may not be permitted.";

and

WHEREAS, the decision of the superintendent of buildings, rendered December 6, 1928 (Applic. No. 20709-28), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4(a), Subdiv. 15.

"The erection of a garage for more than five motor vehicles partly in a business and partly in an unrestricted district." ;

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 80 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deems that applicant did not substantiate his bases of appeal brought under sections 7c, 7e and 21 of the building zone resolution.

Resolved, that the decisions of the fire commissioner and superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

608-28-BZ.

APPLICANT—I. H. Lee, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—366 Beryl avenue, southeast corner of Parkwood avenue, Princes Bay, Richmond.

THE RESOLUTION—

(608-28-BZ)

WHEREAS, I. G. Lee, owner, filed, July 13, 1928, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station, premises 366 Beryl avenue, southeast corner of Parkwood avenue, Princes Bay, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting,

MINUTES

December 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Beryl avenue, Parkwood avenue and Bradford avenue are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 5, 1928, reads:

"You are hereby notified that New Building Application No. 1422/28, filed by you, in which you proposed to build an oil and gas station on the southeast corner of Beryl & Parkwood Avenues, No. 366 Beryl Avenue, Princes Bay, Staten Island, is disapproved for the reason that it is contrary to Section 4, Article 2, Subdivision 46 of the Zoning Resolution."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 80 ft. on Beryl avenue and 80 ft. on Parkwood avenue, upon which it is proposed to erect a one-story store, 16 ft. by 20 ft. in area, and to install three 550-gallon tanks and the necessary pumps for a gasoline service station; and

WHEREAS, the application is brought under section 21 and is supported by unanimous consent of property substantially in excess of an area common in practice to fixed areas under section 7g; and

WHEREAS, the board deems, in view of the general support by consent of all property affected, and the undeveloped area generally prevailing in the vicinity, that under rule of exception 7, subdivision f, a temporary permit of two years is a warrantable adjustment awaiting the development of the neighborhood in general, and it would be a hardship to deny a temporary relief.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for a temporary period of two years, *on condition* that any building erected thereon for use in conjunction with this business shall not exceed one story in height; that all permits for the prosecution of the work shall be obtained within six months and the work shall be completed within six months from the date of this action.

616-28-BZ.

APPLICANT—James Kearney, for Salvatore M. De Pasquale, owner.

SUBJECT—Application (re decision of the superintendent of buildings) under sections 7a and 21 of the building zone resolution, to permit in a residence district the alteration and extension of an existing garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—383 East 201st street, north side, 46.59 feet east of Decatur avenue, The Bronx.

APPEARANCES—

For Applicant: John Caldwell Meyer and James Kearney.

THE RESOLUTION—

(616-28-BZ)

WHEREAS, James Kearney, for Salvator M. De Pasquale, owner, filed, July 16, 1928, an application, under the building zone resolution, to permit in a residence district the alteration and extension of an existing garage for the storage of

more than five motor vehicles; premises 383 East 201st street, north side, 46.59 ft. east of Decatur avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Webster avenue is in a business district; East 201st street, west of a point 100 ft. west of Webster avenue, is in a residence district, and Decatur avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 30, 1928 (re Applic. Alt. 372-28), reads:

"1. Proposed extension of garage for storage of more than five motor vehicles in residence district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the existing public garage for the storage of more than five motor vehicles is non-fireproof, two stories and basement in height, and 50 ft. by 106.42 ft. deep; it is located 26 ft. to the north of East 201st street building line and extends through to Mosholu Parkway; it is proposed to remove the existing southerly street wall (on East 201st street) and to extend the two stories and basement southerly for a distance of 26 ft. to the building line; the building as altered to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, there now exists on these premises a garage, a variation for which was granted by the board of appeals, under Cal. No. 164-16-BZ, for a change of use from a stable to a garage; and

WHEREAS, it is proposed to extend the existing garage building on the 201st street front 26 ft., enclosing land now in use as gas service and runway of the existing garage structure; the board deems the variation strictly within the provisions of section 21 and section 7a and 6.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not be increased in height; that the existing structure with the proposed addition shall be reconstructed fireproof; that any advertising shall be limited and restricted to one projecting sign indicating the name and title of the business conducted on the premises; that there shall be no gasoline sold, disbursed or distributed outside the building line; that the front elevation shall be finished with face brick and architectural terra cotta of attractive design and that a return of the drawings shall be made to this board for approval before submission to the superintendent of buildings; that all permits required shall be obtained within six months and all work involved thereby completed within one year from the date of this action.

665-28-BZ.

APPLICANT—William F. Doyle, for Geo. H. Hochschwender, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a business building for store occupancy.

PREMISES AFFECTED—2022-2034 Bedford avenue and 99-103 Clarkson avenue, northwest corner, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: A. L. Pomarantz, Max Rosenbloom and Paul V. Prendergast.

THE RESOLUTION—

(665-28-BZ)

WHEREAS, William F. Doyle, for George H. Hochschwender, owner, filed, August 13, 1928, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a business building for store occupancy; premises 2022-2034 Bedford avenue and 99-103 Clarkson avenue, northwest corner, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 18, 1928, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bedford avenue, Clarkson avenue and Parkside avenue are all in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 8, 1928 (re App. No. 13182-1928), reads:

"Proposed one-story buildings to be used as stores and to be located in a residence district, contrary to Art. II, Sec. 3 of the Zone Resolution;"

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 50 ft. 8¼ in. and a depth of 120 ft. 3½ in.; to be occupied as a business building for store occupancy; and

WHEREAS, there exists for the remainder of the street front on Bedford avenue to the next street a gasoline service station, and there exists on the corner directly opposite, a public garage and gasoline service station; the limited area of this plot, in the judgment of the board, does not lend this to a development of the conforming residential use, and the board believes a denial would be arbitrary discrimination and under rule 21, practical difficulties and unnecessary hardship, an adjustment of the zoning resolution is fully justified in this case.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed in height one story above grade; that the use and occupancy shall be restricted to retail mercantile shops or store use; that no store shall be used for the sale of beverages or edibles of any nature or description, other than a duly licensed pharmacy or apothecary; that there shall be no opening on the Clarkson avenue front, other than windows, the sills of which shall be not less than 6 ft. above the grade level; that there shall be no advertising of any nature or description displayed on the Clarkson avenue frontage; that any advertising or sign display shall be restricted to plate glass show windows on the Bedford avenue store fronts; that there shall be no merchandise or display exposed or maintained outside of the building line of these premises; that there shall be no roof sign erected or maintained; that the facade shall be of attractive architectural design with cornice of substantial girth with balustrade parapet; that the architect shall make a return of the design to this board for approval before submission to the superintendent of buildings; that the requirements of the building zone resolution shall be complied with in all other respects, and that all permits required shall be obtained within six months and any work shall be completed within one year.

APPROVAL OF PLANS.

392-28-BZ.

APPLICANT—James J. Kearney, substituted for John J. Buckley, owner.

SUBJECT—Application for approval of plans in accordance with resolution adopted by the board under date of December 4, 1928.

PREMISES AFFECTED—Northeast corner of Cross Island boulevard and Hollis avenue, Bellaire, Queens.

APPEARANCES—

For Applicant: James J. Kearney.

For Opposition: None.

ACTION OF BOARD—Plans approved, in accordance with engineer's report.

THE VOTE TO APPROVE PLANS—

Affirmative: Acting Chairman Connell, Commissioners Guilfoyle and Holland and

Chief Kenlon 4

Negative 0

Absent: Chairman Walsh..... 1

CASES DISMISSED.

Under the Building Zone Resolution.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duties:

(275-28-BZ)

Filed March 28, 1928—Premises west side of White Plains road, 162 ft. south of Allerton avenue, Borough of The Bronx. Decision of the superintendent of buildings. Applicant: William L. Morris. Dismissed for lack of prosecution.

(338-28-BZ)

Filed April 12, 1928—Premises 2133 Strang avenue, northeast corner of Monticello avenue, Borough of The Bronx. Decision of the superintendent of buildings. Applicant: William L. Morris. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief

Kenlon 4

Negative 0

Absent: Chairman Walsh..... 1

THE RESOLUTION—

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications, under the building zone resolution, affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are *dismissed* for lack of prosecution.

AREAS FIXED.

(891-28-BZ)

The acting chairman presented and read a communication from Henry C. Brucker, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 25-11 Van Cortlandt avenue, Ridgewood, Borough of Queens.

The following area was approved by the board:

The north side of 71st (Van Cortlandt) avenue from a point 100 ft. east of Cypress Hills avenue to a point 400 ft. west of proposed garage; both sides of Cypress avenue from Shaler avenue to 62nd street on the east side and to 70th (Halleck) avenue on the west side; the east side of Fresh Pond road from 71st (Van Cortlandt) avenue to 70th (Halleck) avenue.

(933-28-BZ)

The acting chairman presented and read a communication from Henry C. Brucker, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and also the installation of a gasoline service station; premises 125-02 to 125-24 Metropolitan avenue, southeast corner

MINUTES

of 125th street and southeast corner of 85th avenue, Jamaica, Borough of Queens.

The following area was approved by the board:

Both sides of 125th street and also 126th street from Metropolitan avenue to a point 400 ft. south of premises in question (not including the unrestricted district); both sides of 85th avenue from 125th street to North Curtis avenue; the south side of Metropolitan avenue from 125th street to a point 200 ft. west of 125th street.

(589-28-BZ)

The acting chairman presented and read a communication from William F. Doyle, requesting the board to fix an area

deemed affected and within which to obtain consents to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1014-1024 Brooklyn avenue, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Brooklyn avenue from Tilden avenue to a point 100 ft. north of Snyder avenue; the south side of Snyder avenue from Brooklyn avenue to East 35th street; the east side of East 35th street from Snyder avenue to a point 260 ft. south of Snyder avenue.

Adjourned 3.30 p. m.

THE VOTE TO DISMISS—

Affirmative: Acting Chairman Connell, Commissioners Holland and Guilfoyle and Chief Kenlon

Negative

Absent: Chairman Walsh.....

THE RESOLUTION—

(398-28-S)

WHEREAS, Hermis Press Corp. (The Morning Telegraph), lessee, filed, April 25, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 814-826 Eighth avenue and 246 West 50th street, southeast corner, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 9, 1927, reads:

"Install an adequate interior electric fire alarm system in accordance with the Rules of the Board of Standards and Appeals and the enclosed approved layout.";

and

WHEREAS, the building is non-fireproof, four stories in height, 150 ft. 6 in. by 125 ft. in area at first story and 150 ft. 6 in. by 94 ft. in area above; OCCUPIED: 1st story, press room, 11 persons; 2nd story, engraving department, 51 persons; 3rd story, composing room, 19 persons; 4th story, storage, 6 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior wood stairways, extending from the first story to top story (the northerly stairway extends to the roof), with wood doors at openings; a fire escape on the Eighth avenue front of the building, having fireproof openings along the course thereof, extending from the second story to top story, and counterbalanced stairs to sidewalk; ROOFS of adjoining buildings: 12 ft. lower at south; and

WHEREAS, the petitioner claims that the building is provided with a fire alarm system consisting of eight auxiliary boxes, one master box on first story and two 10-inch electric gongs, one located on each of the first and second stories; furthermore, the petitioner contends that the present fire alarm system is adequate for the remaining period of tenancy until the expiration of the lease on December 31, 1929; and

WHEREAS, no one appeared on behalf of the Hermis Press Corp. when this case was called, the property having changed hands requiring an action of the fire department against new owner.

Resolved, that the petition be and it hereby is *dismissed* for lack of prosecution.

471-28-S.

PETITIONER—Tisdale Lumber Company, owner.

SUBJECT—Variation of the labor law as cited in order of the fire commissioner.

MINUTES

PREMISES AFFECTED—1000 Boulevard, Astoria, Borough of Queens.

APPEARANCES—

For Petitioner: James Tisdale.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition, ratifying action of board of review.

THE VOTE—

THE RESOLUTION—

(471-28-S)

WHEREAS, Tisdale Lumber Co., owner, filed, May 21, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1006 Boulevard, Astoria, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 21, 1928 (Order No. 33730-LD), reads:

"1. Provide an additional means of egress from each floor of the building remote from the interior stairway as per Section 271 of the Labor Law."

and

WHEREAS, the premises consist of several adjoining buildings erected upon a large plot of ground, the corner building is of frame construction, three stories in height, 70 ft. by 55 ft. in area, with a one-story open frame shed, 70 ft. by 27 ft. at east side; OCCUPIED for mill working in connection with a lumber yard: 1st story, 7 persons; 2nd story, 5 persons; 3rd story, 6 persons; EQUIPPED with a sprinkler system; EXITS: an open interior wooden stairway, extending from the first story to top story; an open exterior wooden stairway, leading from the third story to roof of a one-story building adjoining at southwest, having non-fireproof openings along the course thereof; EGRESS from the termination of the fire escape by means of a counterbalanced stairway leading from the roof to one-story adjoining building to the street; ROOFS of adjoining buildings: 17 ft. lower at southwest; and

WHEREAS, the petitioner claims that the order applies only to the corner (mill) building of the lumber yard; that the board of review adopted a resolution in 1918 to the effect: that when a counterbalanced stairway reaching the street will have been provided, the order will be considered complied with; the counterbalanced stairway was provided and in addition an approved sprinkler system was installed; and

WHEREAS, this matter was waived by the board of review of the fire department on September 5, 1918, since which date the entire premises has been additionally protected by the installation of an approved sprinkler system.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, ratifying the action of the board of review of the fire department, dated September 5, 1918, and the petition be and it hereby is granted, as to the existing exit facilities, on condition that the building shall not be increased in height or area.

681-28-S.

PETITIONER—Croker National Fire Prev. Eng. Co., for Vincento Delia, owner.

SUBJECT—Variation of the labor law as cited in the order of the fire commissioner.

PREMISES AFFECTED—1557-1561 Dean street, Brooklyn.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition

THE VOTE—

THE RESOLUTION—

(681-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Vincento Delia, owner, filed, August 21, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1557-1561 Dean street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 11, 1928, reads:

"Order No. 35363-LD:

"1. Provide two interior stairways remote from each other, enclosed with partitions of fireproof material extending from 1st story to 3 ft. above roof. Sec. 270 of the Labor Law."

and

WHEREAS, the building is non-fireproof, two stories (30 ft. 8 in.) in height, 66 ft. 3 in. by 107 ft. 2 1/8 in. in area; faces on two street fronts; OCCUPIED by one tenant, a dealer in rags: 1st story, shipping, receiving, laundry (for rags) and storage space for four motor trucks, 11 persons; 2nd story, assorting rags and office, 12 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to roof, enclosed in wood studs, covered both sides with plaster board and metal partitions with wood doors at openings; a fire escape balcony on the northerly, Troy avenue, front, of the second story of the building, having fireproof openings along the course thereof with 45-degree counterbalanced stairway to street; ROOFS of adjoining buildings: to north, one story higher; to south, one story lower; and

WHEREAS, petitioner contends that this order was issued on account of the laundering department on the first story; that the first story is adequately provided with exits; that no work is done on the second story which could bring the building within the requirements of the labor law and requests the acceptance of the existing means of egress; and

WHEREAS, a certificate of occupancy was issued by the superintendent of buildings of Brooklyn, December 31, 1925, for the specific use indicated on the plan of this petition, which certificate is still in force.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that the building shall not be increased in height or area; that a standard 45-degree fire escape as now installed shall be maintained on the rear of the second story with egress direct to the street, together with the fire-resisting enclosed stair at the front of the building; that existing three exits on the first floor shall not be reduced and shall be so maintained, and granted so long as conditions as to occupancy and use remain substantially unchanged.

1108-23-S.

PETITIONER—Herman Wolf, substituted for Croker National Fire Prevention Engineering Co., for Kalb and Bernstein, owners.

SUBJECT—Application for reopening—modification—re variation of labor law, as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—212 West 29th street, Manhattan.

APPEARANCES—

For Petitioner: Herman Wolf.

For Administration: Inspector Maher of fire department.

MINUTES

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1108-23-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Kalb & Bernstein, owner, filed, September 21, 1923, a petition with the board of standards and appeals for a variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 212 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 21, 1923, reads:

"Upon inspection of the above premises recently with reference to Fire Department Order 36162-LD, Item 1, it was found that the rear fire escape has been arranged in accordance with the requirements of this Bureau and the Labor Law, except that there is still one window on the course of the fire escape at the first floor, which has not been fireproofed; and safe egress from the foot of the fire escape to the street in accordance with the Labor Law has not been provided."

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 96 ft. in area; OCCUPIED: 1st story, stores, 4 persons; 2nd story, mfg. furs, 7 persons; 3rd story, furs, 12 persons; 4th story, furrier, 8 persons; the means of EGRESS consisting of an interior stairway, extending from the first story to the roof, enclosed in fireproof partitions, with fire doors at the openings; a fire escape at the rear of the building, with landing on roof level, and stationary stair to yard, with egress from yard through adjoining premises at the rear to street; and

WHEREAS, petitioner contends that the means of egress are adequate; and

WHEREAS, a variation of the labor law was granted December 18, 1923, under conditions existing at that time, for egress from the termination of the fire escape to adjoining yards to the west, and since which time the adjoining premises to the west have been built up, closing off the egress to yard; and

WHEREAS, it is now proposed to cross from the termination of the fire escape to adjoining premises at the rear, directly to the south, with egress through the building to 28th street.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and the petition be and it hereby is *granted on condition* that there be provided from the lower balcony of the rear fire escape iron stairs to the rear yard of the adjoining 28th street property, with egress through building thereon direct to the street, *on condition* that the total occupancy above the first floor shall be limited to the legal capacity of the interior stairs, and at no time exceed 25 persons above the first story, and that agreement in affidavit form for egress through the adjoining premises to the rear shall be filed with the superintendent of buildings and fire department, and that the door in the rear of the 28th street building shall be maintained free of access unlocked during working hours.

1169-27-S.

PETITIONER—Wells & Newton Co., Inc., for P. R. Mitchell Co., owner.

SUBJECT—Variation of labor law, as cited in order of the fire commissioner.

PREMISES AFFECTED—548-550 West 23rd street, Manhattan.

APPEARANCES—

For Petitioner: D. MacFarlane.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition. THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4
Negative 0
Absent: Chief Kenlon..... 1

THE RESOLUTION—

(1169-27-S)

WHEREAS, Wells & Newton Co., Inc., for The P. R. Mitchell Co., owner, filed, October 31, 1927, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 548-550 West 23rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 16, 1927 (Order No. 22998-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at east side of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law."

and

WHEREAS, the building is of mill construction, six stories in height, 50 ft. by 104 ft. 10 in. in area at first story and 40 ft. by 90 ft. 10 in. in area above; OCCUPIED for the manufacture and storage of pillows and cushions: 1st story, offices, 17 persons; 2nd story, packing, 5 persons; 3rd story, storage, no occupancy; 4th and 5th stories, manufacturing, 25 persons on each story; 6th story, manufacturing and storage, 3 persons; EQUIPPED with a two-source sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story, enclosed in fire-resisting partitions, with metal-covered doors at openings; a fire escape on the east side of the building, having fireproof openings along the course thereof, extending from the second story to the main roof, with EGRESS from the termination of the fire escape by means of an iron balcony at second story over the driveway and extending from the front of the building to the rear and leading to the roof of a one-story extension of the building adjoining at south; ROOFS of adjoining buildings: 12 ft. lower at west; and

WHEREAS, the petitioner claims that safe egress may be had from the fire escape balcony at second story to the one-story extension roof adjoining at south (under the same ownership) over the extension roof to a fireproof door in wall at second story of the adjoining building, thence through a fire-resisting stairway enclosure to 22nd street; furthermore, the petitioner contends that the adjoining building is sprinklered, including the underside of the one-story extension roof which forms a part of the passageway from foot of the fire escape in question; and

WHEREAS, this petition was denied May 1, 1928, and reopened October 30, 1928.

Resolved, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the egress from the lower termination of the fire escape, *on condition* that there shall be erected an iron balcony bridge, supported on I beams from the brick walls, connecting to the roof of the extension to the rear of 22nd street building, with egress from said roof through two fireproof casement doors and plain glass windows to the interior of the 22nd street building, with egress from the second floor of same to fire-resisting stair enclosure direct to 22nd street, and granted only so long as conditions as to occupancy and use remain substantially unchanged and both buildings are in single tenancy and operative control.

THE RESOLUTION—

(682-28-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Estate of Sundel Human and Joshua Kantrowitz, et al., executor and trust, owners, filed, August 21, 1928, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 138 Prince street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 21, 1928, reads:

"1. Enclose the interior stairway at east side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"2. Extend the interior stairway at the east side of building to the roof, as per Sec. 271 of the Labor Law, said extension and the landings, and passageways connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3' above the roof, as per Sections 271 and 272 of the Labor Law and Rule 6 of the Board of Standards and Appeals.";

and

WHEREAS, the building is non-fireproof, six stories (73 ft. 10 in.) in height, 25 ft. by 97 ft. in area at first story and 25 ft. by 90 ft. in area above; OCCUPIED: 1st story, storage and office, 4 persons; 2nd story, assembling plumbing fixtures and office, 8 persons; 3rd story, manufacture of women's hats, 8 persons; 4th story, manufacture of artificial fruit, 10 persons; 5th story, gold and silver plating, 3 persons; 6th story, manufacture of women's hats, 14 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the first story to top story (with 60-degree iron stairs to scuttle in roof), enclosed in wood board partitions, covered on the loft side with wire lath and Portland cement mortar, with fireproof doors at openings; stairs on the top story unenclosed; a party wall fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story (with gooseneck ladder to roof) to the second story balcony, with EGRESS from the termination of the fire escape by means of counterbalanced stair to street; ROOFS of adjoining buildings: to west, one story lower; to east, two stories lower; and

WHEREAS, petitioner contends, as to extending interior stairway to roof, that the only egress from the roof is to the roof of the building to the west and at present the party wall fire escape connects with each story of the building to the west, and in view of the light occupancy of

the building, requests the acceptance of the existing means of egress; and

WHEREAS, the same and similar order was brought under Cal. No. 1353-21-S, at which time there existed a total occupancy of 100 above the first story; and

WHEREAS, the present petition is predicated on the discontinuance and closing up of horizontal exits on each floor.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the total occupancy above the first story shall not exceed at any time fifty-four persons throughout the building, and *on condition* that a 60-degree party wall fire escape shall be maintained in accordance with the fire escape rules of the board of standards and appeals in addition to the interior stairhall means of exit; that a counterbalanced skylight shall be provided in the roof, and granted only so long as conditions as to occupancy and use otherwise remain unchanged.

APPLIANCE SUBMITTED FOR APPROVAL.

667-28-SA.

PETITIONER—Reif-Rexoil, Inc., for H. W. Hillman, owner.

SUBJECT—Approval of Rexoil Domestic and Industrial Fuel Oil Burner.

APPEARANCES—None.

CASES DISMISSED.

Variations of the Labor Law.

The chairman called attention to the following cases, where notices of intention to petition were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative officials in the performance of their duties:

(408-28-S)

Filed April 30, 1928—Premises 910 East 138th street, Borough of The Bronx. Order of the fire commissioner. Petitioner: De La Vergne Machine Co. Dismissed for lack of prosecution.

(537-28-S)

Filed June 14, 1928—Premises 482 Austin place, Borough of The Bronx. Order of the fire commissioner. Petitioner: United Real Estate Owners Association. Dismissed for lack of prosecution.

(554-28-S)

Filed June 21, 1928—Premises 207-225 Varick street, Borough of Manhattan. Order of the fire commissioner. Petitioner: B. M. Maltz and Sons, Inc. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative	0
Absent: Chief Kenlon.....	1

THE RESOLUTION—

WHEREAS, the foregoing petitioners have filed petitions with the board of standards and appeals from orders and decisions of administrative officials affecting the premises in question; and

WHEREAS, the petitioners have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing petitions be and they hereby are *dismissed* for lack of prosecution.

Adjourned 5.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

RULES

FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1927; Amended November 1, 1917, and Feb. 3, 1922.

Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations. In garages, motor vehicle repair shops and all selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

Rule 2. Wood Joisted Floor Construction. Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

Rule 3. Floor Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ($\frac{7}{8}$) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ($2\frac{1}{2}$) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ($\frac{1}{4}$) of one (1) per cent of steel mesh.

(b) Two and one-half ($2\frac{1}{2}$) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

Rule 4. Ceiling Covering. Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ($\frac{1}{2}$) inch plaster boards, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

Rule 5. Attachment to Ceiling. Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

Rule 6. Openings in Fire-Retarding Floors. Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

Rule 7. Columns. All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

Rule 8. Girders. All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

Rule 9. Shaft Enclosures. Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) of an inch thick;

(b) Two by four inch wood studs placed not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($\frac{7}{8}$) inch wood sheathing, one-half ($\frac{1}{2}$) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ($\frac{7}{8}$) inch wood sheathing, two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one inch lapped seams.

FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 7NO, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 7NO, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

RESERVE CALENDAR

BOARD OF STANDARDS AND APPEALS.

Administrative Applications.

- 1029-27-A—39 Fifth avenue, Manhattan.
- 1030-27-A—13-16 Central Park West, Manhattan.
- 1031-27-A—20-28 West 72nd street, Manhattan.
- 1032-27-A—242-248 West 76th street, Manhattan.

Appliances Submitted for Approval.

- 610-22-SA—Crocker Gas Valve, approval of.
- 799-22-SA—Kennell Gas Cut-Off Valve, approval of.
- 1173-22-SA—Anti-Syphon Valve, approval of.
- 1230-22-SA—Thermostats for Automatic Fire Alarm Systems, approval of.
- 1249-22-SA—Coen Oil Burner, approval of.
- 1391-22-SA—Dempsey High & Low Pressure Fuel Oil Burner, approval of.
- 57-23-SA—Collin Patent Automatic Gas Cut-Off Valve, approval of.
- 124-23-SA—Master Gas Shut-Off Valve, approval of.
- 125-23-SA—Packless Gas Shut-Off Valve, approval of.
- 127-23-SA—S. & K. Gas Shut-Off Valve, approval of.
- 232-23-SA—Manual and Thermal Gas Cut-Off Valve, approval of.
- 275-23-SA—Wm. E. Toelle Manual & Automatic Gas Shut-Off Valve, approval of.
- 279-23-SA—Heil Standard 200 Gal. Truck Tank, approval of.

- 1307-27-SA—A B C Angle Hose Valve, approval of.
- 187-28-SA—Faraday Model Single Stroke Solenoid 110 Volt D.C. Fire Alarm Gong, approval of.
- 188-28-SA—Faraday Waterflo Alarm Panel, approval of.
- 213-28-SA—Ford Automatic Pressure Regulating Valve, approval of.
- 304-28-SA—Crocker 2½-Inch Angle Hose Valve, approval of.
- 404-28-SA—Signal Engineering Sprinkler Alarm Panel, approval of.
- 443-28-SA—Kres-Kno Oil Burner, approval of.
- 511-28-SA—Genuine Detroit, Type "S," Anti-Syphon Valve, approval of.
- 515-28-SA—Jenkins 4 in. Swing Check Valve, approval of.
- 516-28-SA—Jenkins 6 in. Swing Check Valve, approval of.
- 517-28-SA—Jenkins 8 in. Swing Check Valve, approval of.
- 584-28-SA—Noiseless Nokol Rotary Type Burner, approval of.
- 620-28-SA—United States Oil Burner, approval of.
- 667-28-SA—Rexoil Domestic and Industrial Fuel Oil Burner, approval of.
- 697-28-SA—Acme Fire Alarm Signal System, approval of.

Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

PUBLIC HEARING

PROPOSED AMENDMENTS TO FUEL OIL RULES

[217-21-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, January 11, 1929, at 2 p. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

RULES, AS TENTATIVELY ADOPTED.

Rule 1. Definition.

For the purpose of these rules the following terms shall be interpreted in accordance with these definitions:

DEVICES:

No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

DISCHARGE LINE shall be the line between the discharge outlet of the pump and the burner oil inlet connection.

DWELLINGS are buildings used exclusively for dwelling purposes and occupied by not more than two families, including convents, rectories and monasteries.

FILL LINE is the line between the fill box and the fill pipe connection in the storage tank.

FIRE RETARDING MATERIALS:

(a) One-half ($\frac{1}{2}$) inch plaster boards or asbestos board, or three-eighths ($\frac{3}{8}$) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers, or

(b) Two thicknesses of one-quarter ($\frac{1}{4}$) inch asbestos boards laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are more than sixteen (16) inches on centers, or

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ($\frac{3}{4}$) inch thick.

Note—All fire retarding material to be applied as required in rules for fire retarding material of the Board of Standards and Appeals.

FIRM FOUNDATION: A firm foundation is one which will carry the maximum load to which it will be subjected without exceeding the safe bearing capacity of the soil.

FUEL OIL: Any liquid mixture, substance or compound, derived from petroleum, which does not emit an inflammable vapor below a temperature of 125° F. when tested in a Tagliabue open cup tester (Chapter X Article I Code of Ordinances).

GAUGING DEVICE: A means by which the level of the oil in a storage tank may be indicated.

HEATERS: A device for heating fuel oil for the purpose of decreasing the viscosity.

OIL BURNER: A device designed for the purpose of burning fuel oil.

OVERFLOW PIPE: A pipe which conveys by gravity the oil from the maximum level of an auxiliary tank to the storage tank or from the pump to the storage tank.

RELIEF VALVE: A valve held shut by a spring or other means to automatically relieve pressure in excess of its setting.

REMOTE CONTROL: A hand, electric or mechanically operated device to the oil supply shut off.

RETURN LINE: A line for the purpose of conveying by-passed oil to a storage tank.

SCAVENGING LINE: A line installed to permit the removal of water or foreign matter from a storage tank.

SHUT-OFF VALVE: A device that can be actuated to prevent the flow of liquid in a line of pipe.

SUPPLY LINE: That portion of the line between the storage tank and the oil pump inlet connection. Where a pump is not used it shall be that portion of the line between Storage Tank and the burner oil inlet connection.

SWING JOINT: A connection made in a pipe line by means of a combination of fittings so that the tank can settle naturally without breaking the line or impairing the efficiency of the connection.

Rule 2 (a). Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

(b). Oils Not Permitted.

Oils derived from or including petroleum that have a flashpoint below a temperature of 125 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

(c) Fuel Oil, within the meaning of these rules, having a flashpoint between 125 degrees and 150 degrees may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial and industrial plants. If used in tenement houses, commercial or industrial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

Rule 3. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

(a) In all buildings fuel oil storage tanks over 275 gallons shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway, and, if practicable, tanks shall be placed in a lower position than the roadbed of the subway.

(c) Tanks of a capacity not in excess of 275 gallons may be installed in the lowest story of dwellings. The tank shall be firmly anchored to prevent floating and located in an enclosure of concrete eight (8) inches in thickness extending above the top of the tank and roofed over with a concrete slab. The space between tank and walls of enclosure to be filled with clean sand.

Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.

PUBLIC HEARING

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

(i) CAPACITY.

The total storage capacity of fuel oil with flashpoint between 125 degrees and 150 degrees F. shall not exceed 1,100 gallons.

Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one (1) foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ($1\frac{1}{4}$) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ($1\frac{1}{4}$) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ($1\frac{1}{4}$) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

Section 5. Common Fill and Header Line.

Where a battery of tanks are installed containing the same degree of oil a common fill and header line may be installed provided the fill and header line is equal in sum total to the branch fill lines, and each branch line is provided with a shut-off valve, not more than four (4) tanks will be permitted in any one battery.

Section 6. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ($1\frac{1}{2}$) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-quarter ($\frac{1}{4}$) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ($1\frac{1}{2}$) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

Rule 5. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ($\frac{1}{2}$) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than one (1) quart capacity each or other equivalent fire extinguishers for extinguishing oil fires.

Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of buildings above ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the open hearth process and known to the trade as "tank steel." Such plates shall be free from physical imperfections, such as laminations cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks:

Tanks 36 in. in diameter and less— $\frac{1}{4}$ in. shell, $\frac{1}{4}$ in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$ in. shell, $5/16$ in. heads.

PUBLIC HEARING

Tanks 73 to 120 in. in diameter—5/16 in. shell, 3/8 in. heads.

Tanks over 120 inches in diameter to be of 3/8 in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and spacing of rivets:

Riveting in single lap seams shall not exceed a pitch as follows:

In shell 1/4 in. thick, 5/8 in. diameter rivets 2 1/4 in. pitch.

In shell 5/16 in. thick, 5/8 in. diameter rivets 2 3/8 in. pitch.

In shell 3/8 in. thick, 3/4 in. diameter rivets 2 1/2 in. pitch.

Section 2. Rectangular, Oval or Obround Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than 5/16 of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be 5/8 of an inch in diameter and spaced not more than 2 1/4 inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

Section 3. Vertical Storage Tanks Over 1,000 Gallons Capacity Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be 1/4 inch and the minimum thickness of roof plates 1/8 inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given

in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted watertight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

PUBLIC HEARING

Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

Section 6. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

Rule 7. Tests of Tanks and Piping for the Storage of Fuel Oil.

Tanks and piping to burner shall be tested hydrostatically at a pressure of not less than 10 pounds per square inch. Those parts subjected to a pressure exceeding 10 pounds per square inch shall be tested at a pressure of not less than $1\frac{1}{2}$ times the maximum pressure to which it is subjected. The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. When there is danger of freezing, tanks and piping may be tested with oil provided the installation is complete and the pressure applied at the burner end of the supply line. There shall be no fire or flame in the room or rooms in which the test is being conducted. All tests shall be conducted in the presence of a representative of the Fire Commissioner and shall be continued for thirty minutes.

The contractor shall furnish all the necessary equipment for conducting the tests.

Rule 8. Piping for Fuel Oil.

Section 1. Installation of Piping.

(a) Piping shall be run in a substantial and workmanlike manner and provision made for expansion, contraction and settlement. Exposed piping shall be protected against mechanical injury and shall be securely supported with rigid metal fasteners or hangers. Where the top of the tank is below the level of the burner oil inlet connection, the supply line from the tank shall be run above the level of the bottom of the tank so as to prevent syphoning. Cross connections permitting gravity flow from one tank to another are prohibited. All pipes connected to tank except measuring well or gauge pipe shall be provided with double swing joints at tank. All threaded joints shall be made tight with litharge and glycerine or equivalent suitable pipe compound.

(b) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ($\frac{1}{2}$) inch inside diameter shall be permitted.

(c) All connections shall be tight and shall have well-fitted joints.

(d) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

(e) Overflow pipes, when required, shall be not less than one size larger than supply pipe.

Section 2. Relief Valves.

(a) Where a shut-off valve is installed in the discharge line from an oil pump a relief valve shall be installed in the discharge line between the pump and the first shut-off valve. The relief line shall be returned to storage tank or to supply

line near pump. There shall be no shut-off valves in the relief line.

(b) All heaters shall be provided with a relief valve to prevent excessive oil pressure.

(c) Relief valves shall be set to discharge at not more than $1\frac{1}{2}$ times the maximum working pressure of the system.

Section 3. Fill Pipes.

(a) Each tank shall be provided with a separate fill pipe, except as otherwise stated in these rules, which shall be carried below the discharge line in the tank or otherwise trapped to prevent escape of oil vapor. The fill pipe shall be made up with screwed or flanged fittings securely held in place and shall be oil tight. Each fill pipe shall be provided with a receiver terminal or fill box or casing provided with means for locking and located as remote as practicable from any building opening or subway gratings.

(b) Where the top of the tank is above the fill box the fill pipe shall be connected to the top of the tank and be provided with a gate valve sealed closed when not in use at the tank, and a swinging check valve shall be provided in the fill line at the fill box.

Section 4. Vent Pipes.

(a) An open vent pipe of standard wrought iron or steel without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ($1\frac{1}{4}$) inches in diameter.

(d) Vent pipes shall be provided with weather-proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

Section 5. Return Line from Burners.

Return lines from burners, where used, shall not be smaller in diameter than the discharge outlet from the pump. They shall be connected into the supply line near the pump or into the storage tank without shut-off valve in the return line. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

Section 6. Heating Coils in Tanks.

All heating to reduce viscosity of fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

PUBLIC HEARING

Rule 9. Valves and Control of Flow for Fuel Oil.

(a) In all installations a shut-off valve shall be provided at or on each burner. Where the top of the storage tank is located above the oil inlet, connection to the burner at shut-off valve shall be provided in the supply line inside the building as near the tank as practicable.

(b) In systems where either steam or air is used for atomizing the oil, the oil and atomizing supply shall be interlocked so that in case of interruption of the atomizing supply, the oil will immediately be cut off.

(c) Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

Rule 10. Oil Level Indicating Device for Fuel Oil.

(a) Oil level indicating devices shall be constructed of substantial materials so designed that there can be no leakage of fuel oil or vapor. Test wells shall not be permitted in tanks located inside the building. Test wells when located outside the building shall be capped oil tight and kept closed when not in use.

Rule 11. Pumps for Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

(f) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secured against leaks.

(g) Where a pump is part of a burner unit and is used for atomizing purposes, an additional approved pump may be used without the disconnection of the unit.

Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In dwellings the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

Where an approved burner unit includes a pump as part of the unit, said pump or burner may be disconnected and used in conjunction with any other approved burner or pump.

A remote control shall be provided whereby the flow of oil to any burner can be stopped and such control shall be located either inside or outside the entrance to the room in which the burner is located and as close to such entrance as practicable.

The damper shall be so constructed that it cannot completely cut off the passage of the flue gases at any time.

Adequate ventilation at least equivalent to area of the smoke pipe at the point where it enters the flue shall be provided in all rooms in which burners are installed.

Rule 13. General Devices for Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) When preheaters are used thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and

prominent positions in the oil supply lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

Rule 15. Operation of Plant, Other Than in Dwellings, Using Fuel Oil.

No fuel oil burning plant, other than in dwellings, shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation, except in dwellings, shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

Rule 17. Auxiliary Tanks for Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

Rule 18. Pilot Light.

Automatic systems, unless electrically ignited, shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

Rule 20. Fire Protection.

(a) In dwellings, as defined in these rules, any woodwork, wooden lath and plaster partition or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the heating apparatus shall be covered with fire retarding material. Above the heating apparatus there shall be constructed a ceiling of fire retarding material (unless it be of fireproof construction) said ceiling shall extend at least four (4) feet beyond the sides and back, eight (8) feet from the front.

(b) In all buildings, other than in dwellings, as defined

PUBLIC HEARING

in these rules, the fire protection shall consist of either a heating apparatus room constructed of fireproof partitions of not less than four (4) inches in thickness with all openings protected by fireproof self-closing doors and ceilings protected by fire retarding material; or the entire ceiling, if not of fireproof construction, shall be protected by fire retarding material, and all vertical openings leading from the elevation on which the heating apparatus is located shall be enclosed by fire retarding materials with openings protected by fireproof self-closing doors.

(c) No combustible material shall be maintained within ten (10) feet of a heating apparatus, unless protected or separated by fire retarding or fireproof material.

(d) The ceiling directly over and for a space of two (2) feet beyond each side of the smoke pipe, unless of fireproof construction, shall be protected with fire retarding material.

(e) A hand fire extinguisher of an approved type, suitable for use on oil fires, shall be provided near the furnace, and so located as to be convenient for use in emergency.

(f) The floors of all boiler rooms must be of fireproof construction.

Rule 21. Systems Prohibited.

The use of auxiliary tanks between pump and burner unit of the pressure type are prohibited. Pressure in storage tanks for the purpose of discharging oil are prohibited.

Rule 22. Use of Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

RULES

RULES FOR THE TESTING OF WOOD

Pursuant to the Provision of Section 356 of Chapter 5 of the Code of Ordinances (Building Code).

(639-27-SR)

Adopted by the Board of Standards and Appeals July 22, 1927. Amended March 16, 1928.

Rule 1. Before any wood may be used for flooring or interior trim where incombustible materials are required under the provisions of section 356 of the Building Code, the superintendent of buildings must be notified promptly upon the delivery at the job of a consignment of such material. One test sample for each 2,000 feet of material will then be selected by a representative of the Bureau of Buildings, marked for identification, and forwarded to the testing laboratory, where, under the supervision of the superintendent of buildings or his representative, the samples shall be subjected to the following tests:

Before making tests of all specimens for testing shall be oven dried at a temperature of 140° F. to a point where there is no further loss of weight due to evaporation of moisture content.

A. SHAVING TEST—A mass of shavings cut fairly thick from the outside and interior of sticks of the treated wood are to be tested separately. These shavings shall be placed to a depth of two inches in a metal vessel twelve inches square, the bottom of which shall consist of a wire screen of ½ inch mesh. The shavings shall be packed down moderately to reduce the air spaces. A Bunsen yellow flame shall then be placed beneath the receptacle so that the flame is in contact with the shavings. After twenty-five seconds the flame shall be removed. The flame at no time should show higher than six inches above the top of the bed of shavings and the shavings should not be consumed in less than five minutes.

B. TIMBER TEST. Two samples ¾ inch by 1½ inches in cross section and twelve inches long shall be laid side by side across the top of a gas crucible furnace

with a pyrometer between them. The specimens shall be subjected to a flame at 1700 deg. Fahrenheit for two minutes, the test pieces shall then be removed, and the time of duration of flame and glow observed. The sticks shall then be cut through the middle at the most burned section and the area of the unburned wood measured with a planimeter. The flame must not persist longer than 15 seconds nor the glow longer than 20 seconds, and, in the case of hard woods, the unburned area should not be less than 55 per cent., nor in the case of soft woods less than 45 per cent.

C. CRIB TEST—Twenty samples are to be prepared, each ½ inch square and 6 inches long. These shall be built up on a ring support to form a crib work five tiers high, four sticks to a tier, making the crib six inches by six inches and approximately 2½ inches high. The crib shall be set six inches above a Bunsen burner to which the crib shall be exposed for a period of one minute at a temperature approximating 1200 deg. Fahrenheit. The flame must not persist more than twenty seconds after the Bunsen burner is removed, nor the glow last more than thirty seconds. The tendency of the flame to spread from stick to stick must also be noted.

Rule 2. All of the above tests shall be at the expense of the owner or contractor or other interested party.

If the tests are satisfactory the entire shipment will be permitted to be taken into the building and used. If not, the entire shipment shall be condemned and must be removed from the premises.

In general, acceptance shall be predicated upon the existence of a complete plant in full working order from which the material is shipped, and each shipment, or, where possible, each piece shall be trade marked in a conspicuous manner so that there may be no doubt as to its identity.

WARNING

Notice is hereby given to all petitioners, appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the

offices of the board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Sixth, That no appeal, application or petition will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal, application or petition forms.

BOARD OF STANDARDS AND APPEALS,

Room 1001, Municipal Building,
New York City.
